Re: Broadband Bridge Program

Dear Commissioners:

Glenwood Telecommunications, Inc. appreciates the opportunity to resubmit the accompanying application for Broadband Bridge Program funding to assist with construction of a fiber network throughout areas of Fillmore County that do not currently have access to broadband. It will provide connectivity to 242 locations.

This revised application removes all the challenged locations within the city limits of Shickley, Ohioa, Milligan, Exeter, Fairmont and Grafton, along with all the associated cost.

This project is unique in that Glenwood has committed to partnering with Fillmore County to develop the network and best serve local needs. In particular, as demonstrated in the memoranda of understanding submitted with the Application, Glenwood is working with the local governmental bodies to ensure affordable services.

By approving this application, the Commission will not only be helping serve rural customers in Fillmore County but will also be fostering innovation through public-private partnerships.

I would be happy to discuss any questions you or your staff may have about our application.

Respectfully,

Stanley Rouse, CEO/General Manager
Glenwood Telecommunications, Inc.
