I. INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Howard Solganick. My business address is 810 Persimmon Lane, Langhorne, PA 19047.

Q. BY WHOM ARE YOU EMPLOYED, AND WHAT IS YOUR POSITION?

A. I am employed by Energy Tactics & Services, Inc., as a Principal. I am performing this work as a subcontractor to Blue Ridge Consulting Services, Inc. ("Blue Ridge").

Q. ON WHOSE BEHALF ARE YOU TESTIFYING?

A. I am testifying on behalf of the Nebraska Public Advocate.

II. STATEMENT OF QUALIFICATIONS

Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND.

A. I received a Bachelor of Science in Mechanical Engineering, with a minor in Economics, from Carnegie Mellon University, and a Master of Science in Engineering Management, with a minor in Law, from Drexel University. I have completed courses on arbitration and mediation presented by the American Arbitration Association, scenario planning presented by the Electric Power Research Institute, and load research presented by the Association of Edison Illuminating Companies. I have also taken courses in zoning and planning theory, practice, and implementation in both New Jersey and Pennsylvania.

Q. PLEASE DESCRIBE YOUR PROFESSIONAL EXPERIENCE.

1 A. I have been actively engaged in the utility industry for over 50 years, holding utility
2 management positions in generation, rates, planning, operational auditing, facilities
3 permitting, and power procurement. I have delivered expert testimony on utility planning
4 and operations, including rate design and cost of service, tariff administration, generation,
5 transmission, distribution and customer service operations, load forecasting, demand-side
6 management, capacity and system planning, and regulatory issues.

7 As a subcontractor, I have performed management audits for the Connecticut Department
8 of Public Utility Control and ratebase audits for the Public Utilities Commission of Ohio
9 and the Oregon Public Utility Commission. I have also provided support—again as a
10 subcontractor—for the Staff and Commissioners of the District of Columbia Public Service
11 Commission in electric and gas rate cases.

12 I have also been engaged—again as a subcontractor—to review utility performance
13 before, during, and after major storm-related outages in several locations: a windstorm in
14 Washington; summer storms and an ice storm in Missouri; Hurricane Ike in Texas;
15 Hurricane Ivan in Jamaica West Indies; and the two 2011 storms—Tropical Storm Irene
16 and a major snow storm—that affected New Jersey. I was also engaged to review the
17 emergency plan of a New England utility. Some of these assignments were requested by
18 the utilities themselves; others were initiated by state utility regulators.

19 I have worked with utilities, intervenors, public service commissions, attorneys
20 general, and public advocates in Arizona, Connecticut, Delaware, District of Columbia,
21 Georgia, Maine, Maryland, Massachusetts, Michigan, Missouri, New Jersey, Ohio,
22 Oregon, Pennsylvania, Texas, Quebec, and Jamaica.

1 I am licensed as a Professional Engineer in Pennsylvania (inactive) and New Jersey
2 (inactive). I hold a Professional Planner's license (inactive) in New Jersey. I served on the
3 Electric Power Research Institute's Planning Methods Committee and on the Edison
4 Electric Institute Rate Research Committee.

5 I have been appointed as an arbitrator in one case involving a pricing dispute
6 between a municipal entity and an on-site power supplier and in a commercial landlord-
7 tenant case concerning sub-metering and billing.

8 I previously served on two New Jersey Zoning Boards of Adjustment as Chairman
9 and member and a Pennsylvania Township Planning Commission as Chairman and
10 member.

11 **Q. HAVE YOU INCLUDED A MORE DETAILED DESCRIPTION OF YOUR**
12 **QUALIFICATIONS?**

13 A. Yes. A description of my qualifications is included as Exhibit HS-1.

14 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE NEBRASKA**
15 **CORPORATION COMMISSION?**

16 A. I provided testimony in Docket No. NG-109 covering these topics:

- 17 • Class Cost of Service
- 18 • Revenue Allocation
- 19 • Rate Design and Consolidation
- 20 • Weather Normalization
- 21 • Other Revenue Adjustments
- 22 • HEAT Incentives

- Jurisdictional Subsidization

Q. HAVE YOU PERFORMED OTHER WORK THAT HAS COME BEFORE THIS COMMISSION?

A. I have supported prior Blue Ridge work for the Public Advocate on these projects, which resulted in reports or analyses filed with the Commission or supported efforts by the Public Advocate:

- NG-0072.01 SourceGas ISR
- NG-0074 Black Hills Nebraska Gas Utility ISR
- NG-0078.01 SourceGas SSIR
- NG-0078.02 SourceGas SSIR
- NG-0078.03 Black Hills Gas Distribution SSIR
- NG-100 Black Hills Gas Distribution and Black Hills Nebraska Gas Utility Consolidation of Tariffs
- NG-111 2021 Polar Vortex Cost Recovery
- NG-117 2022 Voluntary Renewable Natural Gas Program
- NG-119 2023 Gas Supply Cost Adjustment Audit

III. SCOPE AND SUMMARY OF TESTIMONY

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?

A. The purpose of my testimony is to respond to the testimonies of Ethan Fritel, Douglass Hyatt, and Tatyana Bannan as they relate to these issues:

- Revenue Stability
- Bifurcation of the Commercial Class
- Class Cost of Service
- Revenue Allocation
- Rate Design
- Weather Normalization Adjustment Rider

- Other Revenue Adjustments
- HEAT Incentive Program Costs
- Tariff Changes
- Transfer of Western, NE from Rate Area Five to Rate Area Three

Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS FOR THE ABOVE AREAS.

A. I recommend that the bifurcation of the Commercial class be approved. I recommend that the revenue requirement proposed by the Public Advocate's witness Mrs. Mullinax be allocated according to Exhibit HS-2 and that the rate elements in Exhibit HS-3 be implemented. I do not recommend the approval of the Weather Normalization Adjustment Rider due to its inherent bias and lack of support. I recommend the adoption of various tariff changes, although the increased non-working hours reconnection charge should be approved only if the period for disconnection is adjusted. Assuming individual and timely notice is provided to the customers and suppliers in Western, Nebraska, I recommend the reclassification from Rate Area 5 to Rate Area 3.

Q. ARE YOU PRESENTING ANY EXHIBITS IN CONNECTION WITH YOUR DIRECT TESTIMONY IN THIS PROCEEDING?

A. Yes. Besides my resume included as Exhibit HS-1, Exhibits HS-2 through HS-8 are referenced in my testimony. Due to the large size, Exhibits HS-5, HS-6, and HS-7 are provided only electronically. I have also attached the Company's responses to data request I relied upon in developing my testimony.

1 **IV. THE RATE DESIGN PROCESS**

2 **Q. PLEASE DESCRIBE THE RATE DESIGN PROCESS?**

3 A. The rate impact of any Commission decision unfolds through a sequential process. First,
4 the revenue requirements are determined. An initial revenue allocation is informed by a
5 Class Cost of Service Study (CCOSS), which allocates costs and revenues among the
6 Companies' rate classes. The CCOSS also provides unit costs that serve as the foundation
7 for structuring individual rate elements within each rate schedule. Using this information,
8 tentative rates for each class are developed and analyzed for potential bill impacts. These
9 impacts are evaluated not only for their economic implications but also for social and other
10 qualitative concerns. Based on this evaluation, adjustments may be made to specific rate
11 elements or the allocation of revenue across classes. The final rate design strives to balance
12 cost-based principles with broader considerations, ensuring an equitable and thoughtful
13 outcome.

14 **V. REVENUE STABILITY**

15 **Q. PLEASE EXPLAIN THE CONCEPT OF REVENUE STABILITY.**

16 A. Revenue stability through rate design aims to make the utility's revenue stream predictable
17 and as insulated as possible from external influences such as weather and economic
18 conditions.

19 **Q. HOW CAN A UTILITY INCREASE REVENUE STABILITY?**

20 A. Various rate design elements respond differently to variables such as weather and
21 economic conditions.

- 1 • The customer or service charge varies only with the number of customers, which is
2 not affected by weather conditions. Economic conditions may have some limiting
3 effect as when an entity ceases operations or occupancy, utility service is often
4 maintained to protect physical assets—such as a building—from damage. For
5 example, heating may be needed to prevent water and waste piping from freezing.
6 Moreover, even in very mild weather, customers generally do not disconnect
7 service, as many utility tariffs impose costly provisions on seasonal disconnects.
- 8 • Trackers and riders that are collected on a per-customer basis provide greater
9 revenue stability than those collected on a commodity basis (e.g., therm, kilowatt-
10 hour, or gallon).
- 11 • Higher per unit charges for the initial block of commodity usage also enhances
12 revenue stability by charging more for usage that is unlikely (or less likely) to be
13 affected by weather and economic conditions.
- 14 • Lower rates for the trailing or final block of commodity usage enhances revenue
15 stability by reducing the impact of weather or economic conditions on the more
16 variable usage.
- 17 • Utilities may request trackers or riders that moderate (or eliminate) the overall
18 impact of weather or economic conditions.

19 **Q. WHY IS REVENUE STABILITY ATTRACTIVE TO A UTILITY?**

20 A. For an investor-owned utility that must meet revenue and profit targets reported to the
21 investment community, revenue stability helps reduce variability from the financial
22 outlook. Internally, revenue forecasting becomes more reliable when the utility employs
23 multiple methods to promote revenue stability.

1 **Q. IN THIS CASE, IS THE COMPANY REQUESTING ANY RATE DESIGN**
2 **CHANGES THAT WILL INCREASE REVENUE STABILITY?**

3 A. Yes. The Company is proposing several rate design changes that will enhance revenue
4 stability:

- 5 • The Company is proposing an increase in the customer charges and is continuing
6 to collect the SSIR and HEAT charges on a per-customer basis.
- 7 • The Company is proposing to bifurcate the Commercial Class into a Small
8 Commercial Class and a Large Commercial Class, which will allow a more tailored
9 Customer Charge for each class.
- 10 • The Company is proposing to adjust the initial tier of usage to better represent base
11 usage, which is less variable and not subject to weather conditions.
- 12 • The Company is not proposing an increase in the rates for the final usage tiers,
13 thereby minimizing the revenue derived from this usage, which is more susceptible
14 to weather and economic conditions.
- 15 • The Company is proposing a Weather Normalization Adjustment Rider, which
16 would eliminate all—or a substantial portion—of the revenue variability caused by
17 weather conditions.

18 **Q. HAS THE COMPANY PROVIDED AN EXAMPLE OF THE EFFECT OF ITS**
19 **RATE DESIGN ON REVENUE STABILITY?**

20 A. Yes. Company witness Hyatt has provided Figures DNH-6 and DNH-7, which illustrate
21 Residential rates under both current and proposed rates.

1 **Q. DO YOU HAVE ANY OBSERVATIONS ON THE COMPANY'S**
2 **PRESENTATION?**

3 A. The portions of the bars representing the Customer Charge and the SSIR Charge are stable
4 (flat) in each figure. However, whereas Figure DNH-6 shows only \$20 per month in stable
5 revenue, Figure DNH-7 shows over \$31 per month—an increase of more than 55% in
6 stable revenue, even though the Company is not requesting a 55% increase in overall rates.
7 Conversely, the shift toward greater revenue stability is also evident in the volumetric
8 charges (shown in blue). Comparing the two figures, the volumetric portion is noticeably
9 smaller in Figure DNH-7 than in Figure DNH-6. Neither figure reflects the potential impact
10 of the proposed Weather Normalization Adjustment Rider, which would further moderate
11 or eliminate weather-related revenue variability.

