I/We support the provider's application because (select any that apply):

- The proposed service area is not able to receive reliable broadband service of 25/3 Mbps or greater.
- The proposed service area is not able to receive reliable broadband service of 100/20 Mbps or greater.
- The proposed project would result in the entire community having access to high-speed internet at 100/100 Mbps.
- The proposed service provider has consulted with the community in relation to community needs and affordability of the proposed service plans.
- Other reasons (please complete below)

Comments:

It is frustrating when the system says we have great service but when trying to live stream we get buffering and while attempting to work online we are kicked off, often multiple times in a work session. We have tested and had our broadband drop below ~~27~~-17/3 on several occasions. Today it registered 27/5 but we cannot depend on that.
