EXECUTIVE SUMMARY

This is the ninth annual report prepared for the Nebraska Legislature as required by the Telecommunications Act of 1986, also known as LB 835. This report provides information regarding the activities of the telecommunications industry during the past year.

This information is intended to assist State Senators and their staff, as well as the general public, by providing data regarding the telecommunications industry, its operations, financial status and service quality.

LB 835 drastically changed the regulatory structure of telecommunications in Nebraska by removing rate setting authority. However, the Commission continues to actively monitor the quality of telecommunications services rendered to customers and the entry and exit of carriers in the communications field. The Communications Department conducts on-site office testing for service quality, audits the telecommunications companies financial reports, assists customers in resolving disputes with their carrier, and licenses all telecommunications carriers that wish to do business in Nebraska.

The Commission has also remained active with the Federal Communications Commission (FCC) in Washington, D.C. by responding to rule making proceedings and inquiries. Important issues, such as ADA requirements for the Telecommunications Relay System and Universal Service Fund changes, are a few of the topics in which the Nebraska Commission has filed comments with the FCC. By filing these responses, Nebraska has been able to participate at the federal level in telecommunications policymaking.

The recent passage of federal telecommunications legislation in both the House and Senate have made 1995 an exciting and important year for the Commission. The final outcome of these bills will most likely be finalized within the next few weeks. Statutory changes and rule and regulation alterations may become necessary in order for our state to comply with the new federal mandates. Some speculate that the federal legislation may bestow additional authority upon the states to regulate the telecommunications industry.

The Commission has opened two investigatory dockets in 1995 to study the issues of local competition and state universal service funds, topics of great importance in the congressional legislation. The information gathered in these dockets will be useful to the Commission, as well as the Legislature. The Commission looks forward to working with the Legislature to

promote economical and competitive telecommunications services for all Nebraskans. Also, in efforts to become more efficient and to improve its operations, the Commission is conducting an internal review of its present functions and is studying changes that will benefit our state's regulatory environment in the future.

TABLE 2

ACCESS LINES

State of Nebraska

PART I

PART I

Review of the Quality of Telecommunications Service Provided to Nebraska Citizens

1. Telephone Complaints

Table 3

Complaints	July 1, 1992 June 30, 1993	July 1, 1993 June 30, 1994	July 1, 1994 June 30, 1995
Service	152	150	162
Billing	84	101	179
Miscellaneous	77	88	179
800/900 Number	18	43	78
Total	331	382	598

Customer complaints normally begin with the customer contacting the local telephone company. If that fails to solve the problem, the customer can seek assistance through the Commission by making an informal complaint. Most informal complaints are satisfactorily resolved. Informal complaints can, but rarely do, evolve into formal complaint proceedings. In 1994-95, five formal complaints were filed with the Commission. Formal complaints are discussed in detail later in Part I.

The Communications Department filed five departmental complaints during the year against interexchange carriers. The departmental complaints concerned carriers that were offering telecommunications services in Nebraska without a Certificate of Public Convenience and Necessity and certificated carriers that were violating the Commission's Rules and Regulations.

Of the 598 complaints received in the past year, 98.6 percent were filed against a local exchange carrier (LEC) or interexchange carrier (IXC). Table 4 breaks this down as follows:

Table 4

Complaint	Number	Percent of Total
LECs	366	61.7%
IXCs	224	36.9%
Other	8	1.4%
Total	598	100.0%

A. Local Exchange Carriers:

There are 42 LECs in Nebraska (including cooperative telephone companies) ranging from US West with 525,762 of the total access lines to Sodtorn Telephone Company with only 87.

Table 5 shows the complaints by company. As can be expected, the largest number of complaints involve US West Communications and the Lincoln Telephone Company. These two companies serve more than 82 percent of the local access market.

<u>Table 5</u>			
LEC	Complaints	Access Lines	Percent of Total Access Lines
US West	215	525,762	54.6%
Lincoln Tel.	69	267,848	27.8%
GTE North	34	53,298	5.5%
Great Plains	6	26,177	2.7%
United Tel.	11	26,135	2.7%
Others	31	63,114	6.7%
Total	358	962,334	100.0%

The Communications Department divides complaints into three categories for record-keeping purposes: service, billing, and miscellaneous. Complaints involving service include static, interference, cut-offs, and outages. Several large areas in Nebraska experienced fiber-optic cable cuts affecting service to many subscribers throughout Nebraska. These outages are discussed in further detail later in this report on page seven.

Miscellaneous complaints have steadily increased during the past few years and include harassment calls, demands to establish various optional features, requests for extended area service (EAS) and equal access.

Billing complaints concern private pay phones with costly surcharges, directory billing errors and deposits.

The complaints pertaining to 800 and 900 numbers were combined this year. A description of these problems is provided later in this section.

B. Interexchange Carriers:

The Commission received more complaints in 1994-95 concerning IXC's (commonly known as long distance carriers) than the previous year. In last year's report, 116 complaints were filed against interexchange carriers. In the present report that number has nearly doubled to 224. There are now 133 long distance carriers operating in Nebraska.

The complaints received by the Commission have occasionally involved "slamming" (the switching of a customer from one long distance carrier to another without the customer's consent). However, slamming complaints are relatively minimal. If a subscriber thinks his or her long distance carrier has been switched, he or she can call (700) 555-4141 to determine which company is assigned to your number. There is no charge for this call. Many subscribers call to complain about the aggressive marketing being conducted by the carriers. The Commission becomes involved by notifying the long distance company to remove the subscriber's name, telephone number and address from its telemarketing lists, as well as its direct mail lists.

The number of IXC complaints has also increased due to 800 and 900 number informational calls. This activity has caused problems for consumers, businesses, hotels, schools and churches statewide. A thorough account of this problem is provided in the next section. Additionally, many hotels and motels offer long distance service through carriers that charge significantly higher rates than AT&T, MCI or Sprint. People who stay at a hotel/motel believe they are using their calling card or that the phones are automatically connected to a major network, when in fact, they are being charged at higher rates by smaller telecommunications companies. When a person contacts the Commission regarding this confusion, attempts are made to review the charges and to request the carrier to re-bill at the tariffed AT&T rate. Generally, the Commission's involvement is successful.

2. 800 Complaints / Pay-Per-Call

Pay-per-call services, (traditionally thought of as 900 number calling services) appeared in the telecommunications industry through 800 numbers in 1994. This caused a great deal of confusion, as many people thought 800 numbers were toll free. Numerous complaints were filed with the Commission because many calls had been completed without the subscribers' consent. Churches, schools, hotels, businesses and residences were affected by this activity. A block, like that currently offered for 900 numbers, is not a feasible option, since it also restricts long distance calling.

The Federal Communications Commission (FCC) has studied this issue to determine what changes are necessary to limit this activity. The official results of this inquiry will be helpful to curb this ongoing problem. To help consumers in this area, the Commission has actively worked with the local exchange carriers, as well as the pay-per-call companies, to obtain credit for these subscribers. The Commission notified all the local-exchange carriers in Nebraska of this activity and requested their compliance to resolve these matters quickly and efficiently.

3. Formal Complaints

Commission Rules and Regulations permit an individual to bring a formal complaint to the Commission if an informal complaint cannot be resolved. From July 1, 1994 to June 30, 1995, five formal complaints against various telephone companies were filed by consumers.

In a formal complaint proceeding, defendants are given the opportunity to satisfy the complaint without further Commission involvement. This outcome occurred in two of the formal complaints. One such complaint was filed by the State of Nebraska, Division of Communications against U.S. West. The Division of Communications alleged US West was providing inadequate service due to a series of fiber optic cable cuts that occurred in Nebraska from October to December, 1994. After working with US West, the Division of Communications was satisfied that the company was taking the proper steps to provide toll-route diversity in its future network additions.

The second complaint which was resolved between the parties was filed by the Gnostic Orthodox Church in Geneva, Nebraska against Lincoln Telephone (LT&T). The complaint alleged LT&T was providing inadequate service because it omitted the Gnostic Orthodox Church from the white page listings in the York Area Directory. A settlement between the parties was reached, as LT&T agreed to offer the Church a free listing in the Lincoln Area Telephone Directory Yellow Pages.

Other formal complaints filed with the Commission during the past year were from John Ball of Lincoln, Nebraska and Senator Ernie Chambers of Omaha. Mr. Ball's complaint centered on his cellular service provided by Lincoln Telephone Cellular. After hearing the matter, the complaint was dismissed for lack of jurisdiction in this area. The complaint filed by Senator Chambers alleged Sprint Communications Company placed an unauthorized block on his state government phone line located at the Capitol. After a hearing, the Commission determined that Senator Chambers was restricted from receiving certain telephone calls, that the procedure Sprint used to implement the block was flawed, and that inaccurate information explaining the reason for the block was provided to the Commission and to Senator Chambers. The Commission dismissed all other allegations in the complaint.

The fifth complaint was recently filed by Robert Herzog of David City, Nebraska and is presently pending. His complaint alleges Lincoln Telephone, US West and AT&T have provided inadequate service because the companies failed to verify several third-party calls charged to his telephone number by a caller in Omaha. Mr. Herzog has refused to pay for these charges since the third number charges were not authorized by him.

4. Consumer Toll-Free Hotline (800) 526-0017

On June 3, 1988, the Nebraska Public Service Commission introduced an intrastate toll-free number for consumers. The hotline has been heavily used and has enabled citizens of all income levels across the state to reach the Commission for inquiries and assistance free of charge. The Commission is making efforts to inform citizens of this number and the assistance the Commission provides. A quarterly newsletter was initiated in 1995, informing county officials, civic organizations and state agencies of the Commission's operations.

