

## ATTACHMENT B

### Legal Capacity

I, Tyler Janky, are currently working on the 107. Once I complete that I will pursue the 137 Exemption and registration with the FAA.

I am working with Ference Agronomy LLC to make sure I am getting my proper registration and applications in. Also I will work with Voliant Drones to help the legal structure of the operation.

With private application I will still need an aerial endorsement and will pursue that once we have approval of the drone. I will complete that before June 2024.

We will always make sure we have one person with the license and endorsements for the spraying operations to happen.
