PROPOSED PROJECT MAP

STOCKADE

GREAT PLAINS COMMUNICATIONS is one of the largest privately owned telecommunications providers in the Midwest that serves communities throughout Nebraska, Iowa, Colorado and Indiana. Business and enterprise services range from traditional and cloud-based voice and data products to installation and support of strategic networks with fully scalable, managed Ethernet solutions. Residential services include high-speed Internet, cable and streaming video, local and long-distance phone and whole home WIFI. At the core of its service offering is an extensive 16,500-mile, MEF-certified regional fiber network reaching 13 states fully supported by a 24x7x365 Network Operations Center.

What sets our company apart is our exceptional customer service. From the first customer contact through design, turn-up, testing and maintenance you will work with a local team committed to developing custom solutions to help you achieve your business goals. Operating on the core values of accountability, community, integrity, quality, service and teamwork, we deliver the benefits of a high performing network and high performing people.

LARGEST PRIVATELY OWNED NETWORK IN NEBRASKA

- 99% buried fiber
- Unique routes
- MEF-certified
- Reliability - 99.999% availability on the core
- 16,500-mile fiber network
- Fully meshed transport core network
- Secure fiber network designed with ringed redundancy, scalability and flexibility
- Local presence - technicians strategically located across our fiber footprint

NETWORK OPERATIONS CENTER - QUALITY NEVER SLEEPS

- 24x7x365 network monitoring to ensure superior reliability and connectivity
- Proactive communication and monitoring to customer network
- Central point of contact for all network maintenance
- Rapid response to network outages and alarms

FIBER-DRIVEN SERVICES

POTENTIAL SERVICES FOR RESIDENTIAL AND ENTERPRISE CUSTOMERS

FIBER-DRIVEN BUSINESS-CLASS SERVICES

Standard & Dedicated Internet Access

Symmetrical and asymmetrical bandwidth up to 10 Gbps

Managed WiFi

Cloud-managed solutions with capability to provide guest and private WiFi networks

Managed Ethernet

Point-to-point, point-to-multipoint and multipoint-to-multipoint connections supported 24x7x365 by our Network Operations Center

SD-WAN

Secure, reliable management of wide area networks from branch offices to data centers and the cloud

GPC Cloud Connect

Provides a fast, flexible and secure direct connection to multiple leading Cloud and Network providers on our cloud ecosystem

DDoS Protection

Automated or on-demand attack traffic scrubbing service backed by teams of network security experts

Traditional & Cloud-Based Voice

Solutions ranging from POTS lines, SIP trunks and PRIs to unified communications services

Streaming TV

The latest entertainment, live sporting events and popular features over your business's GPC Internet connection

Business Security

Cloud-based security options including intrusion detection, video surveillance and access control powered by Alarm.com

FIBER-DRIVEN RESIDENTIAL SERVICES

Internet

Speeds ranging from 50 Mbps to 1 Gig

Whole Home WiFi

Personalized and secure home network with GPC Whole Home WiFi, powered by Plume HomePass®

Phone

Clear, reliable landline connection with local and long distance calling options

GPC iTV Streaming TV

The latest entertainment and most popular features delivered to your smart TV or wireless devices over your GPC Internet connection

OUR TEAM

WITH OVER 110 YEARS OF EXPERIENCE

Tony Thakur, Chief Technology Officer

20+ years of experience

As the most senior technology executive in the organization, Mr. Thakur takes responsibility for leading and planning how to attain network growth, cost targets and other metrics required to meet annual corporate goals. Tony plays an integral role in the company's strategic direction and development and has overall responsibility for the long-range direction of technological planning. He establishes, communicates and maintains the technical architecture for corporate production, computing technologies and all network systems while ensuring the architecture can support the growing and changing needs of the business. Mr. Thakur puts his extensive experience to use by contributing to strategic decisions on expanding the fiber footprint, deploying capital, and supporting potential acquisitions, while positioning the company's service offerings as a leader in the communications industry.

Janelle Allison, Chief Operating Officer

15+ years of experience

Ms. Allison supports the mission statement of Great Plains Communications (GPC) by working within GPC's strategic and policy framework to manage the operations of the business by ensuring development of strategic plans, accountability of performance, and mentoring the Operations and Management team. Her extensive industry and company experience allow her to set operations direction while monitoring pricing and initiatives to ensure the company maintains a competitive market position, while meeting strategic growth initiatives.

Chris Wulf, Vice President of Operations

25+ years of experience

Mr. Wulf directs, manages and coordinates activities of the Outside Plant Engineering and Operations Departments. He develops, establishes and evaluates the strategic operations plan for Great Plains Communications and directs and ensures attainment of operational, strategic and financial goals of Great Plains Underground Construction (GPUC) and Business Systems groups. He also directs and designates assignments and responsibilities to State Operations Managers. Chris also determines and specifies equipment needs and schedules and sets budgets and oversees timelines and budgets for his teams.