5. Service Testing

The Commission is dedicated to ensuring that Nebraskans are receiving adequate telecommunications service. Its effort has gained national recognition for the emphasis it places on the importance of testing every telephone company's central offices. Each central office is tested at least once every two years by the telecommunications technician. In an effort to monitor the switched network, 361,304 test calls were placed for the twelve months ending June 30, 1995. Tests were conducted with 14 of the 37 telephone companies in 209 central offices.

The technical division continues to provide an integral connection to quality telecommunications service. On-site testing provides first-hand information to the Commission regarding each company's facilities and offers assurance to consumers that technical assistance is available from a source outside the telephone company. The Commission's technician has also visited several homes and businesses across the state during the past year to assist the Commission in resolving service complaints and problems.

PART II

PART II

Review of the Availability of Diverse and Affordable Telecommunications Services to the People of Nebraska

1. Local Competition

Competitive access providers (CAPs) continue to seek authority in Nebraska. Thus far, TCG of Omaha, a subsidiary of Teleport Communications Group and MFS Intelenet of Nebraska, a wholly-owned subsidiary of MFS Communications Company, have sought and obtained certification to provide private line service in Nebraska. CAPs presently hold authority in several states and are expanding their presence annually. At this time, the regions where CAPs provide service are predominantly metropolitan areas with concentrated populations and strong economic activity.

No applications are pending to provide local service in Nebraska at this time. However, the topic of implementing local competition is being intensely debated nationwide. The Commission, on its own motion, opened a docket (C-1128), to examine local competition in Nebraska. Questions were presented to local and long distance companies certificated in Nebraska, the cable television industry, as well as the public, with comments due August 1, 1995. The Commission is currently in the process of reviewing filed comments and researching how other states have reacted to local competition.

Opponents of local competition warn that the universal service subsidy which currently exists will be threatened if competitors are allowed to enter the local market. Many telephone companies rely on universal service funding to offer affordable telephone service to their subscribers. Therefore, the Commission opened a second investigative docket (C-1176), to study the need for administering a state universal service fund. Comments were also due August 1, 1995. At this time, the Commission is reviewing both issues and plans to conduct statewide hearings to allow the public the opportunity to comment further on such significant changes.

2. US West Service Complaints

During 1994, the Commission received an overwhelming number of complaints regarding held-orders and delayed repairs from subscribers in the US West territory. The Commission responded to this problem by opening a docket (C-1098), to monitor the service quality of US West. Pursuant to an Order entered by the Commission on August 18, 1994, US West has submitted monthly reports regarding its repairs, held-orders and service quality.

The other thirteen states where US West operates have also experienced similar service problems. The Regional Oversight Committee (ROC), composed of regulators from all fourteen US West states, has met to determine what level of service standards should be expected. The Nebraska PSC has taken an integral role in this task, as our state already has established service standards that all telephone companies must meet.

It appears US West has generally improved its operations, not only in Nebraska, but in other states as well. The number of service complaints has decreased from one year ago; however, the docket remains open for further study and review.

3. Central Office Data

The condition and type of equipment that telephone companies utilize in their central offices are essential to the provision of quality telephone service. Therefore, the Commission has actively urged all telephone companies to upgrade their switches to digital technology. These more advanced switches allow customer features such as call waiting, call forwarding, equal access and caller I.D.

The following table shows the switching equipment projected to be in use in Nebraska as of December 31, 1995. As can be seen, 94.9% of all switches will be electronic or digital. These types of switches serve over 99% of the access lines in the state. In 1992, only 77% percent of the state's access lines were digital or electronic. Twenty-four switches remain in operation that use step and cross-bar technology. Last year, 38 such switches were being utilized.

Table 6

Technology	No. of Switches	Percent Switches	Percent Access Lines	Age In Years
Step-by-Step	22	4.7%	.8%	8-44
Crossbar	2	0.4%	.1%	18-27
Electronic	12	2.5%	12.3%	11-22
Digital	437	92.4%	86.6%	0-19
Total	473	100.0%	100.0%	

4. Toll-Route Diversity

During the latter part of 1994, Nebraska subscribers experienced several widespread telephone outages due to fiber-optic cable cuts. Widespread outages occurred on October 25 near Shelton; October 27 near Schuyler; December 12 in Kearney and December 14, again near Schuyler. During 1995, similar outages have occurred in smaller, isolated areas. In

each incident, customers lost voice, data and video services for several hours.

The Commission received several informal complaints from individuals, businesses, 911 emergency centers, and law enforcement officials following the cable cuts. A formal complaint was filed by the State of Nebraska, Division of Communications against US West for its failure to adequately provide redundancy in the 308 LATA. Additional information regarding this formal complaint appears in Part I, page 4.

On its own motion, on December 16, 1994, the Commission opened a docket (C-1140) to review toll-route diversity in Nebraska and to solicit comments from the telecommunications industry regarding what actions have been taken to improve toll-route diversity, particularly in the 308 LATA. Numerous comments were filed. The Commission is in the process of formulating a plan to bring western Nebraska the same level of redundancy presently enjoyed in the 402 LATA's. The docket remains open.

5. Equal Access

"Equal access" means that a customer can choose which long distance carrier will route and bill the subscriber's toll calls. In equal access exchanges, the subscriber will automatically reach his or her chosen inter-LATA long distance carrier when he or she dials 1+ the called party's number. If equal access is not available, customers are not able to choose long distance providers, thus, the long distance carrier available in the exchange is AT&T. To reach other long distance companies, the customer must dial 800 numbers or use calling cards.

Nebraska has over 130 certificated long distance companies; therefore, the opportunity exists for "slamming", the unauthorized change of a customer from one long distance company to another. Some customers do not realize they are changing their long distance service when they enroll in promotions, sweepstakes or endorse checks from telephone carriers. The Commission continues to assist consumers whose long distance service is switched, to reverse the change and to obtain credit for customers who might have been assessed a fee for the change.

Equal access is available to approximately 97% of the state's access lines. This equates to 931,191 access lines. Equal access is not available for intraLATA calls. Nebraska is divided into three regional LATAs; western Nebraska (the 308 LATA), southeast Nebraska (the south 402 LATA) and the Omaha area, (the North 402 LATA). At this time, long distance service can only be carried within each LATA by US West in the North 402 LATA and the 308 LATA, or by LT&T in the South 402 LATA. For example, a person calling Scottsbluff from Kearney

is dialing within the LATA; therefore, the long distance call is carried and billed by US West. The following page shows a map of Nebraska and the LATA boundaries.

Table 8 shows which local exchanges presently have, or will have, equal access by January 1, 1996. The table displays the expected conversion date to equal access, as well as the number of access lines served in each central office.

6. Extended Area Service (EAS)

Extended Area Service (EAS) allows a customer in one exchange to place and receive calls from another exchange without paying toll charges. The Commission's EAS rules were implemented in 1991 and numerous applications for EAS have been filed since that time.

During the last year, an alternative to an EAS plan was implemented in the Plattsmouth exchange, served by LT&T, for calls made to Omaha, served by US West. The Plattsmouth plan ultimately evolved into an Enhanced Local Calling Area (ELCA) plan for the Plattsmouth residents, meaning they pay reduced per minute rates for calls into Omaha. This plan models a plan developed by LT&T under a Commission investigation into LT&T's EAS offerings.

The Plattsmouth plan was approved by the Commission in June, 1994; however, approval also had to be obtained at the federal level since the calls from Omaha to Plattsmouth crossed the LATA boundary (the Platte River). Judge Harold Green approved the extended area service request from US West and EAS was implemented from Omaha to Plattsmouth effective April 1, 1995.

Currently, several EAS applications are pending before the Commission. Communities in western Nebraska have filed numerous petitions requesting that calls made to nearby exchanges be toll-free. Residents of Bushnell have filed applications to call Kimball toll-free; Potter residents seek to call Dix, Sidney and Kimball toll-free; Dalton residents seek toll-free calls to Sidney and Gurley; residents of Gurley have requested toll-free calls to Dalton and Sidney; and lastly, Big Springs seeks toll-free calling to Ogallala. At the other end of the state, residents of the Louisville / Manley / Cedar Creek exchange have filed an application for EAS to Omaha. The exchange of Beaver Lake / Murray has also filed a similar EAS petition to Omaha. These last petitions request that a plan be implemented similar to that presently offered to subscribers in the Plattsmouth exchange.

The petitions filed by Potter residents for service to Dix and Sidney, as well as the petition filed by Dalton residents for service to Gurley have been dismissed. By Commission rule and regulation, sufficient calls must be made to the petitioned exchange for EAS to be implemented. The traffic studies compiled in these communities did not demonstrate that adequate calls were being made to make a showing of a community of interest to the petitioned exchange.

For the rest of the petitions, the telephone companies are compiling traffic usage studies for the applications or are

preparing potential rates to be charged for EAS at this time. The usage studies must reflect that the requisite number of calls are being made from the exchange to the requested community to show a community of interest. If sufficient traffic is carried, a ballot will be distributed to residents in each community to determine if an interest exists for the rate levels proposed.

As can be seen in the number of applications filed, extended area service remains an extremely important issue to Nebraska residents statewide. This is primarily due to the high toll rates that are assessed for relatively short distance calls. The Commission is responding to these concerns by promptly processing the EAS applications and by holding hearings across the state for people in these communities to voice their opinions about their current service.

The following table shows data from each exchange, displaying the number of exchanges that can be accessed through extended area service.

