TARIFF FORMAT

Page Numbering. Page numbers appear in the upper right hand corner of the sheets. Pages are numbered sequentially. From time to time new pages may be added to the tariff.

Check Sheets. When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions are designated by an asterisk (*). The tariff user should refer to the latest check sheet to find out if a particular page is the most current one on file with the Commission.

B. Terms and Conditions

1. Main Station Service

- a. Complete temporary suspension of service is available to customers for any class of business, residence or rural individual service.

Special arrangements are furnished only at the customer's request. In the event that special arrangements are provided, the charges will be determined from the estimated cost of providing such arrangement.
- B. Estimated cost consists of an estimate of the following items to the extent that they are applicable:
- Cost of maintenance.
 - Cost of operation.
 - Depreciation on the estimated cost installed of any facilities provided, based on the anticipated useful service life of the facilities with an appropriate allowance for the estimated net salvage.

 - Any other specific items of expense associated with the particular situation.
 - A reasonable amount, computed on the estimated cost installed of any facilities provided, for return and contingencies.

2.1 Establishing and Furnishing Service (Cont'd)

2.1.7 Termination of Service

A. Initial Service Periods

1. The initial service period for service and facilities is one month, except as otherwise specified.
2. Initial service periods for service or facilities of any class will be greater than those specified herein whenever that is required in order for the Company to protect itself from making a hazardous investment because the customers location or the character of the service required is such that upon termination of the customer's contract the facilities which have been constructed or installed to render the service are not likely to be useful for furnishing service to any other customer.
3. Initial service periods may be less than those specified herein whenever the Company, at its discretion, deems it appropriate other than for Basic Local Exchange Services or Message Telecommunications Services.
4. Service for which the initial service period is one month may be terminated prior to the expiration of such period only by payment of charges for the entire initial period. The charges for any supplemental item of service or facilities furnished in connection with such service shall, however, be terminated in accordance with the conditions applicable to that item of service or facilities.
5. No charge is made for discontinuing any or all of the service or facilities furnished a customer, provided the initial service period for the service or facilities to be discontinued has expired and that any minimum charges for items of service or facilities have been paid in full.

2.1 Establishing and Furnishing Service (Cont'd)

2.1.7 Termination of Service (Cont'd)

B. Termination Liability/Waiver Policy

Services provided via service agreements may be subject to the Termination Liability/Waiver Policy. This policy applies only to services that specifically reference this Termination Liability/Waiver Policy in their respective section of this Tariff.

1. Definitions

Minimum Billing Level

When services are provided under a service agreement, a Minimum Billing Level will be established for use in calculating discontinuance charges. The Minimum Billing Level is 100% of the total monthly rates for the service provided under the customer's service agreement, unless otherwise specified.

Minimum Service Period

When services are provided under a service agreement, a Minimum Service Period may be established. This would be the period of time that the 100% factor of the Termination Liability Charge would apply.

2. Complete Disconnect

If the customer chooses to completely discontinue service, at any time during the term of the agreement, a termination charge will apply, unless the customer satisfies the conditions specified in the Waiver Policy. The termination charge is 100% of the rates for the Minimum Service Period, if applicable, plus the Minimum Billing Level multiplied by the termination liability percentage specified in the service agreement, for the remaining term of the agreement.

- For example, if the customer discontinues service after 17 months of a 3-year (36 months) agreement, the termination charge will be the Minimum Billing Level for the service multiplied by the termination liability percentage, multiplied by 19 months.
- If the customer discontinues service after 6 months of a 3-year (36 month) agreement, with a 1-year (12 months) Minimum Service Period, the Termination Charge will be 100% of the Minimum Billing Level for the remaining 6 months of the Minimum Service Period, plus the Minimum Billing Level multiplied by the termination liability percentage, multiplied by 24 months.

2.1 Establishing and Furnishing Service (Cont'd)

2.1.7 Termination of Service (Cont'd)

C. Termination Liability/Waiver Policy (Cont'd)

1. Partial Disconnect

If the customer discontinues a portion of their service, and that causes the customer's monthly billing level to fall below the Minimum Billing Level of the agreement, a termination charge will apply to the portion of the service agreement that is below the Minimum Billing Level.

