

Glenwood Telecommunications, Inc.
Nora
Attachment F – Rate Comparability Details

Information regarding Glenwood's residential speeds and pricing for each community is readily available on the Glenwood website <https://gtmc.net/residential-internet/>. Subscribers can conveniently navigate to their respective community section and select the internet speed that aligns best with their needs.

The graphic displays four internet packages in a row, each in a white box with a black top and bottom. From left to right: Platinum (\$89.95, 1 Gig), Gold (\$69.95, 700 Mbps), Silver (\$59.95, 500 Mbps), and Bronze (\$49.95, 300 Mbps). The Silver package is labeled 'Most Popular Package!'. The background is light gray with the Glenwood logo on the right and 'SMART CONNECTED COMMUNITY GIG-CERTIFIED PROVIDER' on the left. A note at the bottom states: '*Symmetrical broadband service is available for an additional \$20.00.'

Package	Price	Speed	Features
Platinum	\$89.95	1 Gig	4k Video Streaming, Online Gaming, Multiple Users, Multiple Devices, Work From Home, Business Solutions
Gold	\$69.95	700 Mbps	HD Video Streaming, Online Gaming, Multiple Users, Multiple Devices, Work From Home
Silver	\$59.95	500 Mbps	Video Streaming, Multiple Users, Multiple Devices, Work From Home, Most Popular Package!
Bronze	\$49.95	300 Mbps	Browse the Web, Use Social Media, Check Email

The specified speed tiers and corresponding pricing are universally accessible in all regions served by Glenwood's fiber network. These areas include Bladen, Blue Hill, Campbell, Franklin, Funk, Geneva, Hebron, Holdrege, Holstein, Keystone, Lawrence, Lemoyne, Norman, Roseland, Shickley, Superior, Upland, as well as rural Fillmore and Phelps Counties.

Moreover, the speed and pricing details for services within the proposed service area will seamlessly integrate into Glenwood's existing pricing structure, ensuring consistency and transparency across our service offerings.

Glenwood places a strong emphasis on providing unrestricted access to its services. We do not impose data caps, throttle speeds after usage limits, implement service contracts, or employ metered 'pay-as-you-go' structures. Unrestricted access is a fundamental element of Glenwood's Fiber-to-the-Premises (FTTP) networks. The capability to deliver broadband and internet services without the imposition of data caps or other limitations is integral to ensuring a high standard of service quality. Additionally, our commitment to customer satisfaction is reflected in our policy of not charging subscribers for installation or imposing early termination fees.