Public Service Commission
1994 Telephone Surveys

7. Link-Up Nebraska

The Link-Up Nebraska program was instituted by the Commission in 1988. This program assists low income individuals and families obtain basic telephone service by reducing the installation charges. Eligible participants are allowed to receive a credit up to one-half their initial installation charge up to \$30. Funding for the program is provided by interexchange carriers that have more than .05% of the access lines in the nation. No state funds, nor state tax dollars are used to operate the program. Link-Up is a national program that is available in numerous states. Administration of the program is provided by the National Exchange Carrier Association (NECA) and all operations must comply with FCC rules.

Annually, the Commission collects data from local exchange carriers in Nebraska to monitor the use of Link-Up Nebraska. Steady increases in the usage of the program are shown in the table below:

Table 10

1990	697 Customers
1991	1,241 Customers
1992	1,809 Customers
1993	1,917 Customers
1994	2,035 Customers

The Commission has established criteria for individuals and families to qualify for Link-Up assistance. The participant must not be a dependent for federal income tax purposes (unless at least 60 years of age). Furthermore, at least one of the following tests must be met:

- a. Supplemental Security Income (SSI)
- b. Aid to the Aged, Blind, or Disabled (AABD)
- c. Aid to Dependent Children (ADC)
- d. Medicaid
- e. Energy Assistance
- f. Food Stamps
- g. Income which falls within the following guidelines:

8. Nebraska Telecommunications Relay System

The Telecommunications Relay System (TRS) was established in January, 1991, using services from Hamilton Telephone Company, located in Aurora, Nebraska. The Relay allows hearing and/or speech impaired individuals to communicate via the telephone with the hearing community. Communications Assistants (CA's) at the relay center in Aurora transmit conversations between users of text telephones (TT's) and persons who use standard telephones. The CA reads typewritten communications from the hearing-impaired person to the receiving party and relays written responses back over the TT to the hearing impaired.

The relay is funded through a surcharge which is placed on all access lines, including cellular lines. The surcharge was originally set at \$.07 in 1991. In 1992, it was raised to \$.08. Usage of the relay steadily increased; therefore, the Commission increased the surcharge to \$.10 for 1993 and 1994. Beginning July, 1993, the telephone companies began contributing to the relay fund for interstate calls. Roughly, 15% of

the relay calls are interstate calls resulting in a reduction of the need for support on an intrastate basis. The Commission reviewed the surcharge and lowered the rate to \$.07 in January, 1995. This lesser amount will still permit Hamilton to provide quality services to the hearing impaired.

During the 1995 Legislative Session, the Nebraska Commission on the Hearing Impaired (NCHI) and the Public Service Commission jointly worked on legislation to permit low-income hearing impaired individuals to obtain specialized telecommunications equipment at a reduced rate or free of charge. The program was ultimately approved by the Legislature and signed into law by the Governor. It will enable low-income citizens to obtain telecommunications equipment, such as text telephones and amplifiers, so they can utilize the telephone networks. Funding for the program will be provided from the relay surcharge, but, by law, may not exceed the expenditures generated by one cent of the surcharge per month.

At this time, NCHI and the Commission have been meeting with the Relay Advisory Board, as well as the NCHI Board to draft rules and regulations to initiate this program.

The following table displays the usage statistics generated by the Nebraska Relay since 1991.

Table 12

9. Omaha Broadband Deployment

US West has been actively developing a new broadband project in Omaha, Nebraska, that would provide multi-media capabilities. Similar projects implemented by US West in other states have now been put on hold to determine whether this technology will be feasible. The broadband will provide subscribers with cleaner transmission and self healing/self-diagnostic features.

The Federal Communications Commission approved construction of the Omaha broadband project in December, 1993. Construction began in April, 1994, and will cost US West in excess of \$60 million. The estimated cost per subscriber is from \$1,400 to \$1,800. The project will serve customers west of Interstate 680 in Omaha.

10. US West Sale of Exchanges

In June, 1995, US West released information offering the sale of 28 US West exchanges, serving 32 communities in Nebraska. The following communities will be affected by the sale:

Allen	Cody	Litchfield	Rushville
Ashton	Crookston	Long Pine	Spalding
Belgrade	Culbertson	Loomis	Spencer
Boelus	Dannebrog	Mason City	Stratton
Bristow	Decatur	Overton	Stuart
Brule	Elba	Primrose	Trenton
Butte	Farnam	Ravenna	Waterbury
Cedar Rapids	Gordon	Rockville	Winside

A proposed agreement provides for the transfer of the exchanges to a new consortium formed by Tritech Communications. HunTel Systems, Inc. of Blair will perform the operating functions of the company.

The major partners of Tritech Communications are Hickory Tech Corporation and Alpine Communications, L.C. Hickory Tech owns Mankato Citizens Telephone Company and Mid-Communications, Inc., a billing company, in Minnesota. Further, Hickory Tech provides service to the Amana Colonies Telephone Company in Iowa. Alpine Communications is owned by a group of independent telephone companies and cable television executives serving Iowa subscribers.

An application requesting approval of the transfer is expected to be filed in 1995 and it is anticipated that the Commission will solicit public comment on this important matter

from the affected communities through a series of public hearings.

11. 911 Information

The Legislature established guidelines for the implementation of a 911 service surcharge in 1990. This 911 service enables users to report an emergency to a public safety answer point (PSAP), such as a sheriff's office or a centralized emergency answering service. Local governing bodies may assess up to 50 cents per telephone access line to fund the 911 system. If the county does not contain a city of the metropolitan class (population 300,000+), the governing body may impose an additional amount, not to exceed 50 cents per month (\$1.00 total).

One problem inherent with this system is that some customers reside outside an established 911 service area, yet are assessed a surcharge by the local governing body. To remedy such circumstances, agreements have been negotiated with individuals at the local level to serve these households with emergency service.

Another issue that surfaced in 1994 by PSAP's was what constituted permissible expenditures of 911 funds. State statutes provide that funds shall be used for the purchase, installation, maintenance and operation of telecommunications equipment and telecommunications-related services required for the provision of 911 service. Several PSAP's were interested in adding computers to emergency vehicles and offering pagers for emergency employees in order to more efficiently dispatch services.

The Commission drafted a request to the Attorney General to determine how the PSAP's were permitted to use 911 funds. The opinion explained that funds could be used to receive 911 service calls and to also dispatch emergency services. The Attorney General's response was distributed to all county attorneys, sheriffs and emergency managers.

In 1993, the Legislature passed LB 305, which required each telephone company to report to the Commission for each of its exchanges the following information:

- (1) whether 911 service or E-911 service is provided;
- (2) the amount of the 911 surcharge;
- (3) the location of the answering point;
- (4) whether the governing body belongs to an inter-local agreement with another governing body, and if so, the name of the other governing body; and,
- (5) the amount of revenue collected by the surcharge.

This information is provided in the following table.

12. LB 286 / Personal Property Tax Refunds

In 1992, the Commission opened docket (C-931), to obtain disposition plans from the telecommunications companies operating in Nebraska due to a tax law change that resulted in a reduction in taxation and generated excess revenues for the companies during the previous years. A corresponding docket, C-992, was opened in 1993 for similar purposes, to distribute excess revenues generated from tax law changes.

All 36 local carriers have gained Commission approval of their proposed disposition plans. Projects ranging from economic development contributions to improved telecommunications services, such as frame relay deployment, Internet, enhanced 911, and projects for educational systems have been instituted pursuant to C-931 and C-992.

Interexchange carriers were also included in C-931 and C-992. The plans negotiated with the IXC's for distribution emulate the projects embarked upon by the local exchange carriers. Only AT&T and LDDS Metromedia Communications have not completed their disposition of excess revenue. Both companies are presently engaging in negotiations with the Commission to comply with the spirit of the legislation.

13. REA State Modernization Plan

The Rural Electrification Administration (REA) published an interim rule to incorporate changes to telephone loan policies as required by the Rural Electrification Loan Restructuring Act of 1992. This Act called for restructuring the present telephone loan program. Many of Nebraska's local independent telephone companies rely on REA funding for financial support due to the extremely low interest rates that are assessed. Therefore, the new policies of the loan program are of great importance to many Nebraska carriers.

Pursuant to the Restructuring Act, all states must provide the REA with a State Telecommunications Modernization Plan. The Modernization Plan is a proposal that explains what the state's telecommunications carriers should offer or provide to its subscribers in order to improve the state's public switched network. REA, as required by the Restructuring Act, will not approve any loans in states that do not have such a plan.

Initially, REA required that the Modernization Plan apply to both borrowers and non-borrowers. However, due to an overwhelming number of responses and concerns regarding this requirement, REA subsequently revised the guidelines to permit state utility commissions to merely encourage applicability to all providers. Plans omitting non-borrowers will, therefore, not preclude REA approval.

The Nebraska Modernization Plan is being formulated and a series of open meetings may be held across the state in order to allow citizens the opportunity to express their telecommunications needs and concerns.

PART III

PART III

Review of the Level of Rates of Local Exchange and Interexchange Companies

This section of the report discusses local rate changes during the period of July 1, 1994, to June 30, 1995, as well as local rate levels, the financial status of local companies, long distance rates and the interexchange carriers operating in Nebraska.

1. Basic Local Rate Changes

Pursuant to LB 835, local companies are allowed to increase their basic local rates up to 10% per year, subject to a petition process. Under this provision, unless protests are received by a certain percentage of customers, the rate may go into effect without Commission action. Any increases above 10% per year are reviewed by the Commission.