2. Waiver Policy

A termination charge will be waived when the customer discontinues their contracted service(s), provided all of the following conditions are met:

- The customer signs a new service agreement for any other Company provided service(s);
- Both the existing and the new service(s) are provided solely by the Company;
- The order to discontinue the existing service(s) and the order to establish the new service(s) are received by the Company at the same time;
- The new service(s) installation must be completed within 30 calendar days of the disconnection of the old service(s), unless the installation delay is caused by the Company;
- The total value of the new service agreement(s), excluding any special construction charges and any other nonrecurring charges, is equal to or greater than 115% of the remaining value of the existing agreement(s);
- A new minimum service period goes into effect when the new service agreement term begins;
- The customer agrees to pay any previously billed, but unpaid recurring, and any outstanding nonrecurring charges. These charges cannot be included as part of the new service agreement;
- All applicable nonrecurring charges will be assessed for the new contracted service(s).

2.2 Payment for Service

2.2.1 Customer Responsibility

The customer is responsible for payment of all charges for facilities and services furnished at the customer's request, including charges for long distance services originated, or charges accepted, at such facilities. Bills are due when rendered and are payable at any business office of the Company, or at any other location designated by the Company. Failure to receive a bill does not exempt the customer from prompt payment of the account.

2.2.2 Payment of Bills

A. Rendering of Payment

1. Late Payment Charge

- a. A charge, at a rate not to exceed rates established by law, applies to unpaid amounts of \$15.01 or more. The charge on the unpaid amount of the account will be computed from the date of billing unless the account is fully paid within 30 days from that date. The date of billing shall mean the date the customer's bill is prepared by the Company. The 30 day period may be extended or changed by an agreement in writing.
- b. Collection procedures and the requirement for a deposit are unaffected by the application of a late payment charge.
- c. The late payment charge does not apply to final bills, one-time miscellaneous bills, bills rendered or mailed late, or first month bills for a telephone number change.
- d. The late payment charge does not apply to unpaid balances associated with disputed amounts. Undisputed amounts on the same bill shall be subject to the late payment charge.

2. Returned Check Charge

An administrative charge is applicable to the customer's account for each occasion that a check, bank draft, or an electronic funds transfer item is returned to the Company for the reason of insufficient funds or no account.

CHARGE

Returned Check Charge \$25.00

2.2 Payment for Service (Cont'd)

2.2.3 Advance Payments

- A. Except as hereinafter provided, applicants for telephone service are required to pay in advance, at the time the application is made, any nonrecurring charges or installation charges applicable, and to pay the charges for one billing period for exchange service and facilities ordered.
- B. Where charges for construction apply, such charges are collected in advance if circumstances made that advisable in order to safeguard the Company's revenue. In such cases, and in cases where installation and/or nonrecurring charges are based on the cost of labor and material required, any advance payments are estimated and any adjustments which may be necessary are made when the work is completed.
- C. Advance payments are not required for service furnished customers whose financial responsibility is a matter of general knowledge. This also applies to Federal, State, County and Municipal governments.

2.2 Payment for Service (Cont'd)

2.2.4 Deposits

A. Deposit Requirements

1. Applicants for service unable to establish a satisfactory credit rating with the Company or existing customers whose credit rating has become impaired will be required to make a cash deposit equal to two months of recurring charges to be held as security for the payment of bills for telephone service.
2. Qualifying applicants for the Lifeline Service Program may initiate service without paying a deposit if they voluntarily elect to have Toll Restriction on their line. Toll Restriction will be provided at no charge to Lifeline Service customers.
3. The amount of such deposit shall not exceed the amount of charges for telephone service which it is estimated will accrue for a period of two months.
4. When service is terminated, any balance of the amount deposited remaining after deduction of all sums due the Company will be returned to the customer, or the deposit may be returned at anytime previous thereto at the option of the Company.

B. Interest on Deposits

Interest at the rate of 7% per annum, will be paid on all deposits.

C. Deposit Alternatives

A Deposit Alternative may be available to residential service applicants. Residential customers may choose to subscribe to an individual exchange access line for local calling in lieu of a deposit for a full service arrangement. The access line is equipped with Toll Restriction and Billed Number Screening.