12 **VI. BIFURCATION OF THE COMMERCIAL CLASS**

13 **Q. WHAT CHANGE IS THE COMPANY PROPOSING FOR THE COMMERCIAL**
14 **CLASS?**

15 A. The Company is proposing to separate the Commercial Class into two separate and new
16 classes—Small Commercial Service and Large Commercial Service.¹

17 **Q. WHAT IS THE COMPANY'S BASIS FOR THIS PROPOSAL?**

18 A. The Company's intent—or stated goal—is to address competition from public electric
19 utilities that offer winter seasonal rates. The Company proposes to identify each customer

¹ BHE Hyatt Direct at 32:8–10.

1 class's non-heating baseload by analyzing usage during the summer months, when heating
2 is not a factor.²

3 **Q. AT WHAT BREAKPOINT DOES A COMMERCIAL CUSTOMER BECOME A**
4 **LARGE COMMERCIAL CUSTOMER RATHER THAN A SMALL**
5 **COMMERCIAL CUSTOMER?**

6 A. The Company indicates that two distinct usage patterns were identified within the
7 commercial service customer group—characterized by lower load factors and lower total
8 annual consumption.³ Based on this analysis, the Company proposes to divide the
9 commercial service group at a threshold of 5,000 therms per year. Customers using fewer
10 than 5,001 therms annually would be placed into the Small Commercial Service class,
11 while those using more than 5,000 therms would be assigned to the Large Commercial
12 Service class.⁴ This threshold concept is consistent with practices used by other BHE
13 affiliates.⁵

14 The Company described the process it used to determine this breakpoint and then
15 establish base usage levels for each new class. These base levels were used to set the
16 proposed Tier 1 Distribution Charge usage thresholds: 20 therms per month for Small
17 Commercial Service and 500 therms per month for Large Commercial Service.⁶ The
18 Company presented graphical illustrations of this proposal in Figure DNH-4 (Small
19 Commercial Service Monthly Average Use) and Figure DNH-5 (Large Commercial
20 Service Monthly Average Use).

² BHE Hyatt Direct at 38:2–5.

³ BHE Hyatt Direct at 39:4–7.

⁴ BHE Hyatt Direct at 39:17–19.

⁵ BHE Hyatt Direct at 39:19–40:2.

⁶ BHE Hyatt Direct at 40:3–11.

Q. WHAT REVIEWS DID YOU PERFORM OF THE COMPANY'S BIFURCATION PROPOSAL?

I requested various information, including the commercial tariff breakpoints used by the Company's affiliates,⁷ alternative breakpoint analyses,⁸ and the extension of Figures DNH-4⁹ and DNH-5.¹⁰ I also requested the penetration of gas heat used for backup for electric heat pumps,¹¹ and various gas versus electric cost comparisons for water heating¹² and space heating.¹³ I also requested details of how the Company expected to administer the transition between Small Commercial Service and Large Commercial Service.¹⁴ I compared the proposed expected cost of the two rate schedules at various rate levels and requested the Company's cost comparison.¹⁵

Q. IS THE COMPANY'S PROPOSAL TO BIFURCATE THE COMMERCIAL CLASS REASONABLE?

A. Based upon the information provided by the Company in its filing and responses to discovery, I recommend the adoption of the proposed commercial service bifurcation and the proposed 20 therm/month Tier 1 for Small Commercial Service and the 500 therm/month Tier 1 for Large Commercial Service. The Company's analysis is reasonable and documented, and the Company's proposal for tariff administration is also reasonable.

⁸ BHE Response to Data Request PA-244 (Exhibit HS-10).

⁹ BHE Response to Data Request PA-277 (Exhibit HS-11).

¹⁰ BHE Response to Data Request PA-278 (Exhibit HS-12).

¹¹ BHE Response to Data Request PA-242 (Exhibit HS-13).

¹² BHE Response to Data Request PA-171 (Exhibit HS-14).

¹³ BHE Response to Data Request PA-172 (Exhibit HS-15).

¹⁴ BHE Response to Data Request PA-177 (Exhibit HS-16).

¹⁵ BHE Response to Data Request PA-279 (Exhibit HS-17), PA-306 (Exhibit HS-18), PA-307 (Exhibit HS-19), PA-308 (Exhibit HS-20), PA-309 (Exhibit HS-21), PA-310 (Exhibit HS-22).

VII. CLASS COST OF SERVICE

Q. WHAT IS THE PURPOSE OF A CLASS COST OF SERVICE STUDY (CCOSS)?

A. A CCOSS provides a benchmark for evaluating the relative contributions of each service class. The methodologies commonly applied in a CCOSS are outlined in the 1989 *NARUC Gas Distribution Rate Design Manual*, the 1981 *NARUC Gas Rate Design*, and other authoritative references such as Bonbright's *Principles of Public Utility Rates*. While the CCOSS is a critical input for revenue allocation and rate design, it is only one of several factors considered in the decision-making process—not the sole determinant.

Q. PLEASE SUMMARIZE THE COMPANY'S PRESENTATION ON CLASS COST OF SERVICE.

A. The Company provided a CCOSS that also serves as a jurisdictional cost of service study.¹⁶ Various components, including rate base, depreciation, expenses, and taxes, are allocated across both jurisdictional customers (residential and commercial) and non-jurisdictional customers.¹⁷

Q. WHAT ARE THE RESULTS OF THE CCOSS?

A. The Company's CCOSS indicates that the jurisdictional classes—Residential, with a class rate of return of 3.55%, and Large Commercial Service, at 3.84%—are both below the Company's overall rate of return of 4.26%. In contrast, the Small Commercial Service class is earning a higher return at 8.37%.¹⁸ The Company alleges that its authorized rate of return should be 7.63%, which supports its request for a proposed revenue increase of

¹⁶ BHE Hyatt Direct at 3:22–4:1.

¹⁷ BHE Hyatt Direct at 16:10–14.

¹⁸ BHE Hyatt Direct at 21:9 (Table DNH-2).

1 approximately \$34.9 million.¹⁹ The CCOSS also indicates that the Residential and Large
2 Commercial Service classes would require a greater percentage increase in revenue than
3 the Small Commercial Service class to achieve the Company's requested rate of return.

4 **Q. ARE THE RESULTS OF THE COMPANY'S CCOSS REASONABLE?**

5 A. Yes. The CCOSS provided by the Company uses cost allocation methodologies that are
6 accepted in the industry and, in most cases, follow prior practice in prior cases. However,
7 should the final revenue requirement adjustments reflect significant changes in line items,
8 I recommend that the CCOSS be updated before a final revenue allocation and rates are
9 implemented.

10 **Q. SHOULD THE RESULTS OF THE COMPANY'S CCOSS BE RIGIDLY**
11 **FOLLOWED?**

12 A. No. A CCOSS serves as a guideline and starting point for revenue allocation. However, it
13 does not incorporate economic, social, or political inputs and considerations.

14 **VIII. REVENUE ALLOCATION**

15 **Q. WHAT IS THE PURPOSE OF REVENUE ALLOCATION?**

16 A. Once the overall revenue requirement for a utility is established, the change in revenue
17 requirements must be allocated among the various rate schedules and cost-of-service
18 classes, considering fairness, equity, social and political impacts, energy efficiency, rate
19 shock, and the Commission's prior directives.

20 **Q. WHAT REVENUE ALLOCATION DID THE COMPANY PROPOSE?**

¹⁹ BHE Hyatt Direct at 21:3–6.

1 A. As shown in Direct Exhibit DNH-5, the Company proposes to allocate its total proposed
2 revenue requirements of \$34.923 million as follows: \$30.133 million to the Residential
3 Class; no dollar increase to the Small Commercial Class; and \$4.789 million to the Large
4 Commercial Class.

5 **Q. WHAT ARE THE RATE IMPACTS OF THE COMPANY'S REVENUE**
6 **ALLOCATION?**

7 A. As shown Direct Exhibit EJF-12, the bill impacts for the average class usage are \$6.27 per
8 month for the Residential Class, \$6.29 per month for the Small Commercial Class, and
9 \$100.52 per month for the Large Commercial Class.

10 **Q. WHILE THE SMALL COMMERCIAL CLASS WAS ALLOCATED NO**
11 **INCREASE IN REVENUE, THE BILL IMPACT IS \$ 6.29 PER MONTH FOR**
12 **AVERAGE USAGE. HOW DOES THIS OCCUR?**

13 A. The average bill impact expected at the end of this case will be affected not only by any
14 increase granted but also by the interplay of the SSIR charge—projected by the Company
15 to decrease—and the change in the Customer Charge, both collected on a per-customer
16 basis, and the Company's proposed changes in the per-therm charge for the first tier of
17 usage along with a revised break point between tiers.

18 **Q. WHEN PROPOSING YOUR REVENUE ALLOCATION, WHAT REVENUE**
19 **REQUIREMENTS DID YOU UTILIZE?**

20 A. The revenue requirements recommended by the Public Advocate's witness Donna
21 Mullinax are different from the Company's as detailed in her testimony. Once she
22 established the recommended revenue requirement, a revenue allocation between the

1 residential and two commercial classes specific to those revenue requirements had to be
2 developed. Mrs. Mullinax's recommended revenue change is \$16,685,209.

3 **Q. HOW DID YOU PREPARE YOUR RECOMMENDED REVENUE**
4 **ALLOCATION?**

5 A. I prepared and evaluated multiple potential revenue allocations reflecting the lower level
6 of revenue requirements recommended by Mrs. Mullinax rather than the Company's
7 request. My revenue allocation scenarios used the CCOSS information provided by the
8 Company in its original filing. I modified the Company's models as needed to calculate
9 the class rate of returns and bill impacts to evaluate the scenarios.

10 **Q. WHAT REVENUE ALLOCATION DO YOU RECOMMEND?**

11 A. My proposed revenue allocation (Exhibit HS-2) is premised on approaching an equal rate
12 of return across the Residential, Small Commercial Service, and Large Commercial Service
13 jurisdictional rate classes. The Company's CCOSS indicates that the SCS class rate of
14 return {8.37%} is substantially above the overall rate of return, while the RES {3.55%} and
15 LCS {3.84%} classes are below the overall rate of return {4.26%}.²⁰ Ordinarily I would
16 recommend the principle that no class should receive a rate reduction while other classes
17 are subject to a rate increase. However, due to the complicated bill impact that I discussed
18 above, the expected time between rate cases, and the elevated position of the SCS class
19 return compared to the other classes, I recommend moving the Large Commercial Class to
20 the overall rate of return and allocating a revenue reduction to the Small Commercial
21 Service class. The magnitude of the SCS revenue reduction was developed such that the

²⁰ Direct Exhibit DNH-4 Table 1, Line 15

1 dollar impact for the average monthly bill for the Residential and Small Commercial
2 Service classes are approximately equal (\$1.80 and \$1.80 respectively). This result is
3 similar to the net result of the Company's revenue allocation where the increase in the
4 average monthly bill for the RES class was \$6.27 and the SCS class was \$6.29.²¹ My
5 recommended revenue allocation results in the Residential and the Small Commercial
6 Classes' class rate of return moving closer to the overall rate of return, thus making their
7 respective rates more cost based.