Another provision of the law allows telephone companies serving less than 5,000 access lines to implement a 30% annual increase subject to a petition process by its customers. One increase in basic local rates took place during the last year. Glenwood Telephone Company increased its residential rates in the Funk exchange from \$10.00 to \$11.00. Business rates increased from \$13.50 to \$15.00 monthly. The residential rate in all of its other exchanges went from \$8.00 to \$9.00 and business rates increased from \$12.00 to \$13.50. Since customers did not petition the Commission to review these proposals, the rates went into effect October 1, 1994. The following table lists basic local rate changes implemented by local exchange carriers over the last ten (10) years.

Basic local rates range from \$4.00 to \$15.00 for 1-party residential service and from \$6.25 to \$39.00 for 1-party business service. Several of these local rates have been tariffed for several years, with the oldest current local rate being set in 1959.

The vast differences in the pricing of similar service can be explained as the companies receive varying rates of return, experience various operational costs and have differing populations. Another major component hinges on the telephone company's ability to access subsidies. One leading subsidy program established for telecommunications companies is the Universal Service Fund (USF). This program is discussed in further detail in the following section.

In the following table displaying local rates, keep in mind that if an exchange has extended area service (EAS), the rates for this expanded service are included in the local rate. Further, some telephone companies incorporate into the

local rate touch tone service, while others charge an additional monthly fee for such service.

2. Universal Service Fund

The Universal Service Fund was established by the Federal Communications Commission in 1986 and is designed to maintain local service rates at affordable levels. The goal of the USF is to achieve a 100% penetration rate for telephone service nationwide. In Nebraska, over 96% of households subscribe to local telephone service.

The USF is funded through payments made by interexchange carriers that have at least .05% of the nation's presubscribed lines. Initially, only AT&T funded this program; however, due to the growth of several long distance companies, the program is now financed by 28 different interexchange carriers. As of July, 1995, the interexchange carriers paid \$.50 per access line, per month, to fund the USF.

To receive USF assistance, a telephone company must possess operating costs higher than 115% of the nationwide average. This fund is geared to help companies located in sparsely populated rural areas provide telephone service at a cost comparable to that assessed to citizens in metropolitan cities. The following table shows that 29 of the 42 companies serving Nebraska customers participate in this program and collaboratively receive \$5.1 million in assistance.

Due to the strong growth of the program in recent years, the Federal Communications Commission has imposed a cap on the fund in order to study this issue. Further, federal legislation is pending that may revise the Universal Service Fund. It remains to be seen what changes, if any, Congress and the FCC enact. As mentioned before, the Nebraska Commission has opened a docket to determine the feasibility and practicality of establishing its own universal service program to ensure citizens statewide are able to receive affordable telephone service.

3. Commission Audits

Since last year's report, the Commission has completed its audit of US West Communications and is currently auditing Rock County Telephone and GTE.

US West Communications is the largest local exchange carrier in the state and serves more than 54% of Nebraska's access lines. Reports filed by US West indicated that as of December 31, 1992, the company's earned rate of return on an intrastate basis was 10.35%. After reviewing the records of US West, the Commission offered several adjustments to its financial statements which resulted in an intrastate net operating income of \$56,408,059, yielding an intrastate rate earned rate of return of 12.21%.

During the review, concerns were expressed regarding US West's inability to provide detailed information regarding 1992 access charges. Access charges represent approximately 26% of combined operating revenues and 10% of intrastate operating revenues for US West. A test of the 1992 intrastate revenue proved to be inconclusive. Sufficient information pertaining to current access charge rates was provided and is sufficient to conclude that current access charge rates appear to be consistent with those on file as of December 31, 1994.

The GTE audit is being conducted in conjunction with Commission staff members from the states of Alabama, Ohio, Pennsylvania, Arkansas, Missouri and the Federal Communications Commission. This multi-state effort provides an excellent opportunity for our state to audit such a large company. All expenses for the auditors are being reimbursed by GTE.

The following table shows the financial statements of Nebraska's local exchange carriers.

4. Financial Statistics

All local exchange companies file annual reports with the Commission. Selected information from the 1994 reports is included in the following pages. Access lines for the industry continued to grow at a rate of 4% from 1993 to 1994. GTE showed the highest growth with 7.8%. Lincoln Telephone's access line growth was 6.5%, while US West showed a 3% growth. The table below reflects the investment levels of gross plant in service during the period:

Table 18

Gross Plant in Service	1993	1994	Percent Change
US West*	\$972,596,301	\$1,002,895,241	3.12%
United Telephone*	27,628,034	29,149,985	5.51%
Great Plains*	45,213,102	45,540,709	.72%
Lincoln Telephone**	446,081,000	450,275,000	.94%
GTE Midwest**	94,244,731	106,608,026	13.12%
Remaining 32 Co's**	158,227,736	166,725,386	5.37%

* Intrastate Results

** Combined Results

The following tables show the net operating income change from 1993 to 1994 and the range of rate of return achieved throughout the industry.

Table 19

Net Operating Income	1993	1994	Percent Change
US West*	\$37,265,276	\$43,070,387	15.58%
United Telephone*	1,883,484	1,981,968	5.23%
Great Plains*	2,684,066	2,595,904	(3.28%)
Lincoln Telephone**	34,507,000	33,798,000	(2.05%)
GTE Midwest**	4,732,000	4,276,000	(9.64%)
Remaining 32 Co's**	14,674,475	14,713,300	0.26%

* Intrastate Results

** Combined Results

The following pages show the rate of return each company achieved in 1994, as well as a historical pattern of the rate of return. A summary of the rates of return for 1994 is as follows:

Table 20

<u>1994 Rate of Return Range</u>	<u>Number of Companies</u>
10% or below	3
10% to 20%	18
Over 20%	16

5. Long Distance Telephone Rates

Long distance service within Nebraska is defined as either intraLATA or interLATA service. The intraLATA calling is carried and billed by either US West or Lincoln Telephone Company. The interLATA calling is provided by AT&T, Sprint, MCI, and a host of other long distance companies. In the last published report, our staff compared US West's toll rates to those offered by US West in South Dakota, Iowa, Colorado, and Kansas (served by Southwestern Bell Telephone). That comparison showed that Nebraska ranked the highest or the second highest in every mileage band sampled and each rate period with two exceptions.

A review of those same states' rates in 1995 reveals that no changes have taken place; thus, the ranking for US West has not changed. US West Nebraska rates range anywhere from 8% to 38% above the lowest rates found in the five state comparison for a five minute call. The difference is particularly higher in Nebraska for calls made under 25 miles. Customers in Iowa and Colorado seem to be the beneficiaries of the cheapest US West rates.

Our comparison this year includes an additional category -- AT&T rates filed in the states of South Dakota, Iowa, Colorado, Kansas and Nebraska. All rates are current as of July 10, 1995. In Nebraska, the rates were increased by AT&T effective July 3, 1995. (A previous rate increase was implemented by AT&T in August, 1994.)

The following table shows the range of rates filed by AT&T in the five states listed above, the Nebraska rate for the call, and the state having the lowest and highest rate for the call. We note that AT&T Nebraska rates range from 35% to 83% higher than the lowest rates found in the five state survey.

Table 23

AT&T Toll Rates
Five State Comparison

States of Iowa, Kansas, Colorado, South Dakota and Nebraska

<u>Mileage</u>	<u>Range of Rates</u>	<u>Nebraska Rate</u>	<u>Lowest Rate</u>	<u>Highest Rate</u>
Day Rates - 5 Minute Call

75	.92 - 1.43	1.38	IA	SD
101	.97 - 1.53	1.53	IA	NE
150	1.02 - 1.63	1.63	IA	NE
Night/Weekend Rates - 5 Minute Call				
25	.51 - .86	.86	CO	NE
50	.59 - 1.08	1.08	CO	NE
75	.69 - 1.18	1.18	CO	NE
101	.69 - 1.25	1.25	CO	NE
150	.75 - 1.30	1.30	CO	NE

6. Access Charges

The interexchange companies, AT&T, MCI and Sprint, pay access charges to the local exchange carriers for utilization of the local switch to provide long distance service to subscribers. These charges were established in 1987 and are designed to allow the local companies the opportunity to recover the cost they encounter in connecting toll calls through their offices. Many large local exchange companies have reduced access charges in recent years, including US West; however, several small local exchange companies have maintained the present access rate or have even raised the rate in order to keep the cost of basic local service at current levels.

Across the nation, local exchange companies are decreasing access rates, and the cost of providing interconnection for interexchange carriers has continually declined since 1987. AT&T has urged Nebraska telephone companies to follow this trend and to reduce their access charges. However, few companies have responded to this request. Due to the large amount of revenue that these charges generate, it is unlikely that the companies will follow this request. Unfortunately for consumers, the present cost of access rates leads to extremely high rates for intrastate toll calls.

PART IV

Recommendations and Recent Legislative Action

1. Summary of 1995 Legislative Session

During 1995, the Legislature gave the Commission the authority to administratively fine telecommunications carriers operating in Nebraska without a certificate of authority and to fine authorized carriers that do not timely remit an annual report to the Commission, as required by statute.

Uncertificated interexchange carriers pose problems for consumers, as well as the Commission. If the consumer has a difficult time obtaining assistance, without a contact person, address or phone number, the Commission must spend a great deal of time resolving such consumer complaints.

The Commission is investigating a number of interexchange carriers operating in Nebraska without proper authority and has been in contact with numerous companies explaining the certification process. In 1995 alone, the Commission has notified over 30 companies they are operating in Nebraska without a certificate, and therefore, need to become certificated. The ability to fine such companies for failing to comply with state statutes, as well as the Commission's Rules and Regulations, will be extremely helpful.