2.2 Payment for Service (Cont'd)

2.2.5 Adjustment of Charges

A. Interruptions

1. The Company shall make all reasonable efforts to prevent out of service conditions. Out of service is defined as:
 - a. The customer has lost the ability to either originate or receive calls from a premise or location such as residence, place of business or office location, or
 - b. A central office line or trunk cannot be used to either originate or receive calls.
2. In the event of an out of service condition, which is not due to the negligence or willful act of the customer, a pro rata adjustment will be made of any fixed monthly or annual charges for the service, and facilities affected by said out of service conditions as follows:
 - a. When the out of service period extends beyond 24 hours, the charges for the service affected will be voluntarily adjusted on a pro rata basis for the duration of the service outage from the time it is reported to or detected by the Company.
 - b. If, in the judgment of the Company, circumstances prevent a customer from notifying the Company of an outage of service, the requirement for notification to or detection by the Company may be waived. If known by the Company, the period adjusted will begin with the time at which the out of service occurred. If all other cases, this period will be considered to have begun at the time the customer first became aware of the service outage.
 - c. When an out of service condition reported to the Company continues for a period of less than 24 hours, adjustments for such outages will be made, if in the opinion of the Company, circumstances so warrant.

2.2 Payment for Service (Cont'd)

2.2.6 Payment Plans

A. Installment Billing for Nonrecurring Charges

1. Non recurring charges for service provided or work performed by the Company (including, but not limited to, charges establishing or changing service, installation and special construction charges and final bills for service) are normally payable in full upon presentation of the bill.
2. When both the Company and the customer agree, a nonrecurring charge may be paid in consecutive monthly installments. The commencement of the date of payment of each consecutive monthly installment shall be determined by the Company's billing schedule. (No more than 24 monthly installments will be permitted for any single transaction.)
3. If a customer fails to pay any of the installments when due, the Company may, at its option, declare the unpaid balance immediately due and payable. Upon such default, the Company may exercise any and all remedies available to it by law including the right to terminate telephone service.
4. The customer shall have the option to prepay the entire unpaid balance at any time.

2.3 Limitations of Liability

2.3.1 Limitations

- A. The services furnished by the Company, in addition to the limitations set forth herein, are subject to the following limitations: The Company shall not be liable for damage arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission or other injury, including but not limited to injuries to persons or property from voltages or currents transmitted over the service of the Company, caused by customer-provided equipment (except where a contributing cause is the malfunctioning of a Company-provided connecting arrangement, in which event the liability of the Company shall not exceed an amount equal to a proportional amount of the Company billing for the period of service during which such mistake, omission, interruption, delay, error, defect in transmission or injury occurs).
- B. The Company's liability, if any, for its willful misconduct is not limited by this catalog. With respect to any other claim or suit, by a customer or by any others, for damages associated with the installation, provision, preemption, termination, maintenance, repair, or restoration of service, the Company's liability, if any, shall not exceed an amount equal to the proportionate part of the monthly recurring charge for service for the period during which the service was affected. This liability shall be in addition to any amounts that may otherwise be due the customer under this catalog as an allowance for interruptions.
- C. Defacement of Premises

The Company is not liable for any defacement or damage to the customer's premises resulting from the existence of the Company's facilities on such premises, or from the installation or removal thereof, when such defacement or damage is not the result of the negligence of the Company.

D. Transmission of Messages

The function of the Company is to furnish means of communication between telephone stations. Acceptance, by employees, of written or verbal communications from the public, for transmission or delivery, is forbidden.

E. Outgoing and Incoming Service Privileges

2.4 Responsibilities of Parties

2.4.1 Company Responsibility

A. Maintenance and Repair

Except under conditions involving their outright sale, facilities furnished by the Company on the premises of a customer, authorized user or agent of the Company, are the property of the Company. They are provided upon the condition that such facilities must be installed, relocated, rearranged, tested, inspected and maintained by the Company, and that the Company's employees and agents may enter said premises at any reasonable hour for such purposes and to make collection from coin-box telephones or, upon termination or cancellation of the service, to remove such facilities.

B. Performance of Work on Customers' Premises

1. It is contemplated that all work on customers' premises can be performed during regular working hours. If a customer requests that work be performed during hours which results in overtime or premium rates of pay, a charge may apply in addition to other rates and charges which may be applicable, equal to the amount of overtime or premium time payments.
2. It is also contemplated that all installation, removals, service connections, moves and changes requested by a customer be performed without the Company incurring unusual costs. If a customer requests that work be performed in a special manner or at a special time which results in unusual costs, a charge equal to the amount of unusual costs may apply in addition to other applicable rates and charges.

