

Glenwood Telecommunications, Inc.
Holdrege Airport Area
Attachment D – Noncontiguous Areas

Holdrege Airport Area grant would build fiber-to-the-home as a noncontiguous project. Glenwood has been building fiber-to-home to residences and business in the community and rural Holdrege since 2012. This project is made up of four noncontiguous areas that will connect to Glenwood's existing fiber network already in place.

These areas are noncontiguous and have a natural connection to one another, all within the rural Holdrege exchange in an unserved area. Glenwood respectfully ask that this application be considered as a single project.
