Nebraska Public Service Commission  
1200 N St # 300  
Lincoln, NE 68508

Dear Commissioners,

I am a network engineer with several years of experience in field deployment, rf design, GIS planning and performance testing of fixed wireless and fiber broadband networks.

I have reviewed Vistabeam's proposals for the 2025 Precision Agriculture Infrastructure Grant Program, and I am personally familiar with the Tarana equipment Vistabeam plans to deploy.

Based on my personal knowledge and review of relevant documents, I hereby attest that the proposed deployment will be able to provide consistent broadband speeds of 100 Mbps download and 20 Mbps upload to the proposed farm site in Cheyenne County. The Tarana equipment that is deployed on our Gurley Tower is 2 hops of licensed microwave from our fiber feed.

I hereby attest to the accuracy and authenticity of this information to the best of my knowledge and belief. I am also available to provide any additional information or documentation as needed.

Please do not hesitate to contact me if you require any additional information or assistance in this matter.

Sincerely,

A handwritten signature in black ink that reads 'Eric Meisner'.