By statute, all telecommunication companies are to submit an annual report to the Commission by April 30th of each year. During 1994, 69 interexchange carriers were certificated in Nebraska and 45 failed to file the requested reports. In 1995, that number increased. The ability to fine companies will encourage compliance with the law and will also be a more efficient means for the Commission to sanction violators.

Also during the 1995 session, the Commission requested authority to regulate the quality of service furnished by cable television (LB 840) and cellular telephone providers (LB 23). Although these proposals did not become law, the convergence taking place in this industry would dictate that these segments of the telecommunications market should become regulated in the public interest on an even playing field.

2. Proposals for the 1996 Legislative Session

Recommendations may be submitted to the Legislature for the 1996 Session regarding the issue of local competition. Any such proposals will certainly include participation from the public, as well as the industry. Furthermore, the research material gathered by the Commission on the issue of local competition will be shared with the Legislature for joint collaboration. Lastly, federal legislation proposed and enacted during

the remainder of 1995 may require further recommendations for legislative action.

PART V

APPENDIX

1. APPLICATIONS FILED SINCE JULY 1, 1994

C-1086	07-12-94	GTE Midwest, Incorporated, Grinnell, Iowa, for authority to adjust depreciation rates assigned to the Nebraska portion of its property.
C-1087	07-18-94	Hamilton Telephone Company, Aurora, for authority to utilize "Hamilton Communications" as a trade name.
C-1088	07-20-94	Pursuant to NPSC Rule 002.30, the Glenwood Telephone Membership Corporation is proposing to increase its rates for basic local exchange service.
C-1089	07-26-94	CLM Associates, Denver, Colorado, seeking to revoke its Certificate of Public Convenience and Necessity.
C-1090	07-29-94	M. Gene Hand, Director of the Communications Department, NPSC, seeking an order to cease and desist be issued to Direct Network Services, Inc., New Hope, Pennsylvania, also operating as Group Long Distance, Inc. of Fort Lauderdale, Florida.
C-1091	07-29-94	Keystone-Arthur Telephone Co., Keystone, seeking authority to adjust the amortization of the reserve deficiency resulting from the replacement of central office switching assets.
C-1092	08-02-94	Metropolitan Fiber Systems of Nebraska, Inc., Oakbrook Terrace, Illinois, seeking a Certificate of Public Convenience and Necessity to provide interLATA and intraLATA interexchange private line services within the state of Nebraska.
C-1093	08-04-94	Hertz Technologies, Inc., Oklahoma City, Oklahoma, seeking authority to operate as a reseller of intraLATA interexchange telephone services within the state of Nebraska.
C-1094	08-08-94	Bottom Line Telecommunications, Inc., Vancouver, Washington, seeking a Certificate of Public Convenience and Necessity to provide intrastate interexchange telecommunications services within the state of Nebraska.

C-1095	08-12-94	M. Gene Hand, Director of the Communications Department, NPSC, seeking an order to cease and desist and to revoke the Certificate of Public Convenience and Necessity issued to Tel-Save Inc., of New Hope, Pennsylvania.
C-1096	08-15-94	International Telecharge, Inc., "ITI" doing business as ONCOR Communications, Dallas, Texas, seeking to reflect name change to Operator Communications, Inc., doing business as ONCOR Communications, Inc.
C-1097	08-15-94	M. Gene Hand, Director of the Communications Department, NPSC, seeking an order to monitor the service quality of US West Communications, Inc.
C-1098	08-18-94	TotalTel USA Communications, Inc., Clifton, New Jersey, seeking authority to operate as a resale common carrier of telecommunications services within the state of Nebraska.
C-1099	08-19-94	Nebraska Telephone Association, Lincoln, seeking authority to revise guideline depreciation rates for various accounts.
C-1100	08-25-94	LDDS Communications, Inc., Jackson, Mississippi, seeking authority to transfer control of WilTel, Inc. to LDDS Communications, Inc. and for approval of related transactions.
C-1101	08-30-94	Communications Gateway Network, Inc., Irving, Texas, seeking authority to transfer stock to WinStar Communications, Inc., a public holding company.
C-1102	09-01-94	Teltrust Communications Services, Inc., Salt Lake City, Utah, seeking authority to operate as a resale carrier of intrastate inter-LATA and intraLATA telecommunications services within the state of Nebraska.
C-1103	09-02-94	Hartington Telephone Company, Hartington, seeking authority to serve territory previously served by Northeast Nebraska.
C-1104	09-02-94	Touch 1 Communications, Inc., Atmore, Alabama, seeking authority to operate as a resale common carrier of telecommunications services within the state of Nebraska.

C-1105	09-07-94	Business Network Communications, Inc., Cherry Hill, New Jersey, seeking authority to operate as a resale common carrier of intra-state interLATA and intraLATA telecommunications services within the state of Nebraska.
C-1106	09-08-94	U.S. West Communications, Inc., Omaha, and RT Communications, Inc., Worland, Wyoming, seeking authority for recognition of change in ownership of the Pine Bluffs, Nebraska and Albin, Wyoming exchanges.
C-1107	09-12-94	Williams Communications, Inc., Atlanta, Georgia, seeking authority for the assignment and provision of an abbreviated N11 dialing code.
C-1108	09-12-94	Eastern Ambulance Service, Inc., Lincoln, seeking authority to transfer control of ownership to Rural Metro Corporation, Scottsdale, Arizona.
C-1109	09-14-94	The Hogan Company, Bellevue, Washington, seeking authority to sell assets to Corporate Telemanagement Group, Inc., Greenville, South Carolina.
C-1110	09-19-94	LECNet, Inc., Jackson, Mississippi, a subsidiary of Telephone Electronics Corporation, seeking authority for a Certificate of Public Convenience and Necessity and authority to transact the business of an interLATA and intraLATA interexchange carrier and operator services provider within the state of Nebraska.
C-1111	09-20-94	Murdock, Remmers, and Associates, Cedar Rapids, Iowa, seeking a Certificate of Public Convenience to provide Operator Services in the state of Nebraska.
C-1112	09-26-94	IDT America, Corporation, subsidiary of International Discount Telecommunications, Corporation, Hackensack, New Jersey, seeking authority to operate as a resale common carrier of telecommunications services within the state of Nebraska.

C-1113	09-26-94	Universal Network Services of Nebraska, Inc., Newport Beach, California, seeking to operate as a resale common carrier of telecommunications services within the state of Nebraska.
C-1114	10-03-94	The Nebraska Public Service Commission, on its own motion, seeking to examine a state modernization plan for the REA.
C-1115	10-05-94	Calls for Less, Inc. d/b/a "CFL", Omaha, seeking a Certificate of Public Convenience to operate as a facilities based Carrier of Travel Services and Debit Card Service and for Authority to operate as a resale Common Carrier of Telecommunication Services and Operator Services within Nebraska.
C-1116	10-07-94	Stanton Telephone Company, Stanton, seeking authority to change the exchange boundary between the Stanton exchange and the Clarkson exchange, served by U.S. West, Omaha.
C-1117	10-12-94	Touchtone Network, Inc., Miami, Florida, seeking to operate as a resale carrier of intrastate interLATA and intraLATA telecommunications services within the state of Nebraska.
C-1118	10-14-94	Hamilton Telephone Company, Aurora, seeking authority to revise its basic local exchange service by providing an enhanced local calling area plan to subscribers in its Trumbull exchange area.
C-1119	10-18-94	Polar Communications Corp., Manalapan, New Jersey, seeking authority to operate as a resale common carrier of telecommunications services, including operator services, within the state of Nebraska.
C-1120	10-19-94	One to One Communications, Inc., Mobile, Alabama, seeking to operate as a resale carrier of intrastate interLATA and intraLATA telecommunications services within the state of Nebraska.
C-1121	10-20-94	Southern Pacific Telecommunications Company seeking a Certificate of Public Convenience and Necessity to operate as a Provider of Telecommunications Services in the state of Nebraska.

C-1122	10-24-94	TCI Communications, Inc., Sioux Falls, South Dakota, seeking to expand their authority to operate as a resale carrier of intrastate interLATA and intraLATA telecommunications services within the state of Nebraska.
C-1123	10-28-94	ACC National Long Distance Corp., Rochester, New York, seeking authority for a Certificate of Public Convenience and Necessity to provide intrastate interexchange telecommunications services within the state of Nebraska.
C-1124	11-07-94	XIEX Telecommunications Inc., Houston, Texas, seeking a Certificate of Public Convenience and Necessity to resell interLATA telecommunications services in Nebraska.
C-1125	11-09-94	Great Plains Communications, Inc., Blair, seeking authority to issue an additional class of common stock.
C-1126	11-10-94	Trans National Telephone, Inc., Long Beach, California, seeking to operate as a resale carrier of intrastate interLATA and intraLATA telecommunications service within the state of Nebraska.
C-1127	11-23-94	Vista-United Telecommunications, Lake Buena Vista, Florida, seeking to operate as a resale carrier of intrastate, interLATA and intraLATA telecommunications services within the state of Nebraska.
C-1128	11-29-94	NPSC, on its own motion, to investigate the effect of local competition on the telecommunications industry in Nebraska.
C-1129	11-29-94	Great Plains, Communications, Inc., Blair, and Petersburg Telephone Company, Petersburg, seeking authority to purchase all of the stock of the Petersburg Telephone Company by Great Plains Communications, Inc. and for issuance of a Certificate of Public Convenience and Necessity.
C-1130	11-30-94	Keystone-Arthur Telephone Company, Keystone, seeking authority to adjust the amortization of the reserve deficiency resulting from the replacement of central office switching assets.

