SECTION 2 – RULES AND REGULATIONS

2.4 Use of Service

- 2.4.1 The Company's Services are available for use twenty-four hours per day, seven days per week. Unless otherwise restricted herein, Customers may use the Company's Service(s) to place and/or receive intrastate InterLATA and intrastate IntraLATA calls.
- 2.4.2 The Service offered herein may be used for any lawful purpose, including residential, business, governmental, or other use. The Customer is liable for all obligations under this Tariff notwithstanding any sharing or resale of Services and regardless of the Company's knowledge of same. The Company will have no liability to any person or entity other than the Customer and only as set forth herein. The Customer will not use nor permit others to use the Service in a manner that could interfere with Service provided to others or that could harm the facilities of others.
- 2.4.3 Service furnished by the Company will not be used for any unlawful or fraudulent purposes including but not limited to use of electronic devices, invalid numbers, and false credit devices to avoid payment for Service contained in this Tariff either in whole or in part. Service furnished by the Company may not be used to make calls which might reasonably be expected to frighten, abuse, torment, or harass another. The Service may not be used for any purpose for which any payment or other compensation is received by the Customer except when the Customer is an authorized communications common carrier, an authorized resale common carrier, or an enhanced or electronic service provider who has subscribed to the Company's Service. However, this provision does not preclude an agreement between the Customer, Authorized User, or Joint User to share the cost of the Service as long as this arrangement generates no profit for anyone participating in a joint use or authorized use arrangement.
- 2.4.4 Service furnished by the Company may be arranged for joint use or authorized use. The Joint User or Authorized User will be permitted to use such Service in the same manner as the Customer, but subject to the following conditions.
- (A) The Customer must complete and provide to the Company all Service agreements and/or other documentation required by the Company to initiate Service.
 - (B) One Joint User or Authorized User must be designated as the Customer. The designated Customer does not necessarily have to have communications requirements of its own. The Customer must specifically name all Joint Users or Authorized Users in the application for Service. Service Orders which involve the start, rearrangement or discontinuance of joint use or authorized use of Service will be accepted by the Company only from that Customer and will be subject to all requirements of this Tariff.

Effective: November 22, 2006

SECTION 2 – RULES AND REGULATIONS

2.4 Use of Service (continued)

2.4.4 (continued)

- (C) All charges for the Service will be computed as if the Service were to be billed to one Customer. The Joint User or Authorized User which has been designated as the Customer will be billed for all components of the Service and will be responsible for all payments to the Company. If designated Customer fails to pay the Company, each Joint User or Authorized User will be liable to the Company for all charges incurred as a result of its use of the Company's Service. Each joint or Authorized User must submit to the designated Customer a letter guaranteeing payment for the joint or Authorized User's portion of all charges billed by the Company to the designated Customer. This letter must also specify that the joint or Authorized User understands that the Company will receive a copy of the guaranty from the designated Customer. The designated Customer will be responsible for allocating charges to each Joint User or Authorized User.
- (D) Joint use is a Service/billing allocation arrangement and not a resale arrangement. Neither the Customer nor any Joint User nor any third party engaged by either of them in connection with a joint use agreement or arrangement may mark up Service or otherwise profit from the joint use agreement or arrangement.

2.4.5 If the Company reasonably concludes that Customer-provided equipment does not pass back appropriate answer supervision to the long distance network, the Company will notify the Customer. If the Customer cannot correct the problem and if Customer-provided equipment continues to provide inappropriate answer supervision to the long distance network, the Company reserves the right to suspend or terminate the Customer's Service. The Company will give the Customer five (5) days' written notice of its intent to terminate Service.

2.4.6 Service provided to Residential Customers pursuant to this Tariff may not be used to transmit data.

- (D) Violation by Customer or End User of any other literary, intellectual, artistic, dramatic, or musical right.
- (E) Violations by Customer or End User of the right to privacy.

These responsibilities are not changed due to any use, misuse or abuse of the Customer's Service or Customer-provided equipment by third parties, the Customer's employees or the public. (D)
- 2.5.6 The termination or disconnection of Service(s) by the Company pursuant to Sections 2.2.5, 2.2.6, and 2.20 of this Tariff or if the Customer cancels Service pursuant to Section 2.19 of this Tariff, does not relieve the Customer of any obligations to pay the Company for charges due and owing for Service(s) furnished up to the time of termination or disconnection. The remedies set forth herein will not be exclusive, and the Company will at all times be entitled to all rights available to it under either law or equity.
- 2.5.7 The Customer is responsible for taking all necessary legal steps for interconnecting Customer-provided terminal equipment with the long distance network. 2.7 Obtaining Services

