

## RATE COMPARABILITY – ATTACHMENT F

In Nebraska, Charter will employ its nationwide pricing structure (called Spectrum Pricing & Packaging), which offers standardized pricing for each speed tier of broadband internet service Charter offers new customers across its 41-state service territory. Charter’s pricing strategy ensures that rural customers receive the same pricing as other highly competitive areas in the state and country. Charter’s wireline broadband offerings currently include no data caps, usage-based pricing, early termination or modem fees, long-term contracts, or metered “pay-as-you-go” service.

Current prices for Charter’s Spectrum Internet Assist, Spectrum Internet, Spectrum Internet Ultra and Spectrum Internet Gig service tiers are as follows (all rates, speeds and terms of service stated herein are subject to change):

**Table: Standard Charter Wireline Broadband Service Offerings and Prices**

Speed Tier <sup>1</sup>	Downstream Mbps	Upstream Mbps	Standard Monthly Rate – without Promotional Pricing <sup>2</sup>	Installation Fee
<b>Spectrum Internet Assist<sup>3</sup></b>	30	4	\$17.99	\$0.00 <sup>4</sup>
<b>Spectrum Internet</b>	300	10	\$74.99	\$49.99
<b>Spectrum Internet Ultra</b>	500	20	\$94.99	\$49.99
<b>Spectrum Internet Gig</b>	1000	500 <sup>5</sup>	\$114.99	\$49.99

In addition to the standard, non-promotional rates itemized above and the digital equity and inclusion programs described in more detail in Attachment J, Charter may also offer promotional pricing, including bundled discounts. Charter’s current promotional offerings can be found at <https://www.spectrum.com/internet>. (All promotional offers are subject to change and may not be available in all areas or to all customers.) Charter’s terms of service will apply to all tiers of service.

Recognizing the importance of fast, reliable service for community institutions, Charter also offers 10 Gbps symmetrical speeds to large businesses, schools, libraries, hospitals, and other important community institutions through customized dedicated builds by its Spectrum Enterprise business organization. This Application does not include the costs of such customized builds; however, Charter’s network presence in potential project areas would better position the company to make such offers available.

**Because of our nationwide pricing structure that allows our rural customers to receive the same price as those in dense, competitive, urban areas, Charter cannot agree to maintain the rates reflected in**

<sup>1</sup> Represented pricing is for wireline broadband service only. In addition to wireline broadband services, Charter will also offer video, voice, and mobile services in the grant area.

<sup>2</sup> Customers can add Wi-Fi for \$5.00 per month.

<sup>3</sup> Spectrum’s Internet Assist program provides 30 Mbps broadband to qualified families with children on the National School Lunch Program or seniors receiving supplemental income.

<sup>4</sup> For self-installation only. Additional fees may apply for professional installation.

<sup>5</sup> Speeds of up to 1000/500 Mbps are only available in FTTP areas. HFC speeds are up to 1000/35 Mbps.

**this application within the Project area for a minimum of five years following completion of the Project. Instead, we propose to maintain rate comparability between the areas supported by Broadband Bridge Program funding and other areas in Nebraska, consistent with the nationwide pricing structure discussed above.**