C-1131	12-01-94	Nebraska Central Telephone Company, Gibbon, seeking authority to revise the boundary between its Shelton Exchange and the Kenesaw Exchange served by the Lincoln Telephone Company.
C-1132	12-01-94	Rochester Telephone Corp., Inc., Rochester, New York, seeking authority to acquire control of West Coast Telecommunications, Inc.
C-1133	12-05-94	Steven Knigge and Mar-lynn Knigge, Kimball, seeking authority to receive telephone service from the Kimball exchange of the Sprint/United Telephone Company.
C-1134	12-12-94	Target Telecom, Inc., Wayne, New Jersey, seeking authority to obtain a Certificate of Public Convenience and Necessity to operate as a reseller of interLATA and intraLATA interexchange telecommunications services statewide in Nebraska.
C-1135	12-13-94	Wats International Corporation, Cherry Hill, New Jersey, seeking authority to obtain a Certificate of Public Convenience and Necessity to transact the business of a reseller of interexchange telecommunications services and for approval of its initial tariff.
C-1136	12-16-95	VarTec Telecom, Inc., Lancaster, Texas, seeking authority to operate as a resale common carrier of telecommunications services within the state of Nebraska.
C-1137	12-19-94	Great Lakes Telecommunications Corporation, d/b/a Telecom Advantage a GLTC Company, d/b/a 800 Advantage a GLTC Company, d/b/a Small Business Group, Rolling Meadows, Illinois, seeking authority to obtain a Certificate of Public Convenience and Necessity to transact the business of a reseller of interexchange telecommunications services and for approval of its initial tariff.
C-1138	12-20-94	Continental Long Distance Company, Inc., Omaha, seeking authority to operate as a provider of telecommunications services within the state of Nebraska.
C-1139	12-23-94	RCI Long Distance, Inc., Rochester, New York, seeking authority to change its name to Frontier Communications International Inc.

C-1140	12-23-94	The Nebraska Public Service Commission, on its own motion, to conduct an investigation into the expansion of toll-route diversity in Nebraska.
C-1141	12-27-94	Equal Net Communications, Inc., Houston, Texas, to change its name to EqualNet Corporation.
C-1142	12-29-94	Communications Central Inc., d/b/a Invision Telecom, Inc., Roswell, Georgia, seeking authority to operate as a resale common carrier of telecommunications services within the state of Nebraska.
C-1143	12-30-94	Consolidated Telephone Company, Lincoln, seeking authority to revise the exchange boundary between its Merna exchange and the Broken Bow exchange served by US West.
C-1144	01-03-95	Allnet Communications Services, Inc., Bingham Farms, Michigan, seeking authority to incur certain debt obligations in connection with a Credit Facility Agreement.
C-1145	01-12-95	USA Paging, Inc., Scottsbluff, seeking authority to operate as a resale common carrier of telecommunications services within the state of Nebraska.

11-14-94	Sprint	Revisions to Sprint's Nebraska Tariff PUC No. 3; to reissue the tariff in a new processing format, cancelling Sprint's Nebraska PSC No. 2 in its entirety and to change the per-call charges for Business Sense and Real Solutions FONCARD(s).
11-14-94	Hamilton	To file a "promotional" tariff for the months of December, 1994, and January and February, 1995; rates and services affected by promotion are: Touchtone Service - Free in January and February, 1995, to customers who convert from rotary service to touchtone service during the month of December, 1994, whether they currently own or lease their phone (touchtone service is currently \$1.50 per month). Touchtone Telephones - Will waive the associated \$5.00 charge to customers who lease a rotary telephone and upgrade to a touchtone telephone lease (prices for renting a telephone vary depending on style, etc.). Custom Calling Features: All customers (who call our Business Office) will be able to choose one custom calling feature during the month of December and use it free during the months of December, 1994, and January and February, 1995; also waive all installation charges.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
11-15-94	US West	Revised pages of the US West Communications Services Catalog for Digital Switched Services (DSS) which include: a new DSS Two-Way Data Trunk with DID; a change in the Termination Liability Option; a reduction in the DS1 facility rates; a disaggregation of Hunting from the current DSS trunk rate; and a language change to allow DSS options with Command-A-Link.
11-16-94	US West	Revised page of the US West Communications Services Catalog for Message Delivery Service-Interoffice.
11-16-94	US West	Revised page of the US West Communications Services Catalog for Special Promotion; offers a promotion of the Calling Connection Plan from December 1, 1994, through February 17, 1995; waiving the nonrecurring charge for customers ordering the Calling Connection Plan.
11-17-94	Global Wats One	Original per C-1057.
11-21-94	US West	Revised pages of the US West Communications Services Catalog for Access Service and Private Line Transport; to extend the interval between the service due date and the customer acceptance date from 30 days to 120 days before assessing cancellation charges; for consistency, the Service Date Change interval is being extended to 120 days.
11-21-94	Sprint	To change the usage rate for VPN, VPN Premiere, and Hospitality Switched and to change the per-call charge for Real Solutions voice FONCARD.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
11-21-94	AT&T	To change the AT&T PRO WATS Nebraska Service usage discount from 15% to 10% which will become effective on December 1, 1994; customer notice will appear in the Omaha World Herald on December 1, 1994.
11-21-94	LT&T	Revision to the Long Distance Message Telecommunications Service Tariff to remove all reference to mobile base stations outside the 958 LATA and all non-existent mobile base stations within the 958 LATA; effective December 1, 1994.
11-22-94	MCI	Revisions with effective date of December 1, 1994, to increase the PrimeTime Option additional per minute rate and to increase the EasyRate Option per minute rates.
11-23-94	US West	Revised pages of the US West Communications Services Catalog for Local Exchange Service corresponding to a filing that South Dakota made that becomes effective December 6, 1994; in that filing, the last South Dakota exchange converted to Measured Service; South Dakota now has 100% measured service availability. Rate increments that were previously reflected as footnotes have been incorporated to reflect the total rate in the catalog. Rates reflected on customer bills do not change as a result of this revision. There are also revisions to the Iowa border exchanges to reflect a reduction in business rates that was ordered by the Iowa Utility Board and became effective November 10, 1994.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
12-02-94	US West	Revised pages of the US West Communications Services Catalog for Special Promotion; to offer a promotion of SWITCHNET 56 Service from December 15, 1994, through February 15, 1995. The promotion will waive part of the nonrecurring charge for SWITCHNET 56 Service; customers who currently subscribe to 2-wire service will have \$260 of the \$260 nonrecurring charge waived if they convert to 4-wire service.
12-05-94	Pierce	To offer Voice Mail Service to subscribers in both Pierce and Hoskins exchanges; also to offer a holiday promotion special to subscribers on Voice Mail Service beginning mid-December and extending past Christmas; this will be a trial period similar to one offered when offering custom calling features two years ago.
12-06-94	Great Plains	Revised Tariff Sheets Contents No. 4, Contents No. 6, 1-5, 3-29-A, 3-29-B, and sheets 3-30-A through 3-30-R; to add several exchanges to those that offer Warm Line and Personal Ringing features, introduce Centrex Service, and to show the necessary definitions and changes in the Table of Contents.
12-07-94	LECNet, Inc.	Original per C-1110.
12-07-94	US West	Revised pages of the US West Communications Services Catalog for access Service; to revise the Feature Group D (FGD) access code format in light of the expansion of FGD Carrier Identification Codes (CIC's) from three digits to four digits. The purpose of these revisions is to allow three and four digit CIC's to be used during an interim period. FGD CIC expansion is a natural mandate to expand the existing three digit CIC format to a four digit CIC format to meet the need for more codes.

02-14-95	GTE	Revised rate list sheets regarding Facilities for Intrastate Access: Fifth revised sheet 94 and fifth revised sheet 94.1; to reflect an extension of the waiver of Switched Access nonrecurring charges for customers converting their switched access trunking arrangements. This waiver has been in effect since July 11, 1993, and will be extended to June 30, 1995.
02-14-95	Polar	Original per C-1119.
02-16-95	US West	To introduce a promotional offering to waive the nonrecurring charge for residence customers who convert from usage based Last Call Return to subscription based Last Call Return; promotion will run from March 1, 1995, through March 31, 1995.
02-17-95	Telstar	To revise pages previously inaccurately reported.
02-17-95	US West	To provide for waiving the \$25.00 nonrecurring charge for residential and business customers who subscribe to 800 SERVICELINE between March 1, 1995, and April 15, 1995.
02-17-95	AT&T	To introduce a new Operator Services Promotion (1-800-CALL ATT), which begins on March 1, 1995, and restructure AT&T Prepaid Card rates.
02-21-95	VarTec	To correct a scrivener's error on Original Page No. 41 of its initial telephone tariff consisting of listing VarTec's Affinity Program rather than the correct service name in the service description for the Company's Quantum Service.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
02-21-95	GTE	To implement a 90 day special promotion period for GTE Business/Residence Line 800 Service. This promotion waives service charges in order to increase customer subscription, and is to begin March 1, 1995, and end May 29, 1995.
02-21-95	LT&T	To introduce 500 NXX Access Service, an optional feature that is an originating service utilizing trunk side Switched Access Service which provides a customer identification function based upon six-digit screening of the dialed Service Access Code (SAC) and NXX. The new 500 NXX Access Service will allow customers to provide their end users with services that use the 500 Service Access Code.
02-21-95	LT&T	Revised boundary maps for the Deweese, Fairfield, McCool Junction and York exchanges.
02-21-95	AT&T	To correct AT&T 500 Personal Number Service rates, which were inadvertently transposed. There are no customers currently subscribed to this service. Also, AT&T is supplying correct revision number for Table Contents.
02-22-95	GE Exchange	Revisions to GE Capital Communication Service Corporation, d/b/a GE Exchange and GE Capital Exchange (GE), issue date of February 14, 1995, and a requested effective date of March 5, 1995, to introduce prepaid calling card service.
02-23-95	One Call	To introduce Hospitality 800, introduce Hospitality D and make textual changes.
02-27-95	Excel	To revise pages 5.2, 6, and 6.2 to reflect reduction of some monthly service charges on some existing services.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
02-27-95	Lincoln Telephone	<p>To revise the General exchange Tariff of the Lincoln Telephone Company (LT&T) and effective March 9, 1995; to introduce charges for a Trap and Trace service. When this feature is requested by the customer, LT&T will utilize trap and trace software on the customer's line in the central office for a period of two weeks. During this period, the customer will be billed for each customer reported call that the customer requests to be traced. No charges apply for Trap and Trace when the service is ordered by authorized law enforcement agencies, public or private schools and entities designated as rape and/or spouse abuse centers.</p> <p>This filing also provides a waiver of the Service Order charges as specified in Section 9 of the General Exchange Tariff for the Call Trace and Trap and Trace customer calling features.</p>
02-28-95	AT&T	<p>To withdraw AT&T Optional Calling Plan ("The Calling Plan") service effective April 1, 1995. AT&T has developed transition plans with LT&T (in whose territory all of the OCP customers reside) and the rest of the affected Nebraska ICOs. Sample customer notification letter that outlines options for AT&T's customers provided; to be mailed coincident with this filing.</p>
02-28-95	AT&T	<p>To introduce an intraLATA rate schedule for CustomNet Service, Outward Calling and eliminate the NPA discount, as well as restructure the discount taper. These changes will result in a reduction in rates to the customer and will become effective March 10, 1995.</p>