2.7.1 General

To obtain Service, the Company requires the Customer to provide the Company with whatever authorization the Company deems appropriate. For example, the Company may require the Customer to execute a letter of agency, service agreement, RespOrg agreement, contract, etc. depending on the Service(s) selected by the Customer. Service may be initiated based on written or oral agreement between the Company and the Customer. The Company reserves the right to require an Applicant to sign an application for the Service desired, on a form provided by the Company, as a condition for establishing Service. Applications for Service will be accepted by the Company provided that the Service is available, and the Company has no reason to believe the Customer will not comply with the provisions of this Tariff. The Company will also accept an oral application from a Customer for additions to or changes in existing Service. Upon the Company's acceptance of this authorization, all applicable provisions in the Company's Tariff, as amended from time-to-time, become the agreement for Service between the Company and the Customer. The Company reserves the right, at any time, to require any Customer to present proof of identification to the Company as the Company may then deem acceptable. Acceptance or use of Service offered by the Company shall be deemed an application for such Service and an agreement by the Customer to subscribe to, use, and pay for such Service in accordance with the applicable Tariffs of the Company. The Applicant must also establish credit satisfactory to the Company as provided in Section 2.7.2 of this Tariff.

SECTION 2 – RULES AND REGULATIONS

2.7 Obtaining Services

2.7.2 Establishment of Credit; Indebtedness; Toll Restriction (continued)

(A) Applicant

The Company reserves the right to require all Applicants to establish credit worthiness to the reasonable satisfaction of the Company. Upon receipt of the signed letter of agency or other authorization the Company deems appropriate, the Applicant will be deemed to have authorized the Company to obtain such routine credit information and verification as the Company requires.

(B) Customer

If the conditions of Service or the basis on which credit was originally established have materially changed, an existing Customer may be required to establish additional credit. The Company reserves the right to examine the credit record and check the references of any Customer at any time. The Company may establish credit limits for new and existing Customers. Where a credit limit is established for a Customer, the Customer will be notified of the Customer's initial credit limit amount and any subsequent credit limit changes.

(D)
(D)

Where a Customer becomes delinquent in payments, a new credit limit may be established that is lower than the Customer's initial credit limit. In the event a Customer's established credit limit is exceeded, or in the event a Customer becomes delinquent in the Customer's payments, the Company may implement its toll blocking process. Pursuant to that process, the Company may place a restriction on or discontinue Customer's use of intrastate long distance services, including 1+, 0+, and all 900/976/700/500 calls until the Customer makes payment arrangements satisfactory to the Company. Access to local calling, operator assisted calls, emergency services (9-1-1), calls placed via a toll free number (800, 877, 888 or other area code assignments as appropriate) will not be affected. In the event that toll access is restricted or blocked pursuant to the foregoing, Customers attempting to access restricted services will be automatically routed to either a recorded announcement or a service representative for information regarding restoration of service.

(D)

(C) Indebtedness; Concurrent Indebtedness; Prior Indebtedness

The Company reserves the right to refuse Service to any Applicant who is indebted to the Company for Service(s) previously furnished until satisfactory payment arrangements have been made for all such indebtedness. The Company further reserves the right to refuse Service to any Applicant who is currently indebted to the Company for Service(s) on another Company account, until satisfactory payment arrangements have been made for all such indebtedness.

(C) (continued)

Where a Customer subscribes to more than one active telephone account, and the Company suspends or terminates Service to one or more of the Customer's accounts for nonpayment, the Company may, at its option, initiate action for collection, including the action to suspend or terminate some or all of the other active Customer accounts, with notice as prescribed under Section 2.20 of this Tariff. The Company may also refuse Service to any Applicant attempting to establish Service for a former Customer who is indebted for previous Service(s), regardless of whether or not the previous Customer was furnished Service at the same location, until satisfactory payment arrangements have been made for payment of all such prior indebtedness. If Service is established and it is subsequently determined that any of the foregoing conditions of indebtedness exists, the Company may suspend or terminate such Service until satisfactory arrangements have been made for the payment of the prior indebtedness.

The Company reserves the right to discontinue granting any further credit to Customer in the event of Customer's repeated delinquency in payment for Services, fraudulent use, suspension or disconnection of Service, the Customer files for protection under the United States Bankruptcy Code, or any other material breach, where not prohibited by federal law, rule or regulation. Notwithstanding the foregoing, prior to the return, deposits will be applied to any outstanding charges to the Customer for Service, and only the excess, if any, will be returned.

