Mr. Matt Effken  
Legal Counsel Nebraska Public Service Commission  
300 The Atrium  
1200 N Street  
Lincoln, NE 68508

Sir,

I am writing in reference to Application No. 911-073/PI-232. I am currently serving as the Fillmore County Emergency Manager and I handle the PSAP's 911 Service System funds. The docket shows that after transition to NG911 our PSAP is able to use the annual funding allocation and set-aside funds for radio consoles. Can mobile and portable radios be considered under this plan?

The mobile system in an emergency vehicle is the final end point for PSAP 911 communication. As the message is received in the PSAP and then transmitted from the PSAP, the message needs to be received in the field, usually by radio, to complete the notification process. I cannot offer statistics on this suggestion but I do feel it would close the loop on 911 call receipt and dispatch.

Thank you for your consideration.

James F. Dunker