8 **IX. RATE DESIGN**

9 **Q. WHAT IS THE PURPOSE OF RATE DESIGN?**

10 A. Once revenue has been allocated across rate classes and schedules, the process advances
11 to the more detailed stage of rate design. Rate design involves the art of balancing multiple
12 factors, including class revenue allocation, prior rate levels and structures, bill impacts, and
13 economic, social, and political considerations. The goal is to create a class rate structure
14 that reflects these factors while remaining clear and understandable to customers.

15 **Q. WHAT GUIDELINES DO YOU USE FOR RATE DESIGN?**

16 When reasonable and possible, the rate structure and individual rate elements should
17 remain close to their present structure and values. In this case, with the bifurcation of the
18 present commercial class, the tail block has been proposed to be retained by the Company
19 for both classes (along with the Residential class). Due to the competitive concerns, I
20 support that practice. The rate impact (based upon the total bill) at various consumption
21 levels should be examined to determine whether the actual dollar increase is reasonable or

²¹ Direct Exhibit EJF-12 Page 3, Line 61

1 manageable. For example, a net increase of a few dollars would be reasonable at almost
2 any level of consumption. A large dollar increase might also be reasonable if the percentage
3 increase at that specific level of consumption was limited.

4 **Q. DO YOU PROPOSE TO USE THE CONCEPTUAL RATE DESIGN**
5 **RECOMMENDED BY THE COMPANY FOR YOUR RECOMMENDED RATE**
6 **DESIGN?**

7 A. In some respects, yes. The Company's rate design reflects several sound principles,
8 including bill impact, stability, and consistency. The Company also considers competitive
9 pressures from public power entities in the space heating market.

10 **Q. DO YOU HAVE ANY CONCERNS ABOUT THE COMPANY'S PROPOSED**
11 **RATE DESIGN?**

12 A. Yes. While the Company has focused on competition for heating market and bill impacts,
13 I am also concerned about the impact of rate design on small usage customers. These
14 customers would not have gas space heating equipment but may have some combination
15 of year-round usage, such as gas water heating, cooking, and clothes drying. While these
16 customers may have lower bills, they contribute to the support of the Company's costs. As
17 the Customer Charge increases, these customers are at risk of leaving the system by
18 switching to electric alternatives. This would eliminate their contribution toward fixed
19 costs and, in the longer term, raise rates for the remaining customers. For this reason, I
20 examined the total bill rate impact at low consumption levels.

1 **Q. IF THESE LOW-USE CUSTOMERS DECIDED TO CONVERT THOSE**
2 **APPLIANCES TO ELECTRIC, HOW WOULD THAT IMPACT OTHER**
3 **CUSTOMERS?**

4 A. When a customer leaves the system, a utility, over a short term, can adjust its supply
5 purchases. Over the medium term, a utility may be able to adjust its customer service
6 staffing. However, the service line to the customer home will be unused, and it may not be
7 cost effective to remove the meter and regulator; thus, these assets will still exist but not
8 generate revenue. The mains serving these customers will have excess capacity unless load
9 grows. Over time, the remaining customers will have to support some of these partially
10 used assets and other fixed costs through rates that would be lower if more customers had
11 remained connected.

12 **Q. WHAT IS THE RISK OF LOW-USE CUSTOMERS LEAVING THE SYSTEM?**

13 A. To estimate this risk, knowing which customers have which specific appliances would be
14 helpful. The Company does not perform appliance saturation studies, which would assist
15 in estimating the appliances low-usage customers are using.²² Conversely, the number of
16 residential customers has increased over the past five years.²³

17 **Q. WHAT DO YOU RECOMMEND TO ADDRESS THIS POTENTIAL CUSTOMER**
18 **ATTRITION PROBLEM?**

19 A. Leveraged by the Public Advocate's witness Mrs. Mullinax's lower (than the Company's)
20 recommended revenue requirements, I recommend a Residential Service rate design with
21 a lower Customer Charge than might have been suggested absent this risk and than the

²² BHE Response to PA-127 (Exhibit HS-23).

²³ BHE Response to PA-28 (Exhibit HS-24).

1 Company has proposed. I reduced the Company's proposed \$31.00 Customer Charge to
2 \$26.30 and slightly reduced the Tier 1 Distribution Charge to achieve my recommended
3 revenue allocation and average bill impact.

4 **Q. YOU ARE PROPOSING TO INCREASE THE RESIDENTIAL CUSTOMER**
5 **CHARGE FROM \$15.45 TO \$26.30, YET THE NET EFFECT IS \$1.80 FOR THE**
6 **AVERAGE RESIDENTIAL CUSTOMER. HOW DOES THAT HAPPEN?**

7 A. As shown on Exhibit HS-4 there are many changes taking place within the Residential
8 Service rate schedule that offset most of the increase in the Customer Charge. Revenue
9 collected by the present \$5.28 per month SSIR charge will be collected within the new
10 Residential Service rate schedule and the SSIR charge will simultaneously be reduced to
11 \$0.69 per month for the remainder of 2025. The first 10 therms of monthly usage will be
12 reduced from \$0.50858 per therm to \$0.42135 per therm. The next 10 therms of usage will
13 be reduced from \$0.50858 per therm to \$0.15000 per therm. The net result for the average
14 Residential Service customer will be an increase of \$1.80 per month.

15 **Q. HOW DID YOU DEVELOP YOUR SUGGESTED RATE DESIGN?**

16 A. Based upon my proposed revenue allocation (Exhibit HS-2) (to meet the revenue
17 requirements recommended by the Public Advocate's witness Mrs. Mullinax), I considered
18 a range of rate designs with varying levels of Customer Charge, Tier 1 Distribution Charge,
19 and Tier 2 Distribution Charge that, in aggregate, develop the allocated class revenue. I
20 used a form of the Company's rate impact models to examine the rate impact on a customer
21 across a range of usage, including large commercial levels. I considered the competitive
22 concerns about the heating market expressed by the Company and the bill impact on low-

1 usage customers to finalize my rate design recommendation, which is shown on Exhibit
2 HS-3. The rate impacts for the suggested rate design are shown on Exhibit HS-4. More
3 detailed rate impact calculations were developed using a modified version of a Company
4 model and are provided (electronically only) as Exhibit HS-5 for Residential customers,
5 HS-6 for Small Commercial Service customers, and HS-7 for Large Commercial Service
6 customers.

7 **Q. WHAT DO YOU RECOMMEND FOR THE RATE DESIGN FOR THE SMALL**
8 **COMMERCIAL CLASS?**

9 A. The Company's proposed Small Commercial Service Tier 1 Distribution Charge is
10 substantially above the Residential Tier 1 Distribution Charge for somewhat similar
11 service. Therefore, I reduced the Company's proposed Small Commercial Service Tier 1
12 Distribution Charge to achieve my recommended revenue allocation and average bill
13 impact.

14 **Q. WHAT DO YOU RECOMMEND FOR THE RATE DESIGN FOR THE LARGE**
15 **COMMERCIAL CLASS?**

16 A. The Company's proposed Large Commercial Service Tier 1 Distribution Charge is
17 substantially lower than the Small Commercial Service Tier 1 Distribution Charge.
18 Therefore I reduced the Company's proposed Large Commercial Service Tier 1
19 Distribution Charge and reduced the Customer Charge to achieve my recommended
20 revenue allocation.

1 **Q. DID YOU REVIEW THE COMPANY'S CONCERNS ABOUT COMPETING**
2 **WITH PUBLIC POWER ELECTRIC UTILITIES FOR THE SPACE HEATING**
3 **MARKET?**

4 A. The Company is not requesting an increase in the Tier 2 Distribution Charge—due in part
5 to concerns about competition from electric utilities seeking to attract space heating, water
6 heating, and other loads.²⁴ The Company provided rate information for Lincoln Electric
7 System, Nebraska Public Power District, and Omaha Public Power District.²⁵

8 The Company's prior case included a witness focused on competition, and while
9 the Company has not updated that competitive analysis,²⁶ the electric utilities have had
10 various changes in their rates, which would appear to have not changed the competitive
11 nature of space heating. Based on my review and the proposed use of the Tier 2 Distribution
12 Charge in the Company-requested Weather Normalization Adjustment rider (should it be
13 approved),²⁷ I do not oppose the Company's request to keep the Tier 2 Distribution Charge
14 at its present level.²⁸

15 **Q. HOW DOES YOUR PROPOSED RATE DESIGN AFFECT REVENUE**
16 **STABILITY?**

17 A. On an overall basis, 65.4% of the Company's revenue would be considered fixed,
18 compared to 54.7% under present rates. This compares to 68.1% under the Company's
19 proposal.²⁹

²⁹ Direct Exhibit EFJ-11Page 3, Line 70

X. WEATHER NORMALIZATION ADJUSTMENT

Q. WHAT IS A WEATHER NORMALIZATION ADJUSTMENT?

A. Unlike a Weather Normalization Adjustment Rider, a weather normalization adjustment is a one-time adjustment to Test Year revenues to adjust sales and resulting revenues to normal weather conditions.

Q. DID THE COMPANY MAKE A WEATHER NORMALIZATION ADJUSTMENT?

A. The Company proposed a weather normalization adjustment of \$3,304,212,³⁰ which increases Test Year revenues due to weather that was warmer than normal during the period.

Q. DO YOU RECOMMEND THE ADOPTION OF THE COMPANY'S WEATHER NORMALIZATION ADJUSTMENT?

A. Yes. Blue Ridge reviewed the Company's methodology, including the use of a ten-year period to develop normal weather, and based upon that review, I recommend the adoption of a weather normalization revenue adjustment. A weather normalization adjustment has been included within the Public Advocate's witness Mrs. Mullinax's recommended revenue requirements.

XI. WEATHER NORMALIZATION ADJUSTMENT RIDER

Q. WHAT IS A REVENUE ADJUSTMENT MECHANISM?

³⁰ BHE Direct Exhibit SKJ-2 – Revenue Requirements Study, Schedule I-5.

1 A. A revenue adjustment mechanism may be implemented to maintain a utility's revenue
2 stream after rates are put into effect and before the next rate case is completed. A revenue
3 adjustment mechanism could correct for a differential (compared to normal conditions) in
4 revenue due to economic activity, weather that is either above or below normal, or even
5 sales that do not meet a forecast, such as in a performance-based ratemaking scheme.

6 **Q. WHAT BENEFITS ACCRUE TO THE UTILITY FROM A REVENUE**
7 **ADJUSTMENT MECHANISM?**

8 A. A revenue adjustment mechanism adjusts sales or revenue to meet a pre-agreed forecast or
9 setpoint of sales or revenue. If sales or revenue are below the pre-agreed point, the utility
10 can make an accounting adjustment to its revenues for collection from customers over some
11 future period. Often this adjustment is made monthly (as the utility's books are closed each
12 month) offering timely adjustments to revenue. This accounting adjustment effectively
13 cushions the impact of a sales or revenue shortfall and helps the utility earn its allowed rate
14 of return. Conversely, if sales or revenue are above the pre-agreed point, the utility will
15 make an adjustment that reduces its revenue, which will be returned to customers over
16 some future period.