2.8.2 Advance Payments

Customers and Applicants who, in the Company's judgment, present an undue risk of non-payment may be required at any time to provide the Company such other assurances of, or security for, the payment of the Company's charges for its Services as the Company may deem necessary, including, without limitation, advance payments for Service, third party guarantees of payment, pledges or other grants of security interests in the Customers' assets, and similar arrangements. The Company reserves the right to require an advanced payment from Customers and Applicants who, in the Company's judgment, present an undue risk of nonpayment. Such advanced payment may be required instead of or in addition to a security deposit. The Company shall be authorized to apply such advanced payments against any Service charges incurred by the Customer. The advanced payment shall be equal to or less than estimated installation charges plus two months estimated billing. 2.12 Mileage Measurements

2.12.1 The mileage between rate centers is calculated based on V and H coordinates as obtained by reference to AT&T Tariff FCC No. 10. Calculation between Serving Wire Centers is based on V and H coordinates as obtained by reference to NECA FCC Tariff No. 4. The mileage for a call between Access Lines associated with stations that use the same rate center is one mile. If Feature Group B is used, the distance will be measured from the rate center of the tandem location or network site to which the Feature Group B line is connected. If Feature Group D access is used, the distance will be measured from the rate center of the calling number.

2.12.2 Airline mileage between service locations is calculated as follows:

The square root of: $\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}$

Where V_1 and H_1 are the V and H coordinates of point 1 and V_2 and H_2 are the coordinates of point 2. Mileage is rounded up to an integer value to determine the airline mileage.

Effective: November 22, 2006

SECTION 2 – RULES AND REGULATIONS

2.13 Timing of Calls

- 2.13.1 Unless otherwise indicated in this Tariff, on Station-to-Station calls and on Direct-Dialed calls chargeable time begins when the called station answers and the connection is established between the calling station and the called station, miscellaneous common carrier, mobile radio system, or PBX system. Answer detection is determined based on standard industry answer detection methods, including hardware and software answer detection. However, when Services are directly connected to a Customer-provided communications systems at the Customer's or End User's premises, chargeable time begins when a call terminates in, or passes through, the first Customer equipment on that Customer-provided communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of interface with the Company's Service so that chargeable time may begin.
- 2.13.2 On Person-to-Person calls, chargeable time begins when connection is established between the calling person and the particular person or station specified or an agreed alternate.
- 2.13.3 Unless otherwise indicated in this Tariff, chargeable time ends when the calling station hangs up thereby releasing the network connection. If the called station hangs up but the calling station does not, chargeable time ends when the network connection is released either by the automatic timing equipment in the telecommunications network or by the operator.

2.14 Rate Periods

2.14.1 General

Different rates may be applicable to a call at different times of the day and on certain days of the week, as specified in the appropriate rate schedule for that call. 2.15 Determining Rate In Effect

For outbound Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the calling station determines the rate in effect. For AT&T Long Distance Toll FreeSM Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the called station determines the rate in effect. If a unit of time is split between two (2) or more rate periods, each rate period applies to the portion of the call that occurred during that rate period rounded to the nearest billing increment. If a call is completed by an operator, the time at the beginning of each initial or additional rate period determines the applicable rate period. When a message spans more than one rate period, total charges for each rate period are calculated and the results for each rate period are totaled to obtain the total message charge. The Company may offer employee plans, discount plans, or reduced rates per minute for subscriptions to Company Service offerings described in Section 3 of this Tariff to directors, officers, retirees or employees of the Company or of an Affiliated company that subscribe to one of the Company's Service offerings described in Section 3 of this Tariff.

T

2.16 Application of Charges

2.16.1 Rounding

Each usage sensitive Switched Service has its own specific initial period and additional period (collectively referred to as billing increments) as specified in Section 3 of this Tariff. For all Services, fractions of a billing increment are rounded up to the next higher increment for billing purposes. The usage charges for each completed call during a billing month will be computed. If the charge for the call includes a fraction of a cent of \$.005 or more, the fraction of such charge is rounded up to the next higher whole cent. Otherwise, the charge is rounded down to the next lower whole cent. Rounding for charges for Service(s) is on a call-by-call basis.

2.18.4 For Services with usage-sensitive rates, credit allowances for cutoff, wrong number, or poor transmission are subject to the general liability provisions set forth in Section 2.3.1 of this Tariff. If the Customer desires a credit for any Service interruption, the Customer must contact the Company via telephone or in writing. SECTION 3 – DESCRIPTION OF SWITCHED SERVICES

3.1 Operator Toll Assistance Services (continued)

3.1.6 Level of Automation

Operator Toll Assistance Services calls may be completed with or without assistance of an operator. There are three (3) levels of automation for Operator Toll Assistance Services. They are:

(A) Operator Dialed

An operator dialed call occurs when the person originating the call has the ability to dial all the digits necessary for call completion but instead asks the long distance operator to place the call. The operator dials the called number and the billing number. The operator dialed per call charge applies in lieu of the operator assisted per call charge.

