

Applicant: Consolidated Telephone Company (“Consolidated”)

Project Area: Hyannis Unserviced

Attachment G: Business Plan

The project proposal is to construct Fiber to the Premise (FTTP) facilities to all the homes and businesses in the Purdum project area. All fiber cable will be placed under ground to provide the highest quality, most reliable and resilient network possible. The expected useful life of the fiber facilities is 25 years and the expected life of the electronic used with the fiber is 11 years. Consolidated has engaged Consolidated Companies, Inc. to construct the fiber facilities that will be connected to our fiber transport ring carrying internet traffic routing to both Denver and Chicago.

The project will require permits from the State, the County, and, if necessary, permits for railroad undercrossing along with occupancy of rights of way. Such permits are routine and Consolidated does not expect any legal challenges in obtaining the necessary permissions.

Consolidated has been providing telecommunications service in rural Nebraska since 1947. The company has grown considerably during those 75 years and has worked to keep services competitive and meet the needs of our customers. Consolidated’s Form M regulatory filings show that the company has a strong balance sheet and does not present a credit risk to its stakeholders, including owners, lenders, regulators, vendors, and customers. The company has been operated conservatively and is in strong financial position to continue operation for years to come.

The estimated average revenue per month is \$83.00. This estimate includes revenues from broadband service along with other telecommunication service revenues. A projection of revenues, expenses, and take-rates are included in the detailed schedules along with a 25-year net cash flow.