All ordinary expense of maintenance and repair, unless otherwise specified in the Company's catalogs or in the contract for the use of the facilities will be borne by the Company

- a. The telephone facilities furnished shall be carefully used and cared for by the customer and shall be surrendered to the Company upon termination of the customer's right of use, in as good a condition as when received, ordinary wear and tear excepted.
- b. In case of damage to, or destruction of, any of the said facilities, due to negligence or willful act of the customer, the customer shall pay either the cost of replacing the facility or the cost of restoring the facility to its original condition.

2.4 Responsibilities of Parties (Cont'd)

2.4.2 Customer Responsibility

A. Transmission of Messages

The customer indemnifies and saves the Company harmless against claims for libel, slander, infringement of copyright arising from the use of material transmitted over its facilities, or infringement of patents arising from combining with or using in connection with, facilities of the Company, apparatus or systems of the customer; and against all other claims arising out of any act or omission of the customer in connection with facilities provided by the Company.

B. Protection of Equipment and Facilities

Customers shall protect the facilities of the Company used to render the service to them and located upon their premises and grounds against other users and uses of their property. When, in the judgment of the Company, such other users or uses would impair any Company service or constitute a hazard to Company property or to the safety of its employees, special precautions may be required.

C. Lost and Damaged Equipment

Customers of the Company will be responsible for loss of or willful damages to, facilities provided by the Company for use by customers on their premises.

SECTION 4: CONSTRUCTION CHARGES AND OTHER SPECIAL CHARGES

4. Construction Charges and Other Special Charges

4.1 General

- A. All rates and charges quoted in the Section 5 of this Tariff and in other sections of this catalog provide for the furnishing of associated channel equipment or facilities where plant facilities are available or when the construction of the necessary facilities does not involve unusual costs. Likewise the rates and charges quoted in this Tariff contemplate the use of associated channel equipment and wiring of standard type and finish.

Under certain conditions, in other sections of this Tariff, construction charges are made to cover all or a portion of the unusual costs involved in the establishment of service, in addition to the rate for the class of service furnished, and any nonrecurring charges, mileage charges, or other charges that may apply. Also, where special arrangements or assemblies of associated channel equipment or wiring are desired, special charges are made as indicated. The Company may, at its discretion, modify requirements and charges to allow it to respond to competition.

B. Terms and Conditions

1. If the customer desires, he may furnish labor or material, or both, as part or whole payment for construction charges for pole or wire construction outside of base rate areas of exchanges, provided the labor and material furnished are in conformity with the Company's specifications.
2. When attachments are made to poles of other companies in lieu of providing pole line construction for which the customer regularly would be charged, the cost to the Company for such attachments must be borne by the customer.
3. "Cost", as used in this section, is to be interpreted to mean the cost of labor and material, plus the same proportion of the Company's general operating and supervisory expenses as is applied in the Company's accounts.
4. Except as otherwise provided, all construction is owned and maintained by the Company.

4.1 General (Cont'd)

B. Terms and Conditions (Cont'd)

5. If, to serve a customer, it is necessary to use right-of-way on private property, the customer is required to provide, or pay cost of providing the necessary right-of-way without expense to the Company. Provision and cost of right-of-way is, however, assumed by the Company whenever it is evident that the construction for which the right-of-way is obtained will be required as a part of the properly designed telephone distribution system used for serving customers in the area in which the right-of-way is obtained or beyond such area. If service can be provided by means of construction on a public highway without unusual cost, but the Company elects to provide construction on private property, the cost of obtaining necessary right-of-way in connection with such private property construction is not charged to the customer or customers so served.
6. If a special type of construction is desired by a customer, as when underground service connections are desired in places where aerial drop wires would ordinarily be used to reach customers' premises, or if the unusual requirements of a customer make the cost of an installation higher than it would be if the usual type of construction were used, the customer is required to bear the difference in cost between the special type of construction and the average cost of the usual type of construction.
7. Ordinary business buildings such as office buildings, stores, and factories are equipped with suitable conduit, wire wells or pipes in which to run the wiring and cabling for providing telephone service to customers occupying such buildings. Where buildings are not so equipped, the customer is required to bear such of the costs involved in installing the interior wiring or cabling necessary to provide the service desired as are in excess of what they would be if the buildings were so equipped. Likewise, where, in providing service in residences, the cost of providing the inside wiring desired is excessive, as may be the case where it is necessary to run wires through walls of masonry, the customer is required to bear the excessive costs involved.

