14. Usage Charges

- a. Usage charges vary depending upon a combination of factors including: the time of day a call is placed, the distance between the calling and the called party, the duration of the call, and the network facilities over which the call was placed. Calls beginning in one rate period and ending in another will be billed at the rate applicable to each portion of the call.
- b. Chargeable time begins when the Company receives signaling to detect that the network connection between the calling party and the called party has been established. Chargeable time ends when either party "hangs up" thereby releasing the network connection.
- c. Unless otherwise specified, residential calls are measured and billed for an initial period of 60 seconds and timed in 60-second increments. Fractional minutes of use are rounded up to the next full minute. The call rating is rounded to the nearest full cent. Rate quotes are provided in 60 second increments.

15. Monthly Recurring Charges

Monthly Recurring Charges are fixed fees applicable to certain service offerings set forth herein. Such charges vary depending upon the physical requirements of the customer and the characteristics of the service arrangement utilized by the customer. Monthly recurring charges for dedicated access arrangements may include an amount charged by a local access provider. Customers may elect to be billed directly for local access facilities.

16. Volume Discounts

Customers whose total monthly usage equals or exceeds a minimum level may be eligible for a volume discount. The amount of the discount is generally based upon the customer's total monthly usage charges for all services; such usage may be measured for each rate period over all access lines in a service group. The Company reserves the right to discontinue Volume Discounts to customers who are delinquent in payment for services provided by the Company. Volume discounts are not applicable to monthly recurring charges, installation charges, fees for special features and functions, administrative or physical change charges, or minimum monthly usage charges.

17. Allowance For Interruptions

- a. The customer may be eligible for an Allowance for Interruption in service, subject to the following conditions:
 - (1) A Service Interruption shall be deemed to have commenced upon verifiable notification thereof by the customer to the Company, or when indicated by network control information actually known to the Company's personnel, whichever is earlier. Each such interruption shall terminate upon restoration of the affected service, as determined by the Company.
 - (2) An Allowance for Interruption shall be granted only for Service Interruptions resulting from the unavailability of the circuits arranged by the Company to the customer and shall not be granted if the interruption of any service is due to an outage or other defect occurring in the facilities furnished by any other carrier.
 - (3) An interruption period begins when the customer reports to the Company that the service has been interrupted and releases it for testing and repair. An interruption period ends when the service is restored. If the customer reports the service to be inoperative but declines to release it for testing and repair, the service is deemed to be impaired, but not interrupted.
 - (4) If the customer elects to use the services of another carrier after any of the above interruptions, or during a period when the customer is unable to place a call using the Company's services, the customer shall pay the charges for the alternative service used.
 - (5) For services that are subject to a monthly recurring charge, allowances for interruptions will be determined as follows:
 - (a) When service is interrupted for a period of less than two hours, no credit allowance will be given.
 - (b) When the service is interrupted for a period of two to 24 hours, the amount of the credit allowance shall not exceed 1/30 of the monthly recurring charge or charges for the circuit.
 - (c) When the service is interrupted for a period over 24 hours, the amount of the credit allowance shall not exceed 1/30 of the monthly recurring charge or charges for the circuit multiplied by the number of 24 hour periods during which the service was interrupted.

 - (b) Interruptions that are due to the failure of power, equipment, systems, or services not provided by the Company.