<u>Date</u>	<u>Company</u>	<u>Subject</u>
03-01-95	GTE	To reflect the elimination of multi-party service in the Bloomington, Columbus, Kearney, Miller, Naponee, Palmer and Stanford exchanges. All multiparty customers in the exchanges have been upgraded to one-party service.
03-01-95	EqualNet	To file Tariff No. 2 to change its name to EqualNet Corporation and to offer additional products which have not been offered previously. The rates for DNS service properly named "Advantage" contain a proposed increase over the previously tariffed rates.
03-01-95	WorldTel	To change the company's address; introduce WorldTel Express Teleconferencing; for Plan A rate Schedule A, Rate Schedule B, WorldTel Premiere 1 Plus, and WorldTel Premiere Direct Link: increase rates for the 0-292 mileage band, reduce rates for the 430+ mileage bank, reduce rates for the day rate period for the 293-430 mileage band, increase rates for the evening rate period and the night rate period for the 293-430 mileage band; to increase the surcharge for the Premiere Calling Card; to increase rates for WorldTel Express 1 Plus, WorldTel Express Direct Link, 800 Readyline, and 800 Masterline; to increase the directory assistance charge for all services except SDN Rate Schedule A, Rate Schedule B, and Rate Schedule C; rates are being changed to react to market conditions in the state. Customer notice has been mailed to affected customers.
03-01-95	ACC National	Original per C-1123.
03-03-95	AT&T	To expand the exclusion sections of those services that currently exclude 700 Service to also exclude 500 Service. Also a correction in the text for AT&T 800 Readyline Service was made.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
03-06-95	MCI	To grandfather the Primetime option; to grandfather the Easy-Rate option; to introduce a new service, Option V/MCI Prepaid; to restructure volume discounts for Option R/Preferred service; to delete the Friends of the Firm discount for Option R/Preferred Personal 800 calls; and to delete Option R/Preferred's Area Code Optimizer discount effective March 15, 1995. Customer notification regarding the rate increase was in the Omaha World Herald Monday, February 20, 1995. Copy of the ad was enclosed.
03-07-95	Home Owners Long Distance	To introduce new interexchange service products, and add the rates, charges, and terms and conditions applicable to the new service products. Customer rates and charges for HOLD's existing service offerings are not being changed.
03-10-95	US West	US West Communications Services Catalog for General Terms and Conditions Applying to Telephone Service, and Access Service; to reinforce the prohibition of arbitrage and avoidance of toll and/or access charges using overlapping extended area service (EAS) areas and local service features. Customers that provide the capability for end users in overlapping EAS areas to make calls outside of their extended local calling areas are required to purchase service from the Access Service Catalog.
03-10-95	AT&T	To introduce AT&T Virtual Telecommunications Network Service; effective March 20, 1995.
03-10-95	AT&T	Promotional offering reflects the MTS Basic Schedule Special Discount Promotion (TRUE USA) which is currently offered in Nebraska. This promotion is offered as an add-on to the interstate offering.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
03-13-95	HunTel Systems	To revise pages T-3, 6-5 and 6-6 to reflect accurate revision sequences; Introduced Emergency Alerting System in Sections 3.17 and 6.17; Moved Miscellaneous Services from Sections 3.17 and 6.17 to 3.18 and 6.18, respectively, moved Service Charges from Section 6.18 to 6.19; and revised Old Telephone Number Intercept (3.18.4 and 6.18.4).

03-16-95	AT&T	Beginning March 26, 1995, and ending May 23, 1995, AT&T will provide the following promotion for Customers who access AT&T Directory Assistance via a company designated access number and bill the call to a Calling Card: For the aforementioned calls, AT&T will waive the AT&T DIRECTory LINK Service charge as set forth in Rate List, Section 7 for customers who then use the AT&T DIRECTory LINK Service to complete a Long Distance Message Telecommunications Service (LDMTS)

<u>Date</u>	<u>Company</u>	<u>Subject</u>
	AT&T (cont)	call. For the purpose of this promotion, these calls will be classified as Customer Dialed Calling Card Calls. Not available for the following types of calls: Person to Person calls, Billed to Third Number calls, and Collect calls.
03-17-95	Corporate Tele-Management Group, Inc.	Revision to its N.P.S.C. Tariff No. 1, revision increases CTG rates and adds two new products and includes a promotion letter for new customers.
03-21-95	Hooper	To revise tariff sheet regarding directory assistance service rates effective April 14, 1995.
03-21-95	Touch 1	To restructure its product "Ultimate Advantage" to include a 3-tier Volume Discount on the basic rates (which are the lowest MTS (DDD) rates of AT&T, MCI and Sprint). In improving this product, the "10% off feature" and the separate "Ultimate Advantage Volume Discount" were deleted. Also deleted was the existing volume discount on "Simply the Best," flat-rated product in which will now be formulated, within the rate itself, a special competitive discount to lower the rate even further; Simply the Best on Page No. 21 is reduced; to become effective April 1, 1995.
03-21-95	US West	To revise pages of the Communications Services Catalog for Local Exchange Service to provide for Extended Area Service (EAS) for Omaha, Gretna and Springfield to Plattsmouth, effective April 1, 1995; customers will be notified of this change by means of a press release and a message printed in the April bills of those affected by this calling area expansion.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
03-22-95	AT&T	To extend AT&T CustomNet Intra-LATA "Plus" Promotion; extension to become effective April 1, 1995.
03-22-95	AT&T	To introduce the AT&T Global Pre-paid Card promotion which offers a special rate for purchasers of the AT&T Global Prepaid Card, and change the baseline criteria for AT&T Software Defined Network Service Intrastate Coupon Promotions "A" and "P."
03-22-95	AT&T	Custom Network Service revisions to introduce Master Pin Calls for AT&T EasyReach 700 and AT&T 500 Personal Number services.
03-23-95	LCI Int'l	To add language to Integrity that protects the customer's rates and discounts when they execute a term agreement; to add a re-charge feature with a credit card to LCI International Debit Card; to add language to the Rules and Regulations section under the Responsibility of "800" Service customers; to add two (2) new charges for 800 account codes; to add "WorldCard Plus and LCI Home 800" promotion which provides a total of 120 minutes of calls at \$.01 cost per minute effective April 3, 1995.
03-27-95	AT&T	To reprice interoffice channel connections, access connections, local channel charges, access function connection charges and analog multipoint charges. This filing will also remove the Digital Data Multiplexing charge and introduce additional intermittent baud rates for access connection, function connection, diversity and custom diversity.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
03-27-95	MCI	To lower the minimum usage requirement for the Friends & Family Option B discount; to lower the monthly subscription fee for Personal 800 Plan R; to restructure the Volume Discount for Option H/Prism Plus; to include rates for Option I/VNET and Option L/Vision's Government Pricing Plans; to introduce Option W/MCI Masters; to introduce the MCI Friends & Family Winback promotion; and to introduce the Option L/Vision Term and Non-Term promotions. Customer notification regarding the rate increase was in the Omaha World Herald March 21, 1995.
03-27-95	LT&T	To revise the General Exchange Tariff to remove references to Rural Line Service, Party Line Service and language that prohibits others from publishing and distributing telephone directories. In addition, to change the rate for Restoration of Service, to add provisions for advertising in the alphabetical section of the directory and remove obsolete language in the description of foreign listings in the directory; effective April 5, 1995.
03-30-95	Target Telecom	Original per C-1134.
03-30-95	Allnet	To introduce Allnet Product One, a new service that is available only in conjunction with Allnet's interstate Product One service offering.
03-31-95	United Teleserv	To update Index Sheet, increase the number of holiday periods applicable for discounted rates, and introduce a new flat rate Optional Calling Plan effective April 30, 1995.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
03-31-95	LinTel Systems	To revise LinTel Systems tariff pages 1, 20, 21 and S1 effective April 11, 1995.
04-04-95	Sprint	To make textual change to the payment of charges section for Private Line Service; introduce Hospitality Connection Plus and make associated textual changes; add text to reflect that Sprint Advanced Wats, Sprint Advance Wats Plus, Dial 1 Wats, Dial 1 Wats Advantage, and Ultra Wats will no longer be available to new subscribers; delete Banded Wats text as it will no longer be offered and does not have an existing customer base; introduce Wholesale Communications Services and make associated textual changes; make textual changes to the Instant FONCARD product offering; make textual changes to the Sprint Sense product offering; and re-structure the Business Sense product offering and make applicable rate changes to become effective April 14, 1995.
04-06-95	LDDS Metromedia	To add WorldOne to tariff and to limit availability of the Easy-Answer and Performance 4000 Services.
04-06-95	Budget Call Long	To add new service options to Casual Calling.
04-07-95	LT&T	To remove obsolete tariff language and make changes to the geographical calling area available to customers with a Local Optional Calling Plan effective April 16, 1995.
04-07-95	MCI	To change the rate structure of MCI Masters from Mileage sensitive to postalized/flat rates.
04-07-95	AT&T	To introduce AT&T Clear Advantage Service.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
04-10-95	GTE	To clarify Off Premise Extension Language and applications for which customers can obtain this service. Mileage Charges and Private Line-Local Services have been moved to Section 7 from Section 2 effective; April 17, 1995.
04-10-95	MCI	To make clarifying textual changes to the Check Sheets and to modify and reintroduce a promotion for MCI Vision customers, effective April 20, 1995.
04-13-95	Allnet	To propose a slight increase to the per call surcharge applicable to Allnet Access, Allnet Spectrum, and Allnet Edge services. A copy of Allnet's notice to affected customers (via billing insert) is attached.
04-13-95	AT&T	To introduce AT&T CustomNet, CustomNet Option S, & Clear Advantage Discount IntraLATA Promotion effective April 23, 1995.
04-14-95	InVision Telecom	Original per C-1142.
04-17-95	Frontier Com.	To add a new product, Plan X and to add two new promotional offerings, "Double Your Common Sense" and "First Choice" to be effective April 27, 1995.
04-21-95	Working Assets	To correct the Definitions section to state the correct Holiday calling rate; correct the "Description of Services" section to include "10XXX" traffic, introduce prepaid calling card services; delete call placement charges that do not appear on the Carrier's bill; and introduce intranetwork discounts and volume discounts for commercial subscribers.