17 **Q. WHAT BENEFITS ACCRUE TO CUSTOMERS FROM A REVENUE**
18 **ADJUSTMENT MECHANISM?**

19 A. A revenue adjustment mechanism adjusts sales or revenue to meet a pre-agreed forecast or
20 setpoint of sales or revenue. If sales or revenue are above the pre-agreed point the utility
21 will be obligated to return the excess revenue over some future period. This effectively
22 reduces costs to customers in a future period. Conversely, if sales or revenue are below the

1 pre-agreed point, then the customers will have to provide that revenue to the utility over
2 some future period. This effectively raises costs to customers in a future period. While the
3 utility has almost “instant gratification” with monthly revenue adjustments to its revenue
4 or sales, customers often have a lag between when they pay their bill and when the revenue
5 adjustment takes effect for a customer.

6 **Q. WHAT CONCERNS ARE CREATED BY A REVENUE ADJUSTMENT**
7 **MECHANISM?**

8 A. The construction of a revenue adjustment mechanism can create errors of estimation, errors
9 of approximation and mismatches, which can shift costs between the utility and its
10 customers and/or between customers.

11 **Q. DOES A WEATHER NORMALIZATION ADJUSTMENT REDUCE THOSE**
12 **CONCERNS?**

13 A. To some extent a weather normalization adjustment reduces concerns because only the
14 normal weather and the impact on sales of deviations from normal weather need to be
15 determined. There is no need to forecast the number of customers or total sales in the future
16 period. While the establishment of normal weather is a statistical process subject to some
17 examination and debate, it is somewhat more settled as compared to sales forecasting. The
18 development of the impact on sales due to deviations from normal weather can also be a
19 statistical process subject to examination. These processes become less precise as time
20 passes between rate cases as the usage per customer or appliance mix (including efficiency
21 effects) will change and these effects should not be compensated within a weather
22 adjustment. The manipulation of large volumes of data—including the number of

1 customers for any specific weather location, the number of customers within any rate class,
2 the effects of meter reading or billing errors, variations in meter reading cycles, and other
3 factors—can all affect the accuracy and reliability of a weather normalization adjustment
4 or a revenue adjustment mechanism. In one instance, a utility was required to have each
5 monthly filing certified by a corporate executive due to problems with its monthly filings.³¹

6 **Q. CAN LATE DISCOVERED ERRORS IN A REVENUE ADJUSTMENT**
7 **MECHANISM CREATE IMBALANCES BETWEEN THE UTILITY AND ITS**
8 **CUSTOMERS?**

9 A. Yes. If errors in data are not detected in a timely manner, they can contribute to imbalance
10 within the adjustment mechanism. This concern is not merely theoretical—such
11 accumulations have occurred in practice and can be significant.³²

12 **Q. HAVE YOU REVIEWED THE COMPANY’S PROPOSAL FOR A WEATHER**
13 **NORMALIZATION ADJUSTMENT RIDER?**

14 A. Yes. I have reviewed the Company’s proposal.

15 **Q. WHAT DID YOU IDENTIFY AS POSITIVE ASPECTS OF THE COMPANY’S**
16 **PROPOSAL?**

17 A. The Company’s proposal is a weather normalization mechanism, not a sales or revenue
18 mechanism. The proposal relies on the same weather data sources the Company used for
19 its Test Year weather normalization adjustment. The proposed mechanism is designed to

³¹ District of Columbia Public Service Commission Order No. 19433, paragraph 48.

³² District of Columbia Public Service Commission Order No. 20755, paragraphs 422, 423, 424 and 431.

1 reconcile on an annual basis,³³ which helps avoid monthly rate fluctuations and potential
2 customer confusion. Revenue adjustments will be priced at the Tier 2 Distribution Charge,
3 which—under the Company’s proposed rate design—would be the same across all rate
4 classes³⁴ at this time. This uniform pricing helps avoid issues arising from differing weather
5 responses among customer classes when customers move between rate classes.

6 **Q. WHAT DID YOU IDENTIFY AS NEGATIVE ASPECTS OF THE COMPANY’S**
7 **PROPOSAL?**

8 A. I have a number of concerns about the Company’s proposed Weather Normalization
9 Adjustment Rider.

- 10 • The prevailing trend in weather as portrayed by the Company demonstrates that
11 its proposal will create a revenue increase mechanism due to increasing
12 temperature even if weather patterns are normal.³⁵
- 13 • The Company has not explored the need for or the impact of weather insurance.³⁶
- 14 • The proposal lumps together three rate classes with differing response to weather
15 but collects any shortfall (or returns any excess) on a per therm basis.³⁷
- 16 • The annual reconciliation period dampens the effect of the rider, but it delays
17 “payback” of excess revenue until the following year (and conversely delays the
18 impact on the customer from a shortfall due to warm weather).

³³ BHE Hyatt Direct at 59:3–4.

³⁴ BHE Hyatt Direct at 59:9–11.

³⁵ BHE Hyatt Direct at 54:4 (Figure DNH-8).

³⁶ BHE Response to Data Request PA-173 (Exhibit HS-26).

³⁷ BHE Responses to Data Requests PA-176 (Exhibit HS-27), PA-186 (Exhibit HS-28), and PA-190 (Exhibit HS-29).

- 1 • The annual reconciliation period creates an intergenerational mismatch where
2 departing customers are not responsible for their share of the Weather
3 Normalization Adjustment Rider costs, and new customers are charged for
4 Weather Normalization Adjustment Rider costs they did not incur.
- 5 • While the revenue shortfall (or overage) will be calculated every month, the
6 Company's proposal does not report that information to the Commission until the
7 end of the annual period. This increases the time pressure to review the annual
8 filing.³⁸
- 9 • The annual Weather Normalization Adjustment Rider should be reviewed and
10 audited, thus increasing costs to the Commission.

11 **Q. WHAT WOULD THE IMPACT OF THE COMPANY'S PROPOSED WEATHER**
12 **NORMALIZATION ADJUSTMENT RIDER HAVE BEEN IN PRIOR YEARS?**

13 A. This impact is shown in the Company's response to PA-184 (Exhibit HS-31) which
14 provides "example calculations for the most recent three-year period using actual therms
15 and customer counts." This table reveals the respective per-therm charge and annual costs
16 based on average class usage:

³⁸ BHE Response to Data Request PA-192 (Exhibit HS-30).

1

Year Ending	6/2022	6/2023	6/2024
Adjusted Excess/(Deficiency)	\$2,443,252	\$(1,343,021)	\$(4,237,508)
WNA Factor per Therm	\$0.00848	\$(0.00430)	\$(0.01535)
Annual Impact per Customer			
Residential (648 Therms)	\$(5.48)	\$2.79	\$9.95
Small Commercial (1,420 Therms)	\$(12.01)	\$6.11	\$21.80
Large Commercial (18,195 Therms)	\$(153.68)	\$78.11	\$278.83

2 **Q. HOW DOES FIGURE DNH-8 IN COMPANY WITNESS DOUGLAS HYATT’S**
3 **TESTIMONY DEMONSTRATE THAT THE WEATHER NORMALIZATION**
4 **ADJUSTMENT RIDER IS BIASED IN FAVOR OF THE COMPANY?**

5 The dotted line in Figure DNH-8 represents the downward trend in normal weather over
6 the last 30 years at Lincoln Airport, which is the weather station with the largest number
7 of customers used in the proposed Weather Normalization Adjustment Rider. Mr. Fritel
8 confirms that the Company uses a ten-year period ending December 31, 2024,³⁹ to develop
9 normal weather, and therefore, “normal” weather for this case will be a period with a
10 midpoint of December 31, 2019. In its response to PA-184 (Exhibit HS-31), the Company
11 used the same normal weather data for Lincoln Airport (5,587.6 HDD) in each of the three
12 consecutive annual example calculations, despite those years being different. The
13 Company’s proposed Weather Normalization Adjustment Rider will use actual weather
14 from future periods, such as 2026, to adjust revenue against “normal” weather from the

³⁹ BHE Fritel Direct at 10:4–5.

1 ten-year period, ending December 31, 2024. Therefore, the Weather Normalization
2 Adjustment Rider will have a minimum five-year bias, which will grow over time as
3 additional years pass following the resolution of this case. If we assume that normal
4 weather occurs in any future year, it will be compared not to the expected trend in Figure
5 DNH-8 *for that future year* but the midpoint of the (ten-year period ending December 31,
6 2024.

7 Using the information provided by the Company,⁴⁰ I extended the trend line for
8 2025 through 2030 in Exhibit HS-8. The difference in trended normal weather in 2026
9 [5530.4] compared to the average of the past ten “normal” years [5587.5] is 1%. Thus, if
10 the weather in 2026 is “normal” for 2026, the Company will be able to “surcharge”
11 customers for the 1% difference even though the weather was “normal.” If the 2026
12 weather is warmer than normal the impact on customers is magnified and the collection
13 will be even higher. The magnitude of the surcharge will grow each year as normal weather
14 trends downward and the ten-year period, ending December 31, 2024, does not change. By
15 2030, the surcharge will grow to 2.69%.

16 **Q. WHAT IS YOUR RECOMEMNDATION FOR THE WEATHER**
17 **NORMALIZATION ADJUSTMENT RIDER?**

18 A. Based upon the balance of the positive and negative impacts, the unsupported need for the
19 Weather Normalization Adjustment Rider, the need for review of a new rider, and the
20 inherent bias based on weather trends, I oppose the imposition of the Company’s proposed
21 Weather Normalization Adjustment Rider on customers.

⁴⁰ BHE Response to Data Request PA-259 and Attachment (Exhibit HS-32).

XII. HEAT INCENTIVE PROGRAM COSTS

Q. WHAT CHANGE IS THE COMPANY PROPOSING FOR THE HEAT INCENTIVE PROGRAM?

A. The Company is proposing “third-party administrative costs be included within the annual spending cap.”⁴¹

Q. WHAT IS THE MAGNITUDE OF THE ADMINISTRATIVE COSTS THAT THE COMPANY IS REQUESTING FOR INCLUSION?

A. The costs include Marketing Costs and A-Tec Costs shown on Company witness Tatyana Bannan’s Table TVB-3 and have been in the range of \$85,000 to \$105,000. The Company has indicated that it has obtained a commitment from its external rebate processor, A-Tec, to cap annual costs at \$110,000 through 2027.⁴²

Q. WHY WERE ADMINISTRATIVE COSTS FOR THE HEAT INCENTIVE PROGRAM NOT INCLUDED TO DATE?

A. The Company indicated that the HEAT program parameters were developed during a settlement negotiation in Commission Application No. NG-0036.⁴³

Q. WHAT IS YOUR RECOMMENDATION FOR THE ADMINISTRATION COSTS OF THE HEAT INCENTIVE PROGRAM?

A. The Company has arranged for a cap of \$110,000 from its rebate processor.⁴⁴ The HEAT Incentive Program is a longstanding program approved by the Commission, and it is

⁴¹ BHE Bannan Direct at 14:16–17.

⁴² BHE Bannan Direct at 17:14–16.

⁴³ BHE Bannan Direct at 14:20–21.

⁴⁴ BHE Bannan Direct at 17:16–17.