25. Toll Free Numbers

- a. The Company will make every effort to reserve toll free (8xx) vanity numbers on behalf of customers, but makes no guarantee or warranty that the requested toll free number(s) will be available or assigned to the customer requesting the number.
- b. If a customer accumulates undisputed past-due charges, the Company reserves the right not to honor the customer's request for a change in toll free service to another carrier (e.g., "porting" of the toll free number), including a request for a Responsible Organization (Resp. Org.) change, until such time as all charges are paid in full.
- c. Toll free numbers shared by more than one customer, whereby individual customers are identified by a unique Personal Identification Number, may not be assigned or transferred for use with service provided by another carrier. Subject to the limitations provided elsewhere in this Section, the Company will only honor customer requests for change in Resp. Org. or toll free service provider for toll free numbers dedicated to the sole use of that single customer.
- d. The Company shall have no liability to customer or any third party with respect to any premature or incorrect publication or advertisement of a toll-free number. Requests for toll-free numbers are controlled by an independent agency based on number availability at the time an order is submitted to the agency.
- e. The customer may not reserve or activate a toll-free number for the primary purpose of selling, brokering, bartering, or releasing the toll-free number for a fee or other consideration. The customer has no proprietary interest in any toll-free number, but does have a qualified control interest in its active toll-free numbers. If, upon cancellation of its Company-provided toll-free service, the customer does not submit a written request for the appointment of a new responsible organization or service for its toll-free numbers within 20 days after such cancellation. The customer releases all rights to use or control such toll free numbers. The customer is subject to any toll-free service policies and procedures implemented by the Company, from time to time.

26. Mileage Between Rate Centers

a. The mileage between rate centers (for switched voice and data services) and Points of Presence (for Data Services) is calculated based on V & H coordinates as obtained by reference to National Exchange Carriers Association (NECA) Tariff No. 4.

b. Method of Calculation

The airline mileage between two service locations is calculated as follows:

$$\text{Mileage} = \sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

Where V1 and H1 are the V and H coordinates of point 1 and V2 and H2 are the coordinates of point 2. The mileage is rounded up to an integer value to determine the airline mileage. 2.

27. Determination of Call Duration and Timing of Calls

a. For Direct Dialed and Operator Station Calls, chargeable time begins when the connection is established between the calling station and the desired telephone, attendant board, or private branch exchange console. For Person-to-Person calls chargeable time begins when the designated party comes on the line, or when the caller agrees to speak with a substitute party.

b. Chargeable time ends when the connection is terminated.

c. Chargeable time does not include the time lost because of known faults or defects in the service.

d. The initial and additional timing periods for billing purposes vary by product and are specified in this Section, following.

e. The Company will not bill for unanswered calls. When a customer indicates that he/she was billed for an incomplete call, CenturyLink will reasonably issue credit for the call.

28. Time of Day Rate Periods

For time of day sensitive services, the appropriate rates apply for day, evening and night/weekend calls based on the following chart:

	MON	TUES	WED	THUR	FRI	SAT	SUN
8:00 AM TO 4:59 PM	DAYTIME RATE PERIOD OR PEAK RATE PERIOD						
5:00 PM TO 10:59 PM	EVENING RATE PERIOD OR OFF PEAK RATE PERIOD						EVE
11:00 PM TO 7:59 AM	NIGHT/WEEKEND RATE PERIOD OR OFF PEAK RATE PERIOD						

Day, Evening, and Night/Weekend times are determined by the local time of the location of the calling service point. Chargeable time for a rate period (e.g. 8AM-5PM) begins with the first stated hour (8AM) and continues to, but does not include, the second stated hour (5PM). The rate applicable at the start of chargeable time at the calling station applies to the call during the duration of the call that is applicable to that time period. If a call begins in one discount period and ends in another, the initial period discount applied is the discount in effect at the time the call is established. The charge for each additional minute of usage is the additional minute billing rate of the rate period in which the beginning of each minute occurs.

The following service is provided by CenturyLink Communications, LLC (f/k/a Embarq Communications, Inc.)

1. General Description

The Company provides the service of connecting customers to a nationwide Directory Assistance operator for a per-call charge for intrastate information requests. Customers can receive up to two numbers per request. In order to obtain two numbers, the customer must request two numbers once the customer reaches the live operator. Requests for information other than telephone numbers will be charged for as requests for telephone numbers.

National Directory Assistance Service gives a customer the option of completing a call to the called station telephone number received from the Directory Assistance operator without hanging up and originating a new call. When two numbers are requested from Directory Assistance, only the second call can be completed. The call completion fee will not apply if the call cannot be completed.

When a Company Operator assists with a Directory Assistance call, the appropriate operator handling charges will apply, in addition to the Directory Assistance charge.

