

Attachment D – Noncontiguous Explanation

Charter's Cass County, NE project is "noncontiguous." By utilizing our existing network infrastructure in Plattsmouth, Nebraska, Charter will be able to expand access to unserved and underserved areas of unincorporated Cass County located to the west and south of Plattsmouth. By including both geographic areas, which are not contiguous to each other but are both connected to our existing network in the City of Plattsmouth, we are able to lower the required subsidy to serve all of the unserved and underserved addresses in the proposed project area.