1 appropriate that the costs of the program, both direct rebates and administration, should be
2 recovered up to the Commission approved \$1,000,000 cap. However, should the
3 combination of rebates and administrative costs exceed the \$1,000,000 cap in any program
4 year, the Company's recovery should be limited to the cap. Therefore, I recommend that
5 the HEAT Incentive Program administrative costs be included in the program costs subject
6 to the program cap.

7 **XIII. TARIFF CHANGES**

8 **Q. WHAT CHANGES IS THE COMPANY PROPOSING TO ITS TARIFF?**

9 **A.** The Company is proposing several tariff changes:

- 10 • Bifurcate the Commercial Class into a Small Commercial Class and a Large
11 Commercial Class.⁴⁵
- 12 • Remove the Line Locates Surcharge for customers within the City of Lincoln.
- 13 • Raise the costs of various services that apply to customers which request or
14 invoke the need of the service. These services are commonly called Miscellaneous
15 Charges. The charges include those on this list:
 - 16 ○ Connection and Reconnection Charge during normal working hours—The
17 Company is proposing to increase this charge from \$40.00 to \$55.00.⁴⁶
 - 18 ○ Connection and Reconnection Charge outside normal working hours—
19 The Company is proposing to increase this charge from \$80.00 to
20 \$155.00.⁴⁷

⁴⁵ BHE Bannon Direct Exhibit TVB-3, Current Sheet 7, 84, 85.

⁴⁶ BHE Bannon Direct Exhibit TVB-3 Current Sheet 135.

⁴⁷ BHE Bannon Direct Exhibit TVB-3 Current Sheet 135.

- Meter Test Charge—The Company is proposing to increase this charge from \$40.00 to \$55.00.⁴⁸
- Late Payment Charge—The Company is proposing to increase this charge from 1% per month to 1.5% per month.⁴⁹
- Diversion Charge—The Company is proposing to no longer charge for listed materials.⁵⁰
- Annual Agriculture Infrastructure Repair Charge—The Company is proposing a new annual charge for maintenance and repairs to agriculture meters in Rate Area Five.⁵¹
- Timing Of Disconnection—The Company is clarifying the wording relating to when disconnections will not be conducted.⁵²

Q. DO YOU SUPPORT THE COMPANY’S PROPOSED CHANGES TO THE TARIFF RELATED TO THE BIFURCATION OF THE COMMERCIAL CLASS?

A. This tariff change would recognize the proposed bifurcation of the commercial class into Small Commercial Service and Large Commercial Service. As previously examined above, the Company’s proposal for the tariff change is reasonable as it supports the bifurcation of the commercial class, which I support.

⁴⁸ BHE Bannon Direct Exhibit TVB-3 Current Sheet 135.

⁴⁹ BHE Bannon Direct Exhibit TVB-3 Current Sheet 80, 82, 85, 87, 135.

⁵⁰ BHE Bannon Direct Exhibit TVB-3 Current Sheet 135.1.

⁵¹ BHE Bannon Direct Exhibit TVB-3 Current Sheet 6, 111.

⁵² BHE Bannon Direct Exhibit TVB-3 Current Sheet 51.

1 **Q. DO YOU SUPPORT THE COMPANY'S PROPOSED CHANGES TO THE**
2 **TARIFF TO REMOVE THE LINE LOCATES SURCHARGE FOR CUSTOMERS**
3 **WITHIN THE CITY OF LINCOLN?**

4 A. This tariff change would remove the Line Locates Surcharge within the City of Lincoln as
5 the major construction effort there has been completed.⁵³ I support the removal of this
6 surcharge.

7 **Q. DO YOU SUPPORT THE INCREASE IN MISCELLANEOUS CHARGES?**

8 A. I made several data requests related to the Company's proposal to determine the impact on
9 various stakeholders:

- 10 • PA-258 (Exhibit HS-33) Requested the Company to provide the billing
11 determinants for the Miscellaneous Charges. The Company provided the requested
12 information.
- 13 • PA-250 (Exhibit HS-34) Requested the supporting cost information for the changes
14 to the Connection and Reconnection Charges. The Company's response was
15 confidential. Blue Ridge reviewed the response, and the increased revenue is
16 included with Blue Ridge's recommended revenue requirements.
- 17 • PA-253 (Exhibit HS-35) Requested the supporting cost information for the changes
18 to the Meter Test Charge. The Company's response was confidential. Blue Ridge
19 reviewed the response, and the increased revenue is included with Blue Ridge's
20 recommended revenue requirements.

⁵³ BHE Bannan Direct at 21:11–12.

- PA-256 (Exhibit HS-36) Requested the supporting cost information for the changes to the Late Payment Charge. The Company's affiliates have various Late Payment Charges varying from 1% to 2%. Blue Ridge reviewed the Company's response, and the increased revenue is included with Blue Ridge's recommended revenue requirements.

Based upon Blue Ridge's review and the inclusion of the incremental revenue, I support these tariff changes, subject to my proposal for disconnection timing detailed below.

**Q. DO YOU SUPPORT THE CHANGE IN THE APPLICATION OF THE
DIVERSION CHARGES?**

I issued data request PA-257 (Exhibit HS-37) related to the Company's proposal to determine the impact on various stakeholders. PA-257 requested the Company to explain why it planned to no longer charge for listed materials as part of the Diversion Charge. The Company responded: "The Company clarifies that it has not discontinued the collection of the materials portion of the Diversion Fees. The Company will continue to recover these costs as applicable to each specific incident. However, due to the variability in material requirements based on the nature and scope of each diversion event, the Company has elected to remove the itemized listing of material charges from Tariff Sheet No. 135.1."

Due to the variable means by which gas may be diverted and the changes or damage inflicted by the person doing the diversion, the Company's proposal is reasonable, and I support this tariff change.

1 **Q. DO YOU SUPPORT THE COMPANY'S PROPOSED CHANGES TO THE**
2 **TARIFF RELATED TO THE TIMING OF DISCONNECTION (FIRST REVISED**
3 **TARIFF SHEET NO. 51)?**

4 A. While I do not oppose the wording change provided by the Company, I strongly
5 recommend that no residential disconnections take place on the day before a non-working
6 Company day. I am concerned that a customer could be disconnected, for example on a
7 Friday, and when that customer is able to raise the needed funds that the reconnection of
8 that customer cannot be performed the next day during normal working hours. If
9 disconnection will be performed such that the reconnection charge will be for non-working
10 hours, I do not support the requested increase in the non-working hours reconnection
11 charge.

12 **XIV. TRANSFER OF WESTERN, NE FROM RATE AREA 5 TO RATE AREA 3**

13 **Q. WHAT CHANGES IS THE COMPANY PROPOSING FOR ITS CUSTOMERS IN**
14 **THE TOWN OF WESTERN, NEBRASKA?**

15 A. The Company is proposing to move the town of Western, Nebraska, from Base Rate Area
16 5 to Base Rate Area 3.⁵⁴ The Company serves 111 premises (14 small commercial and 97
17 residential). All the customers currently participate in the Choice Gas program in Rate Area
18 5.⁵⁵

19 **Q. WHY IS THE COMPANY PROPOSING TO RECLASSIFY THE TOWN OF**
20 **WESTERN, NEBRASKA, FROM RATE AREA 5 TO RATE AREA 3?**

⁵⁴ BHE Bannan Direct Exhibit TVB-3 Current Sheet 20,22,27.

⁵⁵ BHE Bannan Direct at 23:19–24:15.

1 A. The Company states “The town of Western, Nebraska, is unique in Base Area 5 as the only
2 community served downstream of Northern Natural Gas Company (NNG).” The Company
3 notes that this requires a separate firm transportation agreement on NNG and
4 administration to allocate and release quantities to each respective Choice Gas Supplier.
5 By moving Western, Nebraska to Rate Area 3, the town would join similar situated
6 communities in Base Area 3 served on NNG and consolidate agreements and streamline
7 supply.⁵⁶

8 **Q. WHAT DID YOU EXPLORE IN RELATION TO THE PROPOSED**
9 **RECLASSIFICATION OF WESTERN, NEBRASKA?**

10 A. I made several data requests related to the Company’s proposal to determine the impact on
11 various stakeholders:

- 12 • PA-245 (Exhibit HS-38) Requested the correspondence sent or expected to be sent
13 to the 97 residential customers in Western, Nebraska, to determine whether those
14 specific customers were informed about the change and were notified, they could
15 object to the change. The Company’s response does not indicate that the 97
16 customers have been formally notified that their opportunity to purchase gas from
17 a supplier of their choice will be discontinued.
- 18 • PA-246 (Exhibit HS-39) Requested the correspondence sent or expected to be sent
19 to the 14 small commercial customers in Western, Nebraska, to determine whether
20 those specific customers were informed about the change and were notified they
21 could object to the change. The Company’s response does not indicate that the 14

⁵⁶ BHE Bannan Direct at 23:19–24:15.

1 small commercial customers have been formally notified that their opportunity to
2 purchase gas from a supplier of their choice will be discontinued.

- 3 • PA-247 (Exhibit HS-40) Requested the correspondence sent or expected to be sent
4 to the participating Choice Gas suppliers serving customers in Western, Nebraska,
5 to determine whether the suppliers were informed about the change and were
6 notified they could object to the change. The Company's response does not indicate
7 that participating Choice Gas suppliers have been formally notified that their
8 opportunity to sell gas to the 111 customers in Western, Nebraska, will be
9 discontinued.

- 10 • PA-248 (Exhibit HS-41) Requested the expected bill impact for the 97 residential
11 and 14 small commercial customers in Western, Nebraska. The Company's
12 response noted the average commodity rate across this customer group is \$0.85527
13 compared to the Gas Cost Adjustment (GCA) as of June 1, 2025. of \$0.60280, thus
14 indicating that based on that information there would not be an immediate negative
15 impact.

- 16 • PA-249 (Exhibit HS-42) Requested an estimate of the annual operational savings
17 because of the reclassification of the 111 customers in Western, Nebraska. The
18 Company's response indicates that there is a modest saving (not listed here as the
19 response is confidential).

20 **Q. BASED UPON THE COMPANY'S RESPONSES, DO YOU RECOMMEND THE**
21 **COMPANY BE PERMITTED TO RECLASSIFY THE TOWN OF WESTERN,**
22 **NEBRASKA, FROM RATE AREA 5 TO RATE AREA 3?**

1 A. Yes. There are modest savings, a reasonable narrative of why the classification has an
2 impact on operations, and the customer impact may be small or positive at this time. If the
3 *affected customers are individually provided with a timely notice* (at least 30 days before
4 the close of the record in this proceeding) of the proposed change, which allows those
5 customers and their suppliers to provide their input to the Commission, I recommend that
6 the reclassification of Western, Nebraska, be permitted. The savings amount has been
7 included in Blue Ridge's recommended revenue requirement.

8 **XV. CONCLUSION**

9 **Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS**

10 A. I recommend that the bifurcation of the Commercial class be approved. I recommend that
11 the revenue requirement proposed by the Public Advocate's witness Mrs. Mullinax be
12 allocated according to Exhibit HS-2 and include the rate elements in Exhibit HS-3. I do not
13 recommend the approval of the Weather Normalization Adjustment Rider due to its
14 inherent bias and lack of support. I recommend the adoption of various tariff changes
15 although the increased non-working hours reconnection charge should be approved only if
16 the period for disconnection is adjusted. Assuming specific and timely notice is provided
17 to the customers and suppliers in Western, Nebraska, I recommend the reclassification
18 from Rate Area 5 to Rate Area 3.

