Box Butte County will be a Non-Contiguous Route

The 2024 NBBP Box Butte County Project is a continuation of the work Mobius has already done in delivering buried fiber to the home. This will help close the gap on finishing fiber in Box Butte County.

This application will propose to deploy fiber to several areas in Box Butte County; these are rural areas that are currently unserved. There are letters of support and speed tests provided to attest to this within the attachments in M.

Mobius has collaborated with Box Butte County and the Commissioners to bring the county to a 100% fiber fed county. Our County Commissioners are very supportive and proactive in realizing the importance to their residents to have this incredible opportunity for buried fiber to the home.
