## **Box Butte County will be a Non-Contiguous Route**

**Mobius has removed two locations from this non-contiguous route from the original grant submission. Mobius has also taken 2.5 miles out. This is reflected in our costs.**

**\*Two locations were in a slight overlap of our previous DED Box Butte County grant.**

The 2024 NBBP Box Butte County Project is a continuation of the work Mobius has already done in delivering buried fiber to the home. This will help close the gap on finishing fiber in Box Butte County.

This application will propose to deploy fiber to several areas in Box Butte County; these are rural areas that are currently unserved. There are letters of support and speed tests provided to attest to this within the attachments in M.

Mobius has collaborated with Box Butte County and the Commissioners to bring the county very close to a 100% fiber fed county. Our County Commissioners are very supportive and proactive in realizing the importance to their residents to have this incredible opportunity for buried fiber to the home.