Requests will be limited to two (2) per call. A credit allowance for Directory Assistance will be provided, upon request, if the subscriber experiences poor transmission quality, is cut off, receives an incorrect telephone number or misdials the intended Directory Assistance number.

3. Rate Elements

a. Mileage

Mileage provides for the transmission facilities between two customer POTs. Mileage is comprised of a fixed rate element and a per mile rate element. Mileage is measured by airline miles between the customer's Points of Termination (POT), using the V & H Coordinates method.

b. Multiplexing

Multiplexing provides the ability to convert a higher speed channel to several lower speed channels, or to combine several lower speed channels into a single higher speed channel. Multiplexing is offered to On-Net to On-Net customers only. The multiplexing hierarchy, is as follows:

- DS3 channelizes to 28 DS1s
- OC3 channelizes to 3 DS3s
- OC12 channelizes to 4 OC3s
- OC48 channelizes to 4 OC12s

There are two types of multiplexing:

- Customer premises multiplexing, where the signal will be dropped to a lower bandwidth to different areas of a building, or
- Vendor multiplexing, that occurs in the carrier POT and gives the vendor different speed signals.

c. Node

The Node provides for the communication path between a customer's designated premises and the POT to the CenturyLink network. A Node element applies per service, e.g. DS1 or DS3 terminated at the customer's premises.

4. Rates and Charges

Rates and Charges for MPL will be developed on an Individual Case Basis (ICB) arrangement in response to a bona fide request for service from a customer or prospective customer. ICB rates will be offered to customers in writing and will be made available to similarly situated customers.

There is no change to rates or to the service and existing customers may retain the service as long as the Company continues to offer it.

1. Terms and Conditions

In addition to the terms and conditions specified in Section 2 of this Catalog, the terms and conditions specified following apply to Data Services.

a. Application For Service

Application for Service is the Company order process that includes technical, billing and other descriptive information provided by the customer which allows the Company to provide requested communications services for the customer and customer's authorized users. Upon acceptance by the Company, the Application for Service becomes a binding contract between the customer and the Company for the provision and acceptance of services.

An Application for Service may be changed by customer upon written notice to the Company, subject to acceptance and confirmation by the Company, provided that a charge shall apply to any change when the request is received by the company after notification by the Company of the acceptance and confirmation. Such charge shall be the sum of the charges and costs for access facilities and other services and features and the lesser of (i) the monthly recurring rate for each service component that has been canceled as a result of the change times the appropriate minimum service period, plus the applicable installation or non-recurring charges, and (ii) the costs incurred by the Company in accommodating each change, less net salvage

1. Terms and Conditions

a. Application For Service (Cont'd)

If the customer or applicant delays activation of his service during the period thirty (30) days preceding the scheduled installation date for a period of more than one (1) week, normal charges for local distribution facilities (LDF) shall apply from the scheduled date of installation. In the event that the customer-induced delay exists for more than thirty (30) days after the scheduled installation date, the Company may consider the delay a cancellation of application for service.

If special construction has been started prior to cancellation, a charge equal to the costs incurred in the special construction, less net salvage, applies. In determining the charge, cancelled service is treated as discontinued as of the date on which it was to have started when the Company incurs any expense in connection therewith or in preparation therefore which would not otherwise have been incurred, provided that the customer or applicant had advised the Company in writing not to proceed with the installation or special construction.

If the Company should assume a termination liability or other obligation for an access facility, that liability or obligation shall be the responsibility of the Company's customer.

Cancellation of Application For Service

When the customer or applicant has requested the Company to cancel the application for service prior to service installation, cancellation charges will apply. Cancellation charges for both the underlying services and Local Access Facilities will be based on the stage at which the Access Service Request ("ASR") is at, either the Pre-Access Service Request ("Pre-ASR") or the Post-Access Service Request ("Post-ASR") stage.

The Pre-ASR stage is when the ASR is complete but has not yet been sent to the Local Exchange Company ("LEC") or the Alternate Access Vendor ("AAV"). The Post-ASR stage is when the ASR is complete and has been sent to the LEC or AAV.