<u>Date</u>	<u>Company</u>	<u>Subject</u>

04-27-95	US West	To eliminate the Business Value Pac Measured Service offering for line and trunk customers in Nebraska. The Business Value Pac customers will have Business Budget Pac service as an option. Business Budget Pac monthly rates are being reduced \$1.00 in order to help prevent customers who migrate to Budget Pac from seeing any increase in their monthly rates.
04-27-95	One Call dba Opticom	To introduce Protocall Ambassador, to discontinue One Call Travel and to make textual changes; to be effective May 8, 1995. One Call currently has no customers on One Call Travel.
04-27-95	WilTel	To reflect the corporate name dba change, issuing officer change and replacement of references to WilTel with Company. Pursuant to C-1160.
05-01-95	UniDial Inc.	To revise rates for four of UniDial's products: Direct Dial 1+, Switched 800, Dedicated Direct Dial 1+, and Dedicated 800; and to add a new service called 1-800-UniDial.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
05-01-95	Glenwood Tel.	To provide a complete revision of the Local Exchange Service Tariff which replaces the Local General Exchange Tariffs currently on file with the following changes: Several new Custom Calling and Advanced Calling Features are now available to customers; the Directory Assistance Charge to customers in Funk has been increased from \$.40 to \$.60 per call. (Directory Assistance in Glenwood's other exchanges is rated in accordance with the rates in Lincoln Telephone's tariff.); certain Directory Listing Services' rates have been increased, and some are now offered on an annual basis; the Telephone Number Group Fee, which Glenwood enables customers to reserve telephone numbers in groups of 100, has been increased from \$20.00 to \$50.00 per month; and IMTS Dial Mobile Radio Telephone Service has been updated and is now called Mobile Telephone Service.
05-01-95	MCI	To make corrections to Option I (Vnet) Government Pricing Plan, which were erroneously filed in Transmittal No. 95-4. Customers have been quoted and will receive the rates as filed in this Transmittal 95-7.
05-02-95	US West	To extend the market trial for retail sales of Residence and Business Voice Messaging to December 31, 1995.
05-02-95	GTE	To introduce two new services, FGD Switched Access with 950-XXXX Access and 500 SAC Access Service.
05-05-95	AT&T	To introduce CustomNet Option S - Option VI and redefine our current CustomNet Option S as CustomNet Option S - Options I, II, III, IV and V.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
05-08-95	Sprint	To add to the Option B Calling Plan, introduce Moonlight Madness and add clarifying text to Directory Assistance for effective date of May 18, 1995.
05-09-95	US West	Revised pages of US West Communications Services Catalog for Advanced Communications Services to restructure the Frame Relay Service (FRS) Committed Information Rates, add language clarifying when private line transport charges will apply for FRS Network-To-Network Information Transfer, and change the term "service agreement" to pricing plan.
05-09-95	Touch 1	To offer Winback promotions to new and existing customers on its "First Touch" - Touch 1 Basic DDD Service. Section 4.11.4.1. entitled "Promotional Offerings" has been added to the tariff. This section provides a detailed description of this specific "Winback Promotional Offering" as reflected on Original Page 23.
05-10-95	HunTel	To modify Mobile Telephone Service, an option is now offered for customers subscribing to paging services to provide their own equipment and to add Global Access Service for customers of the Arlington and Blair Telephone Companies.
05-10-95	EqualNet	Original per C-1167.
05-12-95	LT&T	Revised boundary maps for the Nehawka and Weeping Water exchanges. This revision was necessary due to the extension of the Weeping Water exchange boundary to the northeast quarter of Section 15, Township-10-North, Range-12-East, to serve a new residence for Mr. John Haley.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
05-15-95	US West	Revised pages of the US West Communications Services Catalog for Open Network Architecture Service, Special Promotion, Custom Calling Services and the Table of Contents to introduce two new Advanced Intelligent Network (AIN), and Open Network Architecture services to the Custom Calling family of products; they are Remote Access Forward (RAF) and Scheduled Forwarding (SF). Remote Access Forwarding allows customers to activate, deactivate, or change the "forward to" number from any tone dialing phone by calling a single number. With Scheduled Forwarding, customers can choose to pre-schedule the times, days and destination numbers to which their service will forward. With the introduction of these two services, a Special Promotion will offer a 90 day free installation. In addition, RAF and SF will be offered with a 60 day Money Back Guarantee. If the customer is not satisfied with either service, and discontinues the service within the first 60 days from installation, US West will credit their account for all monies billed for the service. US West will refund both the recurring and nonrecurring charge.
05-15-95	US West	Revised page of the US West Communications Services Catalog for Centrex Plus Service to add text changes that clarify the requirements of a Digital Facility Interface (DFI) with Centrex Plus Service and to document the need to provide network services and charges with a DFI circuit.
05-15-95	US West	To revise existing termination liability terms and conditions applicable to service agreements (contracts) by establishing a uniform policy. Termination liability assessments are reduced to a standard 15%, and conditions for waiving the charges are introduced.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
05-16-95	WilTel	To reduce the Non-Day Rates for the WilMax Carrier Service.
05-17-95	Allnet	To introduce Allnet MAX Communications, a new service offered only in conjunction with Allnet's interstate MAX Communications option.
05-22-95	US West	<p>To revise pages of the US West Communications Services Catalog for SingleNumber Service and the Table of Contents. These pages introduce SingleNumber Service (SNS). SNS is a terminating Advanced Intelligent Network (AIN) service which provides a single telephone number for business customers, with multiple business locations. Using Zip Code data, all calls to this single number are routed according to the geographical location of the calling party regardless of the telephone number and locations of those multiple locations. If the customer desires, calls may also be routed on a percent allocation basis, by Zip Code.</p> <p>As an optional feature, the service provides a Time-of-Day/Day-of-Week Forwarding feature which allows calls to be routed according to a time schedule.</p> <p>During a promotional period of June 13, 1995, through September 10, 1995, a waiver of the non-recurring establishment charge will be offered to customers who subscribe to the 5 digit Zip Code offering and the 5 to 9 Digit Zip Code offering (not to exceed 5,000 Zip Codes). Additionally, SNS will be offered with a Money Back Guarantee. If a customer discontinues the service within 90 days of installation, their account will be credited for all monies billed for any flat monthly charges.</p>

06-29-95	US West	To introduce four US West Enhanced Fax Services to customers in Nebraska; they are Never-Busy Fax, Broadcast Fax, Fax Mail Plus and FaxRequest; Never-Busy Fax intercepts and electronically stores incoming faxes when a customer's fax machine is busy, later retrying and sending the faxes when the line is available; Fax Mail Plus provides the user with a personal fax number, allowing them to retrieve and print their faxes at any fax machine at any time. The service can print, save and forward stored faxes up to 20 destinations as well as notify the user upon receipt of a fax via paper or voice mail; Broadcast Fax allows the user to fax a single document to multiple locations (as many as 5000) simultaneously. US West or the customer may create, maintain and update multiple fax lists via software; FaxRequest is electronic fax-On-demand. US West works with the customer to build a customized "electronic library" of documents their customers can request and fax back for product information, ordering information, etc.

<u>Date</u>	<u>Company</u>	<u>Subject</u>