4.2 Provisioning Agreement for Housing Developments

A. Description

A Provisioning Agreement for Housing Developments (PAHD) is a contractual arrangement between the Company and the Developer/Builder for the provision of distribution facilities.

B. Terms and Conditions

1. A PAHD is required where Developers/Builders plan to develop four or more lots. Less than four lots will be treated according to the terms set forth under other portions of this section, if applicable.
2. The Company will provide trench and backfill for the facilities. In areas where the Company has trench and backfill agreements with other utilities, the Company may utilize those agreements.
3. To accommodate Developer/Builder coordination schedules, with the Company's approval, the Developer/Builder has the option of placing Company provided facilities in the trench.
4. The PAHD will include, but is not limited to: a description of the development; an addressed, recorded plat; trench and backfill specifications; easements; surface grade requirements; and coordination of inspection schedules.
5. The Company will provide the facilities at no charge to the Developer/Builder as long as the cost does not exceed the established cap, which is based on an average loop investment, times the number of lots in the development. The Company may require payment by the Developer/Builder of all costs in excess of the cap prior to the start of any required construction.
6. Distribution facilities covered in the PAHD cannot be used for subsequent developments until they are covered by a new PAHD.
7. The PAHD may vary terms and conditions as appropriate.

SECTION 5: EXCHANGE SERVICES

5.6 Premium Exchange Services

5.6.1 Custom Calling Services

A. Description

Abbreviated Access

Allows a customer to place a call to a predetermined telephone number by dialing an abbreviated code. Two arrangements are available, namely, Abbreviated Access, one-digit or Abbreviated Access, two-digit.

The customer shares a speed call list with their Abbreviated Access provider and the provider controls the speed call list and informs clients of the digit(s) to dial to reach the predetermined telephone number.

Call Forwarding – Busy Line

Allows a customer to have incoming calls forwarded to another number when the called number is busy. The customer can activate and deactivate the forwarding feature by dialing a code as well as establish or change the number to which calls will be forwarded.

Call Rejection

Enables a customer to reject call attempts from up to 15 numbers of calling parties by dialing a code and the telephone numbers of calls to be rejected. Any call attempts to the customer from these numbers will be prevented from terminating to the customer and will instead be connected to an announcement informing the caller that the call is not presently being accepted by the called party. A customer may also reject future calls from the most recent call received by dialing a code after completing the call.

Call Forwarding – Do Not Answer

Allows a customer to have an incoming call forwarded to another number within the same central office switch if the customer does not answer after a present number of ringing cycles.

Call Forwarding – Variable

Offers the automatic redirection of incoming calls to an alternate telephone number. The alternate telephone number is selected by the subscriber, from the subscriber's service location, as well as the deactivation of the forwarding, from that same serving location.

5.6 Premium Exchange Services (Cont'd)

5.6.1 Custom Calling Services (Cont'd)

A. Description (Cont'd)

Call Waiting

Provides a tone/signal to a customer that has a call in progress, that another call has been placed to that customer's telephone number. The customer may elect to hold the first call, by use of the switchhook, and answer the second call, as well as alternate between calls by pressing the switchhook. The customer may elect not to respond to the signal, and continue the original call.

Call Waiting may be deactivated prior to making an outgoing call, (or during a call if the customer has Three-Way Calling).

A customer with Caller Identification may also receive name and/or number information on a call that is waiting. (The customer must have the appropriate CPE.)

A customer who subscribes to Call Waiting may enhance their service to separately identify local and long distance calls. Different tones will distinguish the two types of calls, whether at the initial ring cycle or in the call waiting mode. There is no additional charge for this Long Distance Alert feature enhancement, nor will the Company charge to add this feature.

A customer who subscribes to Call Waiting may also enhance their service by adding Talking Call Waiting to their line. Talking Call Waiting is an enhancement that provides an audible announcement to the incoming caller's name. The audible announcement consists of the regular Call Waiting tone followed immediately by the calling party's name.

