

**Glenwood Telecommunications, Inc.**  
**Thayer County**  
**Attachment D – Noncontiguous Areas**

Glenwood Telecommunications and Thayer County as a Public-Private Partnership are seeking funding for development of broadband infrastructure in unserved rural areas of Thayer County acknowledging broadband connectivity is critical and necessary to general economic growth, for the success of Nebraska's agricultural industry, and the provision of basic services for education, government, public safety, and healthcare.

Glenwood's Thayer County Project as designed will provide fiber broadband connectivity to 75 unserved locations in rural Thayer County by building off Glenwood's existing fiber network already serving Thayer County in the community of Hebron and extending into rural areas.

Glenwood's Thayer County project is made up of five noncontiguous areas that will connect to Glenwood's existing fiber network. These areas are noncontiguous and within different exchanges, but have a natural connection to one another, all within Thayer County. Glenwood respectfully ask that this application be considered as a single project.
