To Whom It May Concern:

I wish to offer my support for Nextlink's application for broadband fiber internet to Filley. Reliable internet service allows me to work from home. During Covid-19, it was difficult to communicate with medical providers with our current DSL service to the very very slow speed internet.

As our society moves more and more to communication over the internet, we must be able to have a service that does not vary due to weather.

I would ask you to look favorably upon their application that will greatly enhance the community.

Sincerely

David A. Norton
