

A funding breakdown for the grant must be attached. This should include a proposed budget, using the Commission-provided template, reflecting a clear and detailed breakdown of cost elements based on total allowable project costs. The budget should include the applicant's best estimates without unnecessary inflation. Any disallowed expenses must be adjusted from the total project costs to determine total allowable costs for calculating the grant amount requested and required match percentage. This should also include the total grant amount requested and detail any matching funds committed. The funding breakdown should be submitted in Excel format.

Please see the funding breakdown in **Attachment G-1** and Budget Summary in **Attachment H-1**.