The amount of the cancellation charge will vary according to the category of service ordered and at which stage the cancellation occurred (Pre-ASR or Post-ASR). Categories of services are: (1) the Service Component based on IXC ordered and; (2) the Access Component based on type of access ordered. See Service Cancellation Charges in this Catalog.

The Company, without incurring any liability, may disconnect or refuse to furnish any toll free service to a customer that fails to comply with these conditions. If customer or its affiliates, subsidiaries, or agents breach these representations or warranties, this agreement will terminate immediately and subject customer to the liability imposed for termination by the Company for material breach. These provisions are not intended to prohibit resale, but are intended to prevent misrepresentations by resellers in an attempt to circumvent the rules or regulations of the FCC, or other governmental bodies with jurisdiction over the provision of communications services for resale.

Customers may subscribe to Private Line Services under one, two or three year term plans. The rates in effect for Private Line Services and Local Access Facilities at the time the customer commits to a term plan will be fixed for the duration of the term plan. The term will begin on the first day of the month following the date the service is installed and available. Upon expiration, the term will be automatically extended at the term plan rates for successive ninety (90) day periods, unless sixty (60) days prior to the end of the term or each such extension either (a) the customer or the Company provides written notice to the other that it does not want such extension, or (b) the customer subscribes to another term plan for which the rates of the new term will apply.

If additional customer sites are added to a customer's Private Line Service after the initial subscription to a term plan, such sites will be incorporated into the customer's term plan and will have the same termination date as the customer's original term plan. Existing customers may subscribe to a new term plan for Private Line Services of the same or greater value prior to the end of the customer's existing term plan without incurring any termination liability if the new term plan extends beyond the old term plan termination date by at least one year or if the new term plan is for three years.

- d. Termination Liability

To terminate Private Line Services the customer must provide the Company with thirty (30) days prior written notice.

Customers terminating service prior to fulfilling their term commitment will be assessed a termination liability in an amount equal to a lump sum of fifty percent (50%) of the monthly recurring charges for each circuit cancelled multiplied by the number of months remaining in the term plan. Customer will not have any termination liability if another Company service of the same or greater monthly price and volume and a term no less than the remaining months of the term plan or one (1) year, whichever is greater, is ordered at the same time the notice of termination is received. Customer will also be liable for a pro-rata amount of any waived installation charges based on the number of months remaining in the term plan.

If service is terminated by the Company for cause and the customer has subscribed to service under a term plan, the customer will be charged the termination liability associated with the term plan.

1. General Description

Metro Optical Ethernet (MOE) Service is a flexible, easy-to-use, transport service that uses established Ethernet transport technology. MOE allows customers to connect multiple enterprise locations within a service area using native Ethernet protocol. MOE supports transmission speeds as low as 5 Mbps and up to 1 Gbps.

Customers may choose to connect to a 10/100 or 1,000 Mbps port on the Company network. A nonrecurring charge applies per MOE Port.

3. Bandwidth Profile

The Bandwidth Profile is bandwidth provisioned over the MOE Port and a monthly rate is assessed per Bandwidth Profile. Customers may subscribe to one of the following:

- 10/100 Mbps Ports: 5 Mbps, 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps and 100 Mbps

A. Frame Relay Service

1. General Description

- a. Frame Relay Service is a public, fast-packet data network service that employs a form of packet switching analogous to a streamlined version of X.25 networks. The packets are in the form of "frames", which are variable in length, with the payload being anywhere between 0 and 4,096 octets. Frame Relay Service supports a variety of simultaneous data applications over a single integrated facility such as data, voice, and video. Transmission of frames between the user sites is on the basis of Permanent Virtual Circuits (PVCs) which are predetermined paths specifically defined in the Frame Relay routing logic. The following Usage Parameters for traffic control and congestion control apply to particular virtual circuits on Frame Relay Service:

- Committed Burst Size: The maximum data rate that the Company agrees to handle over a subscriber link under normal network operation conditions.
- Excess Burst Size: The maximum data rate that the Company's network will attempt to transport over a specified period of time, known as the Measurement Interval. At the Company's discretion, the Company may mark the excess frames as Discard Eligible (DE).
