**ACCUMULATED PROVISION FOR DEPRECIATION OF GAS UTILITY PLANT (ACCOUNT 108)**

1. Explain in a footnote any important adjustments during year.
2. Explain in a footnote any difference between the amount for book cost of plant retired, line 11, column (c), and that reported for gas plant in service, pages 204-209, column (d), excluding retirements of non-depreciable property.
3. The provisions of Account 108 in the Uniform System of Accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If

the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.

4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.
5. At lines 8 and 15, add rows as necessary to report all data. Additional rows should be numbered in sequence, e.g., 8.01, 8.02, etc.

**GAS STORED (Account 117, 164.1 and 164.2)**

1. Report below the information called for concerning inventories of gas stored.

2. The Uniform System of Accounts provides that inventory cost records be maintained on a consolidated basis for all storage projects with separate records showing the Mcf of inputs and withdrawals and balance for each project, except under certain specified circumstances. If the respondent's inventory cost records are not maintained on a consolidated basis for all storage projects, furnish an explanation of the accounting followed and reason for any deviation from the general basis provided by the Uniform System of Accounts. Separate schedules on this schedule form should be furnished for each group of storage projects for which separate inventory cost records are maintained.

3. If during the year adjustment was made of the stored gas inventory, such as to correct for cumulative inaccuracies of gas measurements, furnish an explanation of the reason for the adjustment, the Mcf and dollar amount of adjustment and account charged or credited.

4. Give a concise statement of the facts and the accounting

performed with respect to any encroachment of withdrawals during the year, or restoration of previous encroachment, upon native gas constituting the "gas cushion" of any storage reservoir.

5. If the respondent uses a "base stock" in connection with its inventory accounting, give a concise statement of the basis of establishing such "base stock" and the inventory basis and the accounting performed with respect to any encroachment of withdrawals upon "base stock," or restoration of previous encroachment, including brief particulars of any such accounting during the year.

6. If respondent has provided accumulated provision for stored gas which may not eventually be fully recovered from any storage project furnish a statement showing (a) date of Commission authorization of such accumulated provision (b) explanation of circumstances requiring such provision (c) basis of provision and factors of calculation (d) estimated ultimate accumulated provision accumulation (e) a summary showing balance of accumulated provision and entries during year.

7. Pressure base of gas volumes reported in this schedule is 14.73 psia at 60°F.

(1) Black Hills Service Company support functions are centralized costs supporting the operations of the company's business units.

These costs are assigned directly whenever possible to a business unit or allocated based on a specific cost driver, or allocated based on a general allocator, referred to as the "Blended Ratio". The "Blended Ratio" consists of the arithmetic average of gross margin, payroll, and asset cost of the applicable business units.

(2) Black Hills Utility Holding Company support functions were established to provide services to multiple regulatory jurisdictions for increased efficiency. Costs are assigned directly whenever possible to a business unit, allocated based on a specific cost driver or allocated based on a general allocator. The "General Allocator" consists of the arithmetic payroll and asset cost of the applicable business units.

Such schedule also shall show the allocation of such plant costs to the respective departments using the common utility plant, explain the basis of allocation used, and give the allocation factors.

2. Furnish a schedule of the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and the amounts allocated to utility departments using the common utility plant to which such accumulated provisions relate including explanation of basis of allocation and factors used.

3. Furnish a schedule showing for the year the expenses of operation, maintenance, rents, depreciation and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Such schedule also shall show the allocation of such expenses to the departments using the common utility plant to which such expenses are related, explain the basis of allocation used, and give the factors of allocation.

4. Give the date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

SALES OF NATURAL GAS BY RATE AREA

1. Report below the information called for concerning sales of gas in each community of 10,000 population or more, or according to operating districts or divisions constituting distinct economic areas if the respondent's records do not readily permit reporting by communities. Except for state boundaries, community areas need not hold rigidly to political boundaries and may embrace a metropolitan area and immediate environs. The information called for by this schedule, however, may be re-

ported by individual communities of such size as required by a state regulatory commission concerned. Report in total for each state, sales by classes of service in other communities of smaller size. For main line sales to residential and commercial consumers, report these also in total by states. Do not include in this schedule field and main line sales to industrial consumers. These should be reported in the schedule, Field and Main Line Industrial Sales of Natural Gas, page 519.