Caller Identification – Name and Number

Allows for the automatic delivery of a calling party's name and telephone number (including nonpublished and nonlisted telephone numbers) to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The name and number are displayed on customer provided equipment.

5.6 Premium Exchange Services (Cont'd)

5.6.1 Custom Calling Services (Cont'd)

A. Description (Cont'd)

Caller Identification – Name and Number (Cont'd)

The name displayed shall be the name associated with the calling telephone number as shown on the Company's records. The Company, in its discretion, may abbreviate or limit that name for display purposes. The Company does not assure name accuracy, and it shall not be liable to any party for errors, omissions or mistakes. The Company's sole and only obligation shall be to reasonably correct errors in names when notified in writing of such errors.

Caller Identification customers who do not wish to receive blocked calls can activate Anonymous Call Rejection by pressing *77 (1177 on rotary phones). The code to deactivate is *87 (1187 on rotary phones). While the feature is activated, incoming blocked calls are routed to an announcement in the central office. Anonymous Call Rejection is automatically available to residence subscribers of Caller Identification and to business subscribers where technically feasible.

Caller Identification – Number

Allows for the automatic delivery of a calling party's telephone number (including nonpublished and nonlisted telephone numbers) to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The number is displayed on customer provided equipment.

Caller Identification customers who do not wish to receive blocked calls can activate Anonymous Call Rejection by pressing *77 (1177 on rotary phones). 5.6.1 Custom Calling Services (Cont'd)

A. Description (Cont'd)

Customer Originated Trace

Allows a called party to initiate an automatic trace of the last call received. Customer Originated Trace is available on a 30 day basis or on a per usage basis. After receiving the call which is to be traced, the customer dials a code and the traced telephone number is automatically sent to the Company for further action. The customer originating the trace will not receive the traced telephone number. The results of a trace will be furnished only to legally constituted law enforcement agencies or authorities upon proper request by them. The Company is not liable for damages if, for any reason, the Customer Originated Trace attempt is not successful.

Dial Lock

Allows a customer the ability to manage their outbound calls (local, local long distance, and toll) by selectively blocking different types of calls placed from their line. This service will allow blocking to: all non-emergency local calls; long distance calls; international calls; operator assisted; toll free; information services; and directory assistance calls. The customer will select the types of calls they wish to have blocked. Customers may override the blocking at anytime through a personalized assigned PIN code.

Distinctive Ring

Allows a customer to receive an audible Call Waiting tone or Distinctive Ringing signal from a line equipped with Dial Call Waiting. If the called line is idle, a Distinctive Ringing signal will be heard. If the called line is busy, the called line receives a Call Waiting tone.

Hot Line Service

Allows a customer to establish a switched connection to a predetermined number when the customer's telephone goes off-hook. No dialing is required and the call is processed automatically to the predetermined telephone number.

5.6 Premium Exchange Services (Cont'd)

5.6.1 Custom Calling Services (Cont'd)

A. Description (Cont'd)

Last Call Return

Allows a customer to dial a code that will cause the feature to automatically redial the number of the last incoming call to that line, whether the call was answered or not. The customer does not have to know the number of the calling party. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called line is available. This service is available on a usage or subscription basis.

Last Call Return customers who do not wish to receive blocked calls can activate Anonymous Call Rejection by pressing *77 (1177 on rotary phones). The code to deactivate is *87 (1187 on rotary phones). While the feature is activated, incoming blocked calls are routed to an announcement in the central office. Anonymous Call Rejection is automatically available to residence customers of Last Call Return and to business customers where technically feasible; and to monthly (subscription) customers only.

Selective Call Forwarding

Allows a customer to specify a special list of a maximum of 15 telephone numbers. Incoming calls placed to the customer from telephone numbers on that list will automatically be forwarded to a predefined telephone number. All other calls will be handled normally.

Speed Calling

Offers the customer storage of frequently called numbers, with the ability to dial the stored numbers by pressing one or two digits, rather than the entire telephone numbers. Speed Calling is customer programmable, for either 8 or 30 telephone numbers, offering the customer access to change the stored list whenever it is convenient for the customer, and without service order activity.

Three-Way Calling

Offers the capability to add a third party to an existing call, by depressing the switchhook. This service is available on a usage or subscription basis.