The rates for the operator dialed per call charges in Section 4.1.1 or Section 4.1.2 of this Tariff apply to: Station-to-Station calls when the caller has the ability to dial all the digits necessary for call completion but instead asks the long distance operator to place the call. The operator dialed per call charge will not be applied to: (D)

- .1 a call that cannot be completed by the caller due to equipment failure or trouble on the long distance network or
- .2 a call placed by a party identified as disabled and as a result of that disability cannot complete the call.

(B) Operator Assisted

An operator assisted call occurs when the person originating the call reaches an operator by utilizing an access method that involves dialing the called telephone number, but the operator collects the billing information to complete the call.

(C) Fully Automated

A fully automated call occurs when the person originating the call dials zero plus (0+) from a presubscribed line or one plus (1+) a Toll Free Access Number, plus the called telephone number, and then inputs the billing information as instructed by the automated call completion system. This call is completed without any assistance from an operator.

The fully automated rate also applies if a call:

- placed by a party identified as disabled and as a result of that disability cannot complete the call and the caller requests operator assistance for call completion or
- cannot be completed by the caller due to equipment failure or trouble on the long distance network and the caller requests operator assistance for call completion.

Effective: May 31, 2016

SECTION 3 – DESCRIPTION OF SWITCHED SERVICES

3.1 Operator Toll Assistance Services (continued)

3.1.7 Application of Charges

- (A) There are two (2) rate elements which apply to Operator Toll Assistance Services, a usage charge and a per call charge. The rates for a particular call are determined by the (D)
(D)
level of automation used (operator dialed, operator assisted, or fully automated).

For certain Operator Toll Assistance Service calls, usage rates also vary depending on whether the call is classified as residential or business. The business rate per minute applies when the call is billed to a telephone number presubscribed to the Company for a Business Service. The residential rate per minute applies when a call is billed to a telephone number presubscribed to the Company for a Residential Service. (D)
- (B) If a Customer, End User, or Casual Caller completes an Operator Toll Assistance Services call by dialing one plus (1+) any of the Group 2 Toll Free Access Numbers, the rates and charges contained in Section 4.1.1 (B) of this Tariff apply.
- (C) If a Customer or End User completes an Operator Toll Assistance Service call via any Operator Toll Assistance Services access method described in Section 3.1.3 (B) or 3.1.3 (C) of this Tariff, the rates and charges contained in Section 4.1.2 of this Tariff apply to intrastate InterLATA calls and apply to intrastate IntraLATA calls.
- (D) If a Casual Caller completes an Operator Toll Assistance Service call via any Operator Toll Assistance Services access method described in Section 3.1.3 (B).1 or 3.1.3 (B).2 of this Tariff, the rates and charges contained in Section 4.1.2 of this Tariff apply to InterLATA and IntraLATA calling.
- (E) If a Customer, End User or Casual Caller completes an Operator Toll Assistance Service call via any of the Group 2 Toll Free Access Numbers, this Tariff applies to both intrastate InterLATA and intrastate IntraLATA calls.

3.10 Miscellaneous

3.10.1 Account Codes^{1,2}

- (A) Account codes are an optional feature associated with outbound long distance Service that provides the Customer the ability to track usage by requiring the caller enter a string of digits ("digit string"). Account codes enable the Customer to obtain call detail from the Company which is sorted and summarized based on digits entered by the caller. See Section 5.6 for the account code feature MRC.
- (B) The length of the string digits available to a Customer is limited and the number of digits is based on whether the call originates at an On-Net or Off-Net location. The Company controls the length of the string digits. The caller will be allowed three (3) attempts to enter a valid account code before the call is terminated.
- (C) The account codes are available on a mandatory basis only. When placing a call, the caller must enter an account code for the call to complete.
- (D) The account codes are available on a validated and non-validated basis. If the Customer subscribes to the validated feature, the caller must enter specific account codes in order to complete the call. If the Customer subscribes to the non-validated feature, the caller may enter any digits as an account code as long as the string is the designated number of digits in length.

¹This feature is no longer available to new Customers effective January 12, 2015. Additionally, concurrent with this change, the non-mandatory account code option is discontinued.

² Effective June 12 2015, no changes will be allowed to Account Code configurations. Network facilities supporting Account Codes are being discontinued in some areas, which will impact the availability of this feature. Existing customers may continue with current Account Code configurations where network capability exists or until the Account Code billing feature is discontinued in its entirety by the Company.
