Re: Nebraska Broadband Bridge Program Application

Dear Nebraska Broadband Bridge Grant Committee:

As a resident of rural Box Butte County, I am sending this letter of support for Mobius Communications Company and the potential Grant Funding through the Broadband Bridge Grant.

Box Butte County has a successful working partnership with Mobius Communications and supports their efforts to make broadband services available to all the residents of Box Butte County. While broadband coverage maps may show significant coverage of the county, this is not the case. Many of the rural residents still find themselves without adequate service, including myself. As a resident and as the Chairman of the Box Butte County Commissioners, I know firsthand the importance of not only having access to high-speed internet, but also the luxury it is to have a local provider that is working diligently to bridge the gap in coverage.

As an elected official, it is essential that we make these connections when we are given the opportunity. Through partnerships such as this, Mobius Communications continues to show their dedication to the residents of Box Butte County. The Box Butte County Commissioners have the upmost confidence that Mobius Communications can help us achieve our ultimate goal of total broadband coverage for all residents. As a sign of our commitment to this project, we are collaborating with Mobius and providing matching funds in the amount of \$90,000.00. Broadband expansion is critical in order to ensure that Box Butte County continues to progress with technology.

Mobius Communication Company has our full support in the submittal of this Nebraska Broadband Bridge Program Application. Please do not hesitate to contact me at 308.762.6565 if you have any further questions.

Sincerely,

Steve Burke  
Box Butte County Chairman of the Board

RE: Box Butte County 2024 Nebraska Broadband Bridge Program Grant

Dear Nebraska Broadband Bridge Grant Committee,

As more operations of every producer in our area become more dependent on fast and reliable connectivity, it is imperative to our economy and community that every resident have access to the internet. The community of Box Butte County will benefit deeply from the funding of your program.

Your decision to grant Mobius Communications financial support will help expand Box Butte County's broadband footprint to 97% of our county's residences. This will ensure our ag producers stay competitive in a worldwide market, and keep our rural businesses and residents connected locally and globally.

Box Butte Development Corporation (BBDC) is writing in support of Mobius Communication's application connecting our county residents with broadband and fiber to the home. This connection provides sustainability for our rural community while encouraging growth in business operations and population.

We are proud to have Mobius Communications represent Box Butte County to the Nebraska Public Service Commission, and fully support their activities to advance and grow our community.

Should you have any questions in this process, please contact me.

Sincerely,

A handwritten signature in black ink that reads "Hannah R. Robinson". The signature is fluid and cursive.

RE: Mobius Communications  
P O Box 246  
Hemingford, NE 69348

We are writing this letter to express our enthusiasm for the possibility of Mobius Communications of Hemingford, Nebraska to provide fiber optic internet service to our home address.

We currently are customers who utilize Wild Blue internet services. While this is better than dial-up, it is slow and unreliable. Our children were unable to use the internet because of it's speed. The majority of the time, their school work had to be completed in town, which is a 15 minute commute, one way. It is a challenge to be living in a rural environment, where internet speeds are quite slow.

My husband and I are both required internet access if we are called at home for our jobs. Many times, the internet speed is too slow to complete the work that we need to do.

We would, most certainly, be ready and eager to sign up to utilize the fiber optic internet service that would be provided by Mobius Communications. We hope that this will become a reality in the near future. If you should have any questions, please do not hesitate to contact either of us.

Sincerely,

Roger and Barbie Applegarth

Re: Mobius Communications grant application

NBBP Grantees:

I write in support of the Nebraska Broadband Bridge application submitted by Mobius Communications. For us, expanded broadband in Box Butte County would be significant to reliable internet service as well as economic viability to our fourth-generation family agribusiness.

We reside 20 miles west of Alliance, primarily operating a commercial cow-calf operation. Crops include contracted acres for potatoes and sugar beets, and also corn, forage sorghum, alfalfa, dryland and irrigated wheat, dry edible beans and occasionally sunflowers and millet. Precision agriculture and irrigation requires reliable technology.

However, limited resources exist for high-speed internet. Cellular service is primarily from Viaero Wireless or Verizon. Currently, we purchase internet service from a family-owned business based in Alliance. The signal comes to a small dish located at the highest point on our farm/ranch – atop an old windmill tower west of our home.

Unfortunately, we have not had opportunity to be Mobius customers for internet service. The initial fiber line serving 487 prefix phone customers was placed about 2 miles north of us, near our wheat ground. It serves our closest neighbor with excellent 50 Mbps broadband. What a difference fiber could make for our family and business!

Low speed and unreliable service, examples:

- In a speed test done at 9:15 p.m. on June 14, the result was: Download 14.61Mbps / Upload 12.24Mbps. I had no success that evening for online banking or printing records from a recent medical appointment.
- Several times, while working from my home with the University of Nebraska system in external relations with the Nebraska College of Technical Agriculture, I needed to drive to the neighbor's machine shop "up north" to use his Mobius service to complete a Zoom call or transmit large data files.
- In 2021-22, I sometimes scheduled a meeting room at the Alliance Public Library or the University Extension Office (requiring a 40-mile roundtrip) to be assured I could complete my news project or conference call.

- In the past 2 years, my sister-in-law (now a retired college professor from Kentucky) has traveled to the ranch to assist with cattle operations, farming, and family business. While here for a several weeks at a time, her client consulting, Zoom classes, and business meetings can be a challenge. It's frustrating to reschedule sessions or drop off a video call to participate only by audio.
- Due to the distances to Scottsbluff, Sidney, Bridgeport and Alliance, I appreciate medical providers who allow face-to-face consults or appointments by Zoom calls. Who knew a physical therapy session could be successful online! That saves time and travel expense if the internet works for 45 minutes.
- We try to participate from our home office in multi-county ag webinars or meetings from Nebraska Extension.
- Ag organizations across the state sometimes offer Zoom calls or links to conferences for members. These are invaluable as it is prohibitive for us to travel to Lincoln, Omaha, or even Kearney for a half-day session. Again, internet video isn't assured.
- Internet reliability has been important in capacities where service as an elected board director or volunteer board member requires participation in business and personnel decisions. Each of us holds such a position.
- Telephone service – with cell phones that can be operated with Wi-Fi connection, reliability is valuable. If internet is insufficient here, we either need to move to a window, doorway, or out to the patio for connectivity. That's a bit challenging in winter conditions, to say the least, and limiting to step away from a laptop or PC.
- As many have, we moved away from a landline, and switched to VOIP (Voice over Internet Protocol) with our home number. While we prefer this less expensive method, VOIP only works if the internet works.

We look forward to expanded technology in our cattle business (chute-side internet records, for example), and opportunities in farming practices with GPS guidance systems. Additionally, conversations for home-based business ventures do exist for the next generation of agriculturalists and their families at Clevis Ranch.

I understand that the Box Butte County Commissioners have pledged \$90,000 to the Mobius application. *Residents in rural areas need and deserve broadband services that are more equitable with those available within the city limits.*

We certainly appreciate the Nebraska Public Service Commission's consideration of the Mobius application to the Nebraska Broadband Bridge Program.

I'd be pleased to answer any questions. Contact me at [wamcrawford@gmail.com](mailto:wamcrawford@gmail.com) or 308-631-5134.

Thank you, Mary Bargman Crawford

Having Internet Problems?

To whom it may concern,

We live in a rural area outside of Alliance Nebraska. We have had three different satellite internet providers and none of them work well enough for my three children to complete their school work on the internet. My husband also is not able to watch and try to buy cattle on the online auctions due to bad internet connections. Would be beneficial to have fiber so my husband and children can complete on line work.

Thank you,

Alishia Intermill