19 **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

20 A. Yes.

Experience of Howard Solganick

Howard Solganick has been actively engaged in the utility industry for 50 years. His experience spans consulting engagements, business development, and significant utility operating positions. As a Principal at Energy Tactics & Services, Inc., he is responsible for business development, engagement management, and execution. He has led and/or participated in consulting projects to develop, design, optimize and implement both traditional utility operations and e-commerce businesses such as energy retailing. Mr. Solganick has structured operating elements and business ventures; negotiated high value medium- and long-term contracts; and implemented business systems, operating functions, and profit centers. He has assisted new entrants to develop products and services for introduction to the utility and energy marketplace. He has also acted as an expert witness and arbitrator in several utility and regulatory areas and has extensive experience in regulatory relations.

Key Areas of Expertise

- Operating responsibility and expert testimony in utility planning and operations including rate design and cost of service, tariff administration, generation and power procurement, transmission, distribution and customer service operations, capacity and system planning, and regulatory issues
- Operational reviews and expert testimony for outage management, emergency restoration and planning, customer communications, material and support logistics, restoration effectiveness and associated costs
- Pre-audit counseling, management audit planning and implementation, and post audit tracking and regulatory relations
- Management consulting for utilities, energy trading and production companies, contact (call) center providers, financial institutions, manufacturers, software providers, and retailers
- Regulatory relations and management for high profile situations – transmission line siting and approvals, power plant siting and certificate of need processes, and potential mass outages
- Arbitration and mediation for high dollar value energy dispute resolution

Selected Professional Experience

Rates & Regulatory

As a consultant for a New England Public Utilities Commission, reviewed the emergency planning process of a major electric utility acted as a subject matter expert in the areas of communications (internal, external, call center, social media, governmental and regulatory affairs, major customers), logistics (lodging, materials and staging) and other areas.

As a consultant for an Eastern Public Utility Commission performed an operational audit of emergency restoration after both a major hurricane and a major winter storm that affected all (four) of the state's major investor-owned utilities. Covered corporate, internal and external communications; materials management and support services; planning and training; customer service; system operations and dispatch; and other operational areas.

As a consultant for a Southwestern electric utility impacted by a major hurricane that affected over 90% of the utility's customers, provided a reasonableness opinion covering the utility's emergency response plan and restoration operations, which was derived from a full operational audit.

As a consultant for a New England Public Utilities Commission, performed regulatory audits of an electric utility and a focused audit of a new customer service and billing installation. Covered system operations, engineering, capital budgeting, construction management, demand side management programs, marketing and community relations.

As a consultant for a Midwestern Public Utilities Commission, performed regulatory audits related to a filed rate case for three investor-owned gas utilities. Covered load and revenue forecasting, capital budgeting, and construction management.

Docket No. NG-124
Direct Exhibit HS-1

As a consultant for a Caribbean utility, examined the utility's performance and costs and provided expert testimony for a regulatory appeal of the costs and rate recovery involved under a performance based multi-year ratemaking environment.

As an electric utility's special projects manager, created the utility's process for responding to the state's first legislatively mandated management audit. Developed a series of processes to coordinate, track, document, and respond to sensitive issues on an expedited basis. Coordinated the pre-audit process throughout the utility.

For an electric utility, developed and justified the conversion of emergency operations from a decentralized to a centralized model that funded a company-wide digital communications system entirely from operating savings and efficiency.

For a major municipal gas utility, assisted senior and operating management to prepare for a mandated management audit. Provided interview training and other support.

As an operating manager for an Eastern utility, obtained regulatory approvals for a 230 kV transmission line and three major substations during a period of high public concern over EMF.

As a utility's operational planner, coordinated and had significant impact on load forecasting, demand side management, customer generation and its application to utility operations, utility owned and independent generation, transmission and distribution planning, and customer service performance levels. Consulted and provided expert testimony on these interrelated areas.

As a consultant to the Commissioners and Staff of an Eastern Public Service Commission, provided analysis and support covering cost of service, revenue allocation, rate design, the impact of a revenue decoupling mechanism, and considerations needed when equalizing rate of return between classes and other issues for an electric utility rate case (four times). Also provided similar services for a gas utility rate case and follow-up support during a phase two investigation of certain rate design and tracking account issues.

As a consultant to the Staff of the Public Service Commission of a Western state, provided analysis; rate case testimony; and settlement negotiation support covering cost of service, revenue allocation, rate design, the impact of a revenue decoupling mechanism, and considerations needed when equalizing rate of return between classes and other issues for three electric utilities.

As a consultant to the Staff of the Public Service Commission of an Eastern state, provided analysis; rate case testimony; and settlement negotiation support covering cost of service, revenue allocation, rate design, the impact of a revenue decoupling mechanism, and considerations needed when equalizing rate of return between classes and other issues for a gas utility.

As a consultant to the People's Counsel of an Eastern state, provided analysis; rate case testimony; and settlement negotiation support covering cost of service, miscellaneous revenue, the impact on risk of revenue normalization, and considerations needed when equalizing rate of return between classes and other issues for a gas utility.

As a consultant to the Office of Consumer Advocate of an Eastern state, provided analysis; rate case testimony; and settlement negotiation support covering cost of service, demand analysis, and considerations needed when equalizing rate of return between classes and other issues for a water utility.

As a consultant to the Public Advocate of a New England state, analyzed the economic impact and operational aspects of a cast iron gas main replacement program including the development of an economic model and participation in a technical conference proceeding.

As a consultant to a Midwestern City, provided analysis and rate case testimony covering cost of service for district heating service.

As a consultant to the Attorney General of a Midwestern state, provided analysis and testimony addressing the proposed sale of a utility-owned cogeneration facility and the long-term implications of the sale on customers.

As a consultant to the Attorney General of a Midwestern state, provided analysis and rate case testimony covering cost of service modeling as well as considerations needed when equalizing rate of return between classes and other issues.

Docket No. NG-124
Direct Exhibit HS-1

As a consultant to the Attorney General of a Midwestern state, provided support in a Commission ordered collaborative addressing cost of service modeling and filing requirements.

As regulatory manager for a New Jersey utility, was responsible for regulatory liaison and rate design for all customer classes including cost of service and tariff design. Provided expert testimony on rate design, load research, economic impacts, and all PURPA issues.

As a utility's project manager, led the filing of New Jersey's first Notice of Intent for a Certificate of Need for a combined cycle power plant. Working with the regulatory commission, the utility developed its filing as the Commission was simultaneously developing its procedures and processes.

Arbitration

As the sole arbitrator, presided over an issue of energy price escalation with a value of over \$1M annually. The arbitration included case management, discovery, depositions, extensive document exchange, six witnesses and a full briefing process. As defined in the parties' initial power purchase agreement, the arbitrator had to render a fully detailed decision for the parties to continue their business relationship for the eight years remaining under the agreement.

As chairman of a panel of three arbitrators, was instrumental in the parties resolving a landlord tenant dispute over electrical sub-metering. The amount in question exceeded \$750,000.

Operations and Customer Service

As a consultant for a Northwestern electric utility, performed an operational audit of the emergency restoration after a large windstorm that affected 70% of the utility's customers. Covered corporate, internal and external communications; materials management and support services; planning and training; customer service; service contract management; system operations and dispatch; and other operational areas.

As a consultant for a Midwestern electric utility, performed an operational audit of the emergency restoration after three large storms affected most of the utility's customers. Covered corporate, internal and external communications; materials management and support services; planning and training; customer service; service contract management; system operations and dispatch; and other operational areas.

As a lead consultant for an Eastern electric utility, supported a two-year effort to maintain and grow large, key commercial and industrial accounts. Allied responsibilities included the development of business models, negotiating positions, operations and support services for field forces, and regulatory support. This project resulted in the long-term retention of a significant majority of the client's top 20 customers for periods of from five to twelve years.

For a million+ customer North American public power company, managed (and acted as a subject matter expert) a call center performance review leading to a major consolidation of 28 sites into four physical call centers. A follow-on engagement developed the implementation plan covering emergency response issues, human resources, customer care, new infrastructure, and network integration.

On special assignment, structured and performed distribution operations analyses including an evaluation of emergency operating and response capabilities.

As an emergency assignment, acted as special liaison between system operations and customer communications to avert significant customer disruptions due to a potential system failure.

Business Planning and Implementation

For two utility clients, acted as project manager and subject matter expert on a joint client-consultant team comprised of 40 people. The engagement included customer management systems, contact (call) centers, new products and services, technology planning, and financial modeling of the venture. This project resulted in the creation of a new business entity for the energy industry, which included retail energy supply.

Docket No. NG-124
Direct Exhibit HS-1

For an energy conservation company, assisted the internal staff in defining their business model, implementing their Internet-based marketing and service delivery platform, defining the relationship with key allies, negotiating performance contracts, and performing design reviews as needed. Key issues included a timely implementation plan.

Vendor Services

For the export development agency of a European government, developed and presented a symposium on the North American utility industry and the means and methods to approach and succeed in the marketplace.

For a Pacific rim utility, developed and presented a symposium on the valuation and acquisition of North American generation assets and the means and methods to approach and succeed in the marketplace.

For a high-technology transmission and distribution equipment supplier, supported an effort to accelerate market acceptance of the product. Analyzed the technology, application and marketing approach. Results included an in-depth analysis of a key stumbling block inhibiting early entry into a key candidate utility.

For a major financial institution, acted as project manager and subject matter expert to refine and implement a new inclusive consumer billing medium for energy retailers. The engagement included the definition of the value chain, regulatory impacts, and the development of a marketing strategy as well as a marketing implementation plan.

For a major call center provider, acted as the liaison with energy retailers seeking to outsource their call and contact center function. Also established business models, performance standards, fulfillment arrangements, pricing, emergency operating response, and contractual arrangements.

Energy Supply

For four years, performed a process review and developed and executed a procurement process for electric supply in a deregulated environment for a residential real estate holding company.

For a commercial real estate management company, performed an evaluation of a distributed generation proposal including a site survey, cost benefit analysis, and detailed operational and contract review.

For an independent power producer, developed new projects and acquisitions, negotiated power purchase agreements, energy services agreements, fuel supply issues, site leases, and analyzed project financial positions. Successfully negotiated one of the first competitively bid power sales agreements with a public power entity and obtained the first IRS private letter ruling for a tax-exempt independent power financing.

As operating manager for a New Jersey utility, negotiated over 800 MW of power purchase agreements with an aggregate value of over \$9 billion, including developing significant dispatchability provisions. Obtained required regulatory approvals in record time.

As an operating manager for a utility, managed PJM Interconnection power purchase (interchange) pricing, performance testing of power plants, and contract management of the company's unregulated cogeneration contract with the DuPont Company.

Working in conjunction with a major energy producer and refiner, acted as project manager for a cogeneration facility study for a major refinery, which led to the construction of a 60 MW facility.

For a public power utility consortium, examined forward looking marketing and financial plans, confirmed direction with the Board of Directors, assisted senior management to revise its strategic and operational plans, and presented a recommendation for the future actions of the enterprise for consideration by the Board of Directors. Specific results included the revitalization of the existing management team, the Board of Directors' adoption of that team's strategic plan with a commitment to move forward, and the immediate authorization of bonuses for the management team for its efforts.