**FIELD AND MAIN LINE INDUSTRIAL SALES OF NATURAL GAS**

1. Report below particulars concerning sales of natural gas to industrial customers served other than from local distribution systems operated by the respondent classifying between field sales and transmission sales and further subdividing these sales between sales subject to FPC certification and sales not requiring a FPC certificate. Include also any field and main line sales, classified as Other Sales to Public Authorities and indicate such exclusion. "Field sales" shall mean sales made from wells, from points along gathering lines in gas field production areas or from points along transmission lines within field or production areas and "transmission lines" shall mean sales made from points along transmission lines not within gas field or production areas.

2. Natural gas means either natural gas unmixed, or any mixture of any natural and manufactured gas. Designate,

however, any sales of mixed gas. In a footnote state the components of mixed gas, i.e., natural and refinery gases, natural and coke over gases, etc., and specify the approximate percentage of natural gas in the mixture.

3. Report separately sales to each field and main line industrial consumer to which sales of 50,000 Mcf or more were made during the year, grouped by States and tallied for each State, showing number of sales so grouped.

4. Provide separate totals for each State in addition to a grand total for all field and main line industrial

FIELD AND MAIN LINE INDUSTRIAL SALES OF NATURAL GAS (Continued)

Define by appropriate footnote, the meaning of each term in describing the type of sale, indicating specifically any order of priority in service between types of sales and among sales of the same type.

7. On each line following an entry in Column (h), itemize separately the adjustment portion of the entry in Column (h) due to adjustment provisions, such as purchased gas, tax, Btu or other rate adjustments. The difference between columns (g) and (h) should be the revenues resulting from the base contract rate named in the docket entered in Column (b). The effect of purchased gas, tax, Btu or other rate adjustment

provision shall be shown as the quotient of the total annual revenue received for the year from the application of each rate adjustment provision divided by the annual volume of gas delivered.

each point of delivery, show in column (l) the non-coincidental peak day volume of delivery at pressure base indicated, in column (m) the coincidental system peak day volume of delivery at pressure base indicated and in column (k) show the dates of the noncoincidental peak day deliveries. In a footnote state the date of the system peak day coincidental delivery. If an estimate is used for any peak day delivery, state the basis for such estimate.

**SALES FOR RESALE NATURAL GAS (Account 483)**

1. Report particulars concerning sales of natural gas during the year to other gas utilities and to pipeline companies for resale. Sales to each customer should be subdivided by service classifications, identified in column (c) where applicable, by rate schedule designation contained in the company's tariff.

2. Natural gas means either natural gas unmixed, or any mixture of natural and manufactured gas.

3. Provide separate totals for each State in addition to a grand total for all sales to other gas utilities.

4. Point of delivery, column (b), should show name of city or town and State, and such other designation necessary to enable identification on maps of respondent's pipeline system.

5. Designate any sales which are other than firm sales, i.e. sales for storage etc.

6. Monthly billing demands, as used in column (g) are the number of Mcf in the respective months actually used in computing the demand portion of the customer's bills whereby such number of Mcf if multiplied by the demand portion of the tariff rate. Report in column (g) the sum of the monthly billing demands for the number of months the customer received service or was subject to demand charges.

7. Where consolidated bills for more than one point of delivery are rendered under an FPC rate schedule, the several points of delivery shall be indicated in column (b) and the remainder of the information reported on a consolidated basis corresponding to the billing. Where, however, consolidated bills for more than one point of delivery are not rendered under an FPC rate schedule, the required information shall be furnished for each point of delivery.

8. Designate if Btu per cubic foot of gas is different for any delivery point from that shown in the heading of column (d).

9. For each firm sale of \$25,000 or more for the year at each point of delivery show in column (i) peak day volume of gas, at pressure base indicated in column (d) and in column (h) show the date of such peak delivery. If an estimate is used for any peak day delivery, state the basis for such estimate. If deliveries are made to one customer at more than one delivery point, the peak day delivery and date thereof should be shown for each delivery point if billing is on a non-conjunctive basis, and should be shown in total for each such customer if billing is on a conjunctive basis.

10. Summarize total sales as follows: A. Field sales subdivided by deliveries to (i) interstate pipeline companies and (ii) others. B. Transmission system sales divided by deliveries to (i) interstate pipeline companies (ii) intrastate pipeline companies and gas utilities for resale under FPC rate schedule and (iii) others. "Field sales" shall mean sales made from wells, from points along gathering lines and gas field or production areas or from points along transmission lines within fields or production areas and "transmission sales" shall mean sales made from points along transmission lines not within gas field or production area.
