Subject: RE: East Fremont Fiber project

Hi Ryan,

GFDC is supportive of having strong, reliable fiber options available to Greater Fremont and Dodge County. Broadband is an important piece of our community's infrastructure in our ability to do business, as well as attracting and retaining talent. Providing the flexibility to work remotely is an added benefit for many area businesses, and has become an important piece in workforce retention. Because of this, residential connection has become increasingly important for local businesses, as well as educational institutions to be able to provide virtual learning days if weather prevents in-person learning.

Please let me know if you have any questions.

Thank you,

Megan Skiles

Executive Director
