

Nebraska Capital Projects Fund (CPF) Grant Application

Section I: Applicant Details Original \square Revised \square

1. Applicant name:			
2. Applicant type:			
3. Applicant street address:			
3a. Applicant city:			
3b. Applicant state:			
3c. Applicant zip code:			
4. Applicant contact (first and last name)	:		
5. Applicant e-mail:			
6. Applicant phone number:			
7. Provider name:			
8. Provider contact (first and last name):			
9. Provider e-mail:			
10. Provider phone number:			
11. Legal representative name (must be a	n		
attorney licensed to practice law in Nebraska			
or an attorney admitted to practice pro hac			
vice for purposes of this program):			
12. Legal representative e-mail:			
13. Legal representative phone number:			
14. Applicant's Nebraska ETC status:			
15. Does the applicant currently		15a. If yes, does the applicant	
report through FCC Form 477 speeds		clearly offer the minimum	
of at least 100/100 Mbps provided to		100/100 Mbps speeds	
customers within the State of		required on their public-facing	
Nebraska?		website:	
15b. Provide the service provider's			
website URL that reflects the			
minimum 100/100 Mbps speeds			
currently available. Also, provide			
instructions on how to view available			
speeds, if not a direct link:			
16. Does the applicant currently			
participate in FCC's Affordable			
Connectivity Program (ACP)?			

Section II: Project Details

ection ii. Project Details			
1. Project name:			
2. Project location			
description (the cities/			
communities where the			
project(s) will take place):			
3. Estimated number of	3a. Unserved (<25/3 Mbps):	3b. Underserved (<100/20	3c. Total:
locations served in project		Mbps):	
area:			
4. Technology type(s) to be			
deployed in project area:			
5. Current maximum		6. Projected minimum	
connection speed		connection speeds at	
bandwidth in project area		completion (Mbps):	
(Mbps):			
7. Monthly customer rate		7a. Does the rate plan for the	
for proposed 100/100 Mbps		proposed project area impose	
service:		data or usage caps?	
7b. Does the rate plan for		7c. Does the rate plan for the	
the proposed project area		proposed project area involve	
involve throttling speeds		metered or "pay as you go"	
after usage limits are		service model?	
reached?			
7d. Does the rate plan for		7e. Does the rate plan for the	
the proposed project area		proposed project area lock	
impose early termination		customers into a particular plan	
fees?		or term with a long term	
		contract?	
8. Maximum speeds all		9. Expected project completion	
serviceable locations in		date:	
project area will be capable			
to be scalable to upon			
completion:			
10. Project geographic		11. If noncontiguous, are the	
contiguity type:		areas included from the same	
		exchange or adjacent	
		exchanges?	
12. Total project costs		13. NBBP grant amount	
(based on allowed costs):		requested:	
14. Does the project involve		NOTE: If the answer to 14 is "yes,	" proof of tribal consent must be
any portion of deployment		provided to the Commission no la	ater than April 24, 2023.
on tribal land?			
15. Congressional District in		16. If Congressional District 3, is	
which the project will take		the project area only serving	
place:		locations within a city of the	
		second class or village?	
		·	-

Attach/Include:

Please label attachments as follows: "[Applicant Name]_[Project]_[Attachment Letter]." If it is necessary to submit multiple attachments under one attachment letter category, label the attachments to identify the separate attachments. Ex. "[Applicant Name]_[Project]_[Attachment Letter]_1", "[Applicant Name]_[Project]_[Attachment Letter]_2", etc.
\square A polygon shapefile polygon (.shp) reflecting the project area must be included. Any supporting files necessary to open the shapefile must also be attached. (Attachment Letter: A)
☐ A point shapefile which identifies serviceable locations in the project area must also be included. Any supporting files necessary to open the shapefile must also be attached. (Attachment Letter: B)
☐ Applicants that answered "Yes" to section I; field 15 should attach documentation that 100/100 Mbps speeds are currently delivered to customers in other areas served by the applicant and that those speeds are advertised. (Attachment Letter: C)
☐ Applicants that answered "Noncontiguous" in section II; field 10, should provide a statement explaining the reasoning for including noncontiguous areas. This should include an explanation regarding what natural connection the noncontiguous project areas have to each other. (Attachment Letter: D)
Technical capability statement: Applicants must include a statement relating to their experience providing broadband, whether they currently provide broadband at the minimum 100/100 Mbps speeds, the useful life of the facilities, and how the project will be resilient and sustainable in the long-term. This statement should also include the number of technical staff that will be dedicated to serving the project area once the project is complete, the level of technical ability of staff, the technological components used and which components may require more frequent repair or replacement, a detailed description of the proposed network architecture including homes passed, fiber miles, and the specific technology to be used to provide service to end users, a description of the applicant's technical capability to meet the requirement to provide a minimum 100/100 Mbps in all locations that receive grant funding, and their plans to meet the minimum statutory technical and speed requirements in place for the NBBP throughout the fifteen-year period, and how the service area will be maintained throughout the useful life of the facilities, and any other relevant technical expertise of the applicant. (Attachment Letter: E)
□ Rate comparability details: Attach information demonstrating that the retail rates for the proposed service area are comparable to the applicant's rates outside the project area for the same speed tiers of a minimum 100/100 Mbps or next highest tier if 100/100 Mbps is not offered. Additionally, information regarding the terms and conditions offered, and the terms of service must be provided. Specifically, a statement must be provided with the application detailing whether the plan involves data caps, throttling speeds after usage limits are reached, long-term contracts, Early Termination Fees, or metered "pay-as-you-go" service. (Attachment Letter: F)
□ A business plan for the proposed network: The business plan should include: a description of any risk factors or legal challenges that must be addressed prior to or during the project in question, such as local zoning, right of way, tribal approval*, and permitting processes, and how the applicant intends to mitigate these risk factors or legal challenges, a financial analysis for the project including cash flow projections for the project for a minimum of 5 years including an explanation of revenue assumptions and take rate, a description of the plans for long-term maintenance of the network built through the grant, disclose any prior receipt of federally awarded grant funds for broadband deployment and provide copies of any past audits of federal awards, and community engagement demonstration. NOTE: Projections that do not reflect positive capitalization should include a written explanation as to how a project will be maintained over the life of the facilities. For projects that involve broadband development on tribal lands, permission from and approval by tribes is required and documentation of the approval must be provided to the Commission no later than April 24, 2023. (Attachment Letter: G)
☐ A funding breakdown for the grant must be attached in Excel format. This should include a proposed budget reflecting a clear and detailed breakdown of cost elements based on total allowable project costs. This should also include the total grant amount requested and detail any matching funds committed. (Attachment Letter: H)
☐ Non-ETC applicants attach the most current year's audited financial statements. (Attachment Letter: I)
☐ A digital inclusion plan must be attached for consideration. The plan should specify: the applicant's process to consult with community and consider affordability; a description of how the project will meet the objective of providing broadband infrastructure deployment within the project area to directly enable work, education, and healthcare monitoring; a description of how the project will address a critical need that resulted from or was made apparent or exacerbated by the COVID-19 public health emergency;