APPLICATION NO. NG-124
RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-243**

DATE OF REQUEST: June 20, 2025
DATE RESPONSE DUE: June 30, 2025
REQUESTOR: Public Advocate
WITNESS: Douglas Hyatt
DATE RESPONDED: June 27, 2025
SUBJECT: Rate Design

REQUEST:

PA-243. Rate Design. Please provide the commercial tariff breakpoints for each of the Company's affiliates. [Hyatt 39:19]

RESPONSE:

Black Hills Arkansas Gas, Inc.

- Small Business Sales Service: 0 to 50,000 Ccf
- Medium Business Sales Service: 50,001 to 300,000 Ccf
- Large Business Sales Service: 300,001 to 700,000 Ccf
- Large Business Demand Sales Service: 700,001 Ccf and above

Black Hills Colorado Gas, Inc.

- Small Commercial: 0 to 5,000 therms
- Large Commercial: 5,001 and above

Black Hills/Iowa Gas Utility Company, LLC

- General Service: normal requirement does not exceed 199 dth on a peak day
- Small Volume Firm: Maximum daily firm natural gas requirements exceed 24 dth per day but less than 200 dth per day
- Large Volume Firm: Maximum daily firm natural gas requirements exceed 200 dth per day

Black Hills/Kansas Gas Utility Company, LLC

- Small Commercial Service: annual consumption of natural gas less than or equal to 500 dth
- Small Volume Firm Service: annual consumption of natural gas greater than 500 dth, but less than 5,000 dth
- Large Volume Firm Service: annual consumption of natural gas greater than 5,000 dth

Black Hills Wyoming Gas, LLC

- Small General Service: annual gas consumption of 5,000 therms or less
- Medium General Service: annual gas consumption greater than 5,000 therms, but less than or equal to 30,000 therms
- Large General Service: annual gas consumption greater than 30,000 therms

RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-244**

DATE OF REQUEST: June 20, 2025
DATE RESPONSE DUE: June 30, 2025
REQUESTOR: Public Advocate
WITNESS: Douglas Hyatt
DATE RESPONDED: June 27, 2025
SUBJECT: Rate Design

REQUEST:

PA-244. Rate Design. Please provide any review, calculations, investigation that considered a breakpoint other than 5,000 therms for bifurcating the commercial class. [Hyatt 40:3]

RESPONSE:

As described on page 39-40 of Mr. Hyatt's Direct Testimony, 5,000 annual therms was used by the legacy BH Gas Distribution as the threshold between commercial customer classes prior to the last rate review. The legacy BH Gas Distribution rate design was the primary consideration for the proposed rate design with a threshold of 5,000 annual therms producing classes of customers with similar characteristics as shown in DNH WP-23 Commercial Billing Determinant Analysis.

SUBJECT: Rate Design

REQUEST:

PA-171. Rate Design: Please provide any review, calculations, investigation that estimates the cost comparison for water heating using the proposed BHE tail block rate and the expected electric rates from each of the electric utilities (LES, NPPD and OPPD) discussed in Doug Hyatt's testimony. The cost comparison should be from the customer perspective and provide estimated monthly or annual water heating operating costs for a high efficiency gas water heater and electric water heating. Provide all workpapers. [Hyatt 27:17]

RESPONSE:

No cost analysis was prepared to compare the Company's proposed rates with the electric utilities based upon the use of energy by natural gas water heaters to electric water heaters.

RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-177**

DATE OF REQUEST: June 4, 2025
DATE RESPONSE DUE: June 16, 2025
REQUESTOR: Public Advocate
WITNESS: Tatyana Bannan
DATE RESPONDED: June 13, 2025
SUBJECT: Rate Design

REQUEST:

PA-177. Rate Design: How and when each year will the Company classify each commercial customer into the Large Commercial or Small Commercial class? How often will the initial classification be reviewed? How will each commercial customer be notified of its classification? Has an appeal process been developed?

RESPONSE:

The Company classifies each commercial customer as either Small Commercial or Large Commercial at the time service is initiated. Pursuant to the provisions set forth in the proposed Tariff, specifically Third Revised Sheet No. 83 and Fourth Revised Sheet No. 85, the Company will review each customer's average annual usage level after each calendar year using a three-calendar year rolling usage history. The Company will re-assign the customer to the appropriate Rate Schedule effective with June billing of that year and notify customers via bill messages. For customers without three years of usage history, the review will be done using the best available data.

Finally, as described in the proposed Tariff Third Revised Sheet No. 83 and Fourth Revised Sheet No. 85, a customer may request at any time that the Company review whether or not the customer is assigned to the appropriate Rate Schedule.

**BLACK HILLS NEBRASKA GAS, LLC
NEBRASKA GAS RATE REVIEW
APPLICATION NO. NG-124
RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-279**

DATE OF REQUEST: July 1, 2025
DATE RESPONSE DUE: July 11, 2025
REQUESTOR: Public Advocate
WITNESS: Douglas Hyatt
DATE RESPONDED: July 11, 2025
SUBJECT: Rate Design

REQUEST:

PA-279. Rate Design: Please compare the expected full cost (assuming the Company's proposals are adopted) of the Small Commercial Service Rate proposed by the Company (including the present Gas Cost Recovery Charge and the expected SSIR charge) to the Large Commercial Service Rate proposed by the Company for usage from 0 therms per month through 4,000 therms per month. Provide the worksheet used with all formulas intact and the sources of all values delineated.

RESPONSE:

The Company utilized DNH WP-24— Residential, SCS, and LCS Bills to prepare the response to this data request. While in process, the Company noticed an incorrect formula in column P of tabs 'wp_SCS' and 'wp_LCS' of the original workpaper DNH WP-24. The attached file amends workpaper DNH WP-24 to correct the formula in column P of those two tabs. In addition to that revision, the SCS and LCS tabs have been expanded to be responsive to this request for usage through 4,000 therms per month, and the SSIR calculations on the SCS and LCS tabs reflect the proposed 2026 SSIR rates. The calculations utilize a Total Gas Cost Adjustment rate effective April 1, 2026. No changes have been made to the other two tabs in the file compared to the original DNH WP-24.

The changes to the SCS and LCS tabs are highlighted in orange and the tabs have been renamed to Amended_wp_SCS and Amended_wp_LCS. The amended workpaper is attached and will also be filed in the docket.

**BLACK HILLS NEBRASKA GAS, LLC
NEBRASKA GAS RATE REVIEW
APPLICATION NO. NG-124
RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-306**

DATE OF REQUEST: July 14, 2025
DATE RESPONSE DUE: July 24, 2025
REQUESTOR: Public Advocate
WITNESS: Douglas Hyatt
DATE RESPONDED: July 23, 2025
SUBJECT: Rate Design

REQUEST:

PA-306. Rate Design: Follow-up to PA-279 Please compare the proposed Monthly Charge in red shown as \$48.00 per meter on Fifth Revised Sheet No. 82 (the redlined tariff sheet) to the value in cell J2 on sheet Amended_wp_SCS of Attachment PA 12-279 – Amended DNH-WP-24 at \$47.00. Please explain the difference.

RESPONSE:

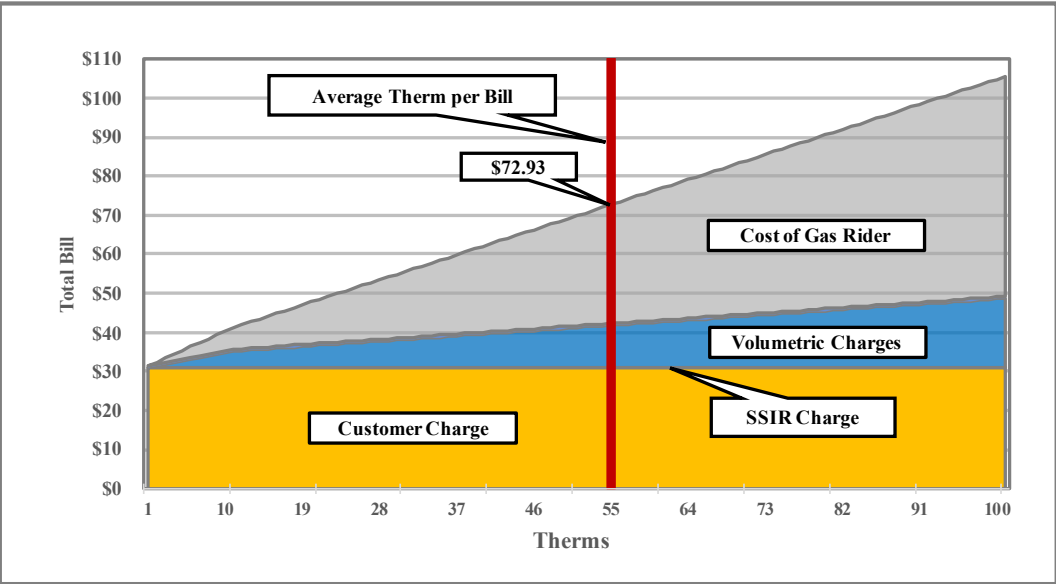

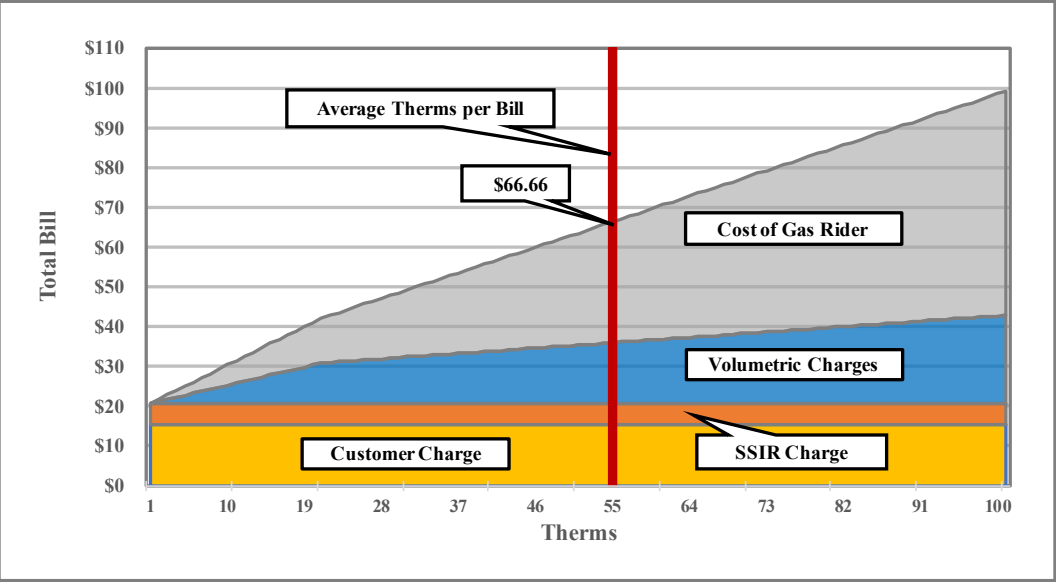

The rates for the proposed SCS and LCS rate schedules appearing in the work paper did not reflect the final rates of the filing. The workpaper has been revised and is being provided as Attachment PA 18-306 – Second Amended DNH WP-24. It will also be filed in the docket as Second Amended DNH WP-24 – Residential, SCS, and LCS Bills. The rates for the proposed SCS and LCS rate schedules are the same found in the tariff sheets. The bill impacts automatically recalculate based upon the values entered into these cells.

