- Internet Protocol or IP Network Weather Stations update weather servers real-time, providing up to the second data without the use of a PC. There are no networking fees. Perfect for low consumption requirements, remote monitoring applications, or weather station owners that do not want to leave their PC on 24/7. WiFi allows you the freedom to move your display console anywhere in your home or office while still reporting to the internet.
- Simply plug the WeatherBridge data logger into your weather station console or data logger, and connect to your router via Ethernet cable or WiFi. Within minutes, you'll see your weather data live on the Internet.
- Also supports Twitter, WeatherBug, Citizens Weather Observation Program, PWSWeather, MySQL, Email Summaries and Alerts, and AirCams.
- WEATHER STATIONS SOLD SEPARATELY. This is the universal server only.

Verified Purchase

Purchased for school district. Since I didn't hear any complaints (which I would), I can only assume that teacher was happy with the item.