identify any critical needs of the community intended to be served by the project, and how the project will be tailored to meet those

needs, including the carrier's efforts to ensure members of the community to be served will be able to afford the services offered and must describe any discounts and/or support programs to be offered for low-income individuals; specify how the project will impact access to and use of information and communication technologies within the communities it serves, including individuals and communities that are the most disadvantaged; include the pricing structure of the 100/100 Mbps plan being offered to low-income subscribers in addition to the availability of Lifeline or Affordable Connectivity Program (ACP) discounts and any additional terms and conditions of service; include evidence of outreach efforts to relevant stakeholders (community leaders, community members, civic organizations, etc.) in the areas they are wishing to serve. (Attachment Letter: J)
□ Applications proposing to use technology other than fiber or proposing to use a combination of fiber and other technologies, must include an attestation from a qualified engineer describing the speed capabilities of the proposed technology, and should provide the following: (1) How the proposed spectrum can meet or exceed the relevant performance requirements at peak usage periods. Clearly identify the licensed and unlicensed spectrum that will be used; (2) Provide the calculations used for each frequency band, to design the last mile link budgets in both the upload and download directions at the cell edge using the technical specifications of the expected base station and customer premise equipment. Submit assumptions regarding fading statistics, cell edge probability of coverage, and cell loading for each relevant performance tier; (3) Provide detailed radio access network (RAN) infrastructure information used to generate the coverage maps for each unique cell including longitude, latitude, antenna height, antenna orientation, antenna down-tilt, antenna model, antenna system configuration, effective radiated power, operating spectrum amount, operating spectrum type, and operating radio technology; (4) Describe the underlying propagation model used to prepare the coverage maps and how the model incorporates the operating spectrum, antenna heights, distances, fading statistics, terrain resolution, and clutter resolution. Additionally, for applicants proposing to use fixed wireless technology, applicants must include: (1) tower location shapefiles for existing and planned towers; (2) shapefile polygon demonstrating coverage for the planned and/or existing networks that will be used to meet the BEAD public interest obligations, including where the upload and download speeds will meet or exceed the required speeds (100/100 Mbps), and showing that coverage encompasses the locations included in Attachment B. (Attachment Letter: K, K1 (tower locations), and K2 (propagation data)).
☐ Match source documentation: A table detailing the confirmed matching fund commitments by source must be included. Documentation of the match source(s) should also be provided. This could include but is not limited to a signed contribution certification for community partner match, NUSF census block information (in Excel format), documentation regarding timeline for RDOF deployment, justification for the value of any in-kind contributions such as labor, equipment, and inventory on hand. (Attachment Letter: L)
☐ Other supporting documentation (if applicable), such as supplemental speed test data, letters of support from members of the community, supplemental financial information such as the most recent year's federal tax return, etc. (Attachment Letter: M)
APPLICANT CERTIFICATION: By signing this statement, the applicant certifies that the information submitted on the application and all supporting documents are true and correct. The applicant agrees to offer broadband internet in the project area for fifteen years after receipt of grant funding and commits to maintaining minimum speed capability of 100Mbps/100Mbps in all locations for which the applicant will receive support for the fifteen years after receipt of grant funding. The applicant agrees to perform and adhere to all grant requirements, and to comply with all state and federal regulations and requirements pertaining to this program. In addition, the applicant agrees not to use equipment prohibited by the FCC within the network, to maintain the rates reflected in their application within the project area for a minimum of five years following completion of the project, to submit network speed testing information as prescribed by the Commission, and to complete the project build within eighteen months following the grant award unless granted an extension.