ATTACHMENT(S):

- Attachment PA 18-306 – Second Amended DNH WP-24

Residential

Comparison of current and proposed rates.

**BLACK HILLS NEBRASKA GAS, LLC
NEBRASKA GAS RATE REVIEW
APPLICATION NO. NG-124
RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-307**

DATE OF REQUEST: July 14, 2025
DATE RESPONSE DUE: July 24, 2025
REQUESTOR: Public Advocate
WITNESS: Douglas Hyatt
DATE RESPONDED: July 23, 2025
SUBJECT: Rate Design

REQUEST:

PA-307. Rate Design: Follow-up to PA-279 Please compare the proposed Delivery Charge in red shown as \$0.95940 per Therm on Fifth Revised Sheet No. 82 (the redlined tariff sheet) to the value in cell K2 on sheet Amended_wp_SCS of Attachment PA 12-279 – Amended DNH-WP-24 at \$0.91850. Please explain the difference.

RESPONSE:

Please see the response to PA-306.

REQUEST:

PA-127. Rate Design: Has the Company performed an Appliance Saturation Study or similar customer research in the last ten years? If so, please provide the study.

RESPONSE:

Company objects to this data request as it seeks information or documents that are not relevant to the subject matter of the proceeding and are not reasonably calculated to lead to the discovery of admissible evidence in this proceeding.

However, without waiving or limiting the objection, Company provides the following response:

No such studies were performed.

DATE RESPONDED: June 13, 2025
SUBJECT: WNA Rider

REQUEST:

PA-186. WNA Rider: If a customer moves from Large Commercial to Small Commercial (and the reverse direction) rate Schedules, how will that tariff change impact the calculation of the WNA Rider? Please provide those calculations. [Hyatt 59:20]

RESPONSE:

The proposed WNA Rider is based upon the difference in sales due to weather conditions. Since the customer classes have different heat sensitivity factors for each weather station, movement of customers between the proposed Small Commercial Service and Large Commercial Service classes would result in some changes to the final WNA Rider Rate. Since the 2nd tier rates for the proposed Small Commercial Service and Large Commercial Service classes are the same, movement between the two classes would only be impacted by the different heat sensitivity factors.

RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-250**

DATE OF REQUEST: June 20, 2025
DATE RESPONSE DUE: June 30, 2025
REQUESTOR: Public Advocate
WITNESS: Tatyana Bannan
DATE RESPONDED: June 27, 2025
SUBJECT: Miscellaneous Charges

REQUEST:

PA-250. Miscellaneous Charges. Please provide the supporting cost information including, but not limited to, direct and indirect labor, equipment costs, building costs, computers, overheads and/or loading that comprise the proposed charges of \$55.00 (\$155 after normal business hours) for Connections or Reconnections. Please detail which work classification(s) perform the expected work and the scope of that work (for example relighting pilots). [Bannan 22:7]

RESPONSE:

Connections, Reconnections and Meter Tests charges were calculated based on an average employee hourly wage performing those tasks and average miles driven per call. Please see Confidential Attachment PA 10-250a - Tariff Charges Calculations for additional details and work classifications that perform the expected work.

For the scope of the work on Connections and Reconnections, if the meter was pulled, the tech will install a meter and follow the turn-on procedures. For the turn-on procedures please see Confidential Attachment PA 10-250b – Operations & Maintenance Procedure No. 61, pages 18-20.

RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-253**

DATE OF REQUEST: June 20, 2025
DATE RESPONSE DUE: June 30, 2025
REQUESTOR: Public Advocate
WITNESS: Tatyana Bannan
DATE RESPONDED: June 27, 2025
SUBJECT: Miscellaneous Charges

REQUEST:

PA-253. Miscellaneous Charges. Please provide the supporting cost information including, but not limited to, direct and indirect labor, equipment costs, building costs, computers, test equipment, overheads and/or loading that comprise the proposed charges of \$55.00 for Meter Test. Please detail which work classification(s) perform the expected work and the scope of that work (for example relighting pilots). [Bannan 22:16]

RESPONSE:

See response to PA 10-250 for the cost components of the charge.

For the scope of the work on meter tests, the tech will perform a meter exchange, follow turn-on procedures, and make arrangement for the meter to be sent to the meter shop for testing. For the turn-on procedures please see Confidential Attachment PA 10-250b – Operations and Maintenance Procedure No. 61, pages 18-20.

RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-256**

DATE OF REQUEST: June 20, 2025
DATE RESPONSE DUE: June 30, 2025
REQUESTOR: Public Advocate
WITNESS: Tatyana Bannan
DATE RESPONDED: June 27, 2025
SUBJECT: Miscellaneous Charges

REQUEST:

PA-256. Miscellaneous Charges. Please provide the supporting cost information including, but not limited to, the rates charged by the Company in other states and industry standards comprise the proposed Late Payment Charge of 1.5% for the balance not paid on or before the due date. Is this charge assessed each month? Does the 1.5% apply to prior assessments of Late Payment Charges (compounding or interest on interest)? per month. [Bannan 22:22]

RESPONSE:

See the table below for the summary of the rates charged by the Company in other states. This is a monthly charge and is compounded monthly.

State	Late Payment is Charged	Late Payment Amount
Arkansas	3 days after the due date	Utility 10% on the first \$30 and 2% on everything above that amount Non-Utility: \$5 flat fee
Colorado Electric	When next bill is sent unless balance is \$50 or less	Utility: No late fees for residential customers. Commercial customers – 1.5% on utility balance Non-Utility: 5%
Colorado Gas	When next bill is sent unless balance is \$50 or less	Utility: 1% on balances over \$50 Non-Utility: 5%
Iowa	4 days after the bill due date	Utility and Appliance Repair Charges: 1.5% Non-Utility: 5%
Kansas	2 days after the bill due date	Utility: 2% Non-Utility: 5%
Nebraska	2 days after the bill due date	Utility: 1% Non-Utility: 5%
South Dakota	7 days after the bill due date	Utility: 1.5% Non-Utility: 1.5%

Wyoming Electric	12 days after the bill due date	Utility: 1.5% Non-Utility and Appliance Repair Charges: 5%
Wyoming Gas	7 days after the bill due date	Utility: 1.5% Non-Utility and Appliance Repair Charges: 5%

REQUESTOR: Public Advocate
WITNESS: Tatyana Bannan
DATE RESPONDED: June 27, 2025
SUBJECT: Miscellaneous Charges

REQUEST:

PA-257. Miscellaneous Charges. Please explain why the Company has decided to no longer collect the materials portion of the Diversion Fees. Does the Company intend to absorb those uncollected costs and/or spread that expense across all customers? [Bannan 23:6]

RESPONSE:

The Company clarifies that it has not discontinued the collection of the materials portion of the Diversion Fees. The Company will continue to recover these costs as applicable to each specific incident. However, due to the variability in material requirements based on the nature and scope of each diversion event, the Company has elected to remove the itemized listing of material charges from Tariff Sheet No. 135.1. This approach allows for greater flexibility and accuracy in billing based on actual materials used.

Dear (Mr./Mrs./Ms.) (Name):

Black Hills Energy is writing to notify you of a change to your natural gas utility service. Currently, as a customer located in or around Western, Nebraska, you are eligible to participate in the Choice Gas program.

As part of the May 2025 rate review filed with the Nebraska Public Service Commission, the town of Western, Nebraska was moved from the Choice Gas program Base Rate Area Five to Base Rate Area Three.

What does this mean to you? Due to this change, you will no longer be eligible to participate in the Choice Gas program and will instead be served by Black Hills Energy's traditional sales service. This means that while your base rates will remain consistent with the rates assessed in the Choice Gas program, the cost of gas commodity previously set by your Choice Gas program Supplier will now be provided, set and reviewed monthly by the utility, Black Hills Energy.

This communication is informational only with no action required from you.

Should you have any questions, please contact customer service at **888-890-5554**.

Sincerely,

**BLACK HILLS NEBRASKA GAS, LLC

PA-247. Reclassification. Please provide copies of any correspondence sent, or planned to be sent, directly (through 30 days before the close of the record in this case) to the participating Choice Gas suppliers serving the 111 customers located in Western, NE that will be reclassified from Base Rate Area 5 to Base Rate Area 3. [Bannan 24:10 and 24:18]

RESPONSE:

See Attachment PA 10-247 - Western Choice Gas Suppliers Communication for the proposed email to be e-mailed to Choice Gas Suppliers serving Western, NE.

ATTACHMENT(S):

- Attachment PA 10-247 - Western Choice Gas Suppliers Communication

Nebraska Choice Gas Suppliers:

Please be advised that with the filing of the Nebraska Rate review on May 1, 2025, Black Hills Energy also included a request to change customers located in the town of Western, Nebraska from Base Rate Area 5 to Base Rate Area 3.

As you are aware, the town of Western, Nebraska is the only service area that is not served off of the Tallgrass Interstate Gas Transmission (TIGT) pipeline and instead is served off of Northern Natural Gas (NNG), requiring Black Hills Energy to procure a small contract with NNG resulting in some additional one off processes to manage those volumes.

This change will move Western, Nebraska customers out of the Choice Gas program area to become part of the utility's traditional sales service in Base Rate Area 3. There are approximately 111 impacted customers of which it appears 21 made multi-year selections for 2025. Suppliers will need to communicate to these customers that they will be moved to a one year term in preparation for the transition to take place May 31, 2026.

Please submit communication plans to Choice Gas Administration for approval.

Should you have any questions or concerns, please feel free to reach out.

RESPONSE TO PUBLIC ADVOCATE
DATA REQUEST NO. PA-248**

DATE OF REQUEST: June 20, 2025
DATE RESPONSE DUE: June 30, 2025
REQUESTOR: Public Advocate
WITNESS: Tatyana Bannan
DATE RESPONDED: June 27, 2025
SUBJECT: Reclassification

REQUEST:

PA-248. Reclassification. Please provide the expected bill impact (including calculations and inputs) for the 97 residential and 14 commercial customers located in Western, NE that will be reclassified from Base Rate Area 5 to Base Rate Area 3.

RESPONSE:

The anticipated bill impact for the customers in Western, Nebraska, would be specific to the natural gas commodity portion of their bills. Through participation in the Choice Gas Program these customers have a variety of pricing structures, including fixed monthly bills, fixed per-therm rates, blended rates, and market index-based pricing. As an example of the bill impact, a review of the commodity pricing associated with these options in the current month, the average commodity rate across this customer group is approximately \$0.85527 per therm as of June 1, 2026. The Gas Cost Adjustment (GCA) applicable to Base Rate Areas 1 through 3, as of June 1, 2026, is \$0.60280 per therm. This results in an estimated average reduction in the commodity rate of \$0.25247 per therm in the month of June. It is important to note that base distribution rates are consistent across Rate Areas 1 through 3 and the Choice Gas portion of Area 5; therefore, the primary driver of bill impact is the change in commodity pricing. Because commodity pricing fluctuates it is impossible to predict the exact bill impact in the future.
