To the Nebraska Public Service Commission,

I am writing in support of Vistabeam Internet's (Inventive Wireless of Nebraska, LLC) grant application to the Nebraska Pro-Ag Program for funding to build an advanced wireless broadband network that will serve our rural business location.

We strongly support this grant application and the focus on providing broadband internet to further the goals of increased agricultural productivity, market access and economic diversification provided by advanced connectivity.

Vistabeam has our consent and support to go forward with connecting our location to this project and we are aware of the rates charged for service.

Thank you for putting this program together to help improve broadband in our community.

Yours truly,

Terry Bilka