Travis Radnor, Sr. Director of OSP Engineering

20+ years of experience

Mr. Radnor evaluates and prioritizes short-term and long-term Outside Plant (OSP) projects, evaluates strategic network opportunities and designs fiber optic, copper and coax network routes. He oversees the development of cost estimates for OSP capital budget projects, grant applications, Network Services Group (NSG) proposals and dark fiber Requests for Proposals (RFPs). Travis participates in customer discussions for the development of custom communications solutions as part of the sales process, coordinates joint OSP projects with other companies and evaluates and manages fiber leases.

Eric Halverson, District Manager

20+ years of experience

Mr. Halverson develops a team-oriented commitment to support a positive customer-service culture. He coordinates with all departments to plan and execute territory specific network projects and initiatives and effectively manages a Broadband Technician team. He also proactively engages with the public in the areas he serves to determine needs, enable growth, resolve issues, answer questions and report information back to the corporate office to ensure full community awareness. Eric sets priorities and standards for routine maintenance and network improvements in his respective territory and assists with marketing and sales efforts.

Christina Ramirez, Manager of PMO

15+ years of experience

Ms. Ramirez serves as the manager of GPC's Project Management Office (PMO) for technical and other business-related projects that address a wide variety of large, complex initiatives involving multiple internal departments or external customers. She manages the project management team as they initiate, plan, execute, monitor and close projects while ensuring consistency with the company's strategies, commitments and goals. She coordinates the efforts of team members, vendors, third-party contractors and/or consultants in order to complete defined deliverables. Christina also builds project teams, develops, plans and executes project activities and facilitates all required communications. She efficiently manages changes and ensures high quality control throughout each project's life cycle.

POSITIVE CULTURE AND COMMUNITY IMPACT

GREAT PLAINS COMMUNICATIONS NOT ONLY MAINTAINS A POSITIVE CULTURE AND COMMITMENT TO COMMUNITY, BUT IMPROVES AND ENHANCES PROGRAMS YEAR AFTER YEAR.

Great Plains Communications realizes the need to continue the tradition of giving back to the communities we serve and the need to exude and nurture the strong company culture that has been built over the past century. Therefore, the company continues our ongoing traditions of sponsoring our communities and having employees living, working and giving back to the areas they serve. These efforts and traditions not only solidify and leverage ongoing relationships with clients, they also strengthen and position us for strong growth as the brand gains traction in the marketplace.

COMMITMENT TO OUR SCHOOLS -

Great Plains Communications believes in the power of education. Therefore, we focus on helping students in the communities we serve attend college by offering \$35K in scholarships each year. We also provide over \$25K in annual grants.

SPONSORSHIPS AND DONATIONS -

Great Plains Communications is proud to sponsor and donate to causes and events that help to promote and grow the communities we serve.

VOLUNTEERISM -

With both Integrity and Community as core values, Great Plains Communications believes in giving back. That is why over half of our 350+ employees live and work in the communities they serve. On top of this they actively take part in community causes by donating thousands of hours as firefighters, paramedics, mentors, board members, scout or church leaders and to other community-based organizations.

ECONOMIC DEVELOPMENT -

The GPC Economic Development Committee works to assist communities with growth initiatives. Serving as a true technology partner, the Committee works in tandem with area economic development organizations and local governments to identify opportunities and strategies that not only allow areas to survive, but to grow and thrive leveraging GPC fiber-driven services and capabilities to attract new residents and businesses.

CULTURE -

The internal culture of Great Plains Communications is very collaborative and focused on the core values of accountability, community, integrity, quality, service and teamwork. Employees strive to work together providing a superior customer experience and making a difference in the communities and to the customers served. We pride ourselves on making each other better and living up to our motto:

HIGH PERFORMING NETWORK, HIGH PERFORMING PEOPLE

AFFORDABLE CONNECTIVITY PROGRAM

Great Plains Communications participates in the Affordable Connectivity Program (ACP). The ACP is an FCC benefit program that ensures homes across the nation can afford the Internet connection they need for work, school, healthcare and more.

Eligible households can receive a discount of up to \$30 per month toward Internet service. Those on qualifying Tribal lands could receive a discount of up to \$75. This program also provides a one-time discount of \$100 toward the purchase of a laptop, desktop or tablet computer from participating providers as long as the qualifying household contributes more than \$10 and less than \$50 toward the purchase price.

RECENT EXPERIENCE

IN PROGRESS

After receiving funding grants under the 2021 Nebraska Broadband Bridge Program, Great Plains Communications (GPC) has started constructing Fiber-to-the Home and business networks in the community of Bloomfield, Nebraska. GPC will cut customers over to the fiber in phases as construction is completed. The entire project is scheduled to be completed in summer 2023. The newly installed fiber plant will receive bandwidth from the Great Plains Communications 16,500-mile owned and operated state and regional long-haul fiber network, which will provide multiple 100 Gbps circuits to meet existing and future bandwidth demand.

BLOOMFIELD, NEBRASKA

PROJECT SUMMARY

GPC is in the process of burying 185,000 feet of new fiber optic facility within the city of Bloomfield, Nebraska. Thanks to funding from the Nebraska Broadband Bridge Program, the company will leverage 45,000 feet of existing buried conduit and 49,000 feet of new buried conduit to bring fiber to approximately 603 homes and businesses. The newly installed fiber plant will increase Internet speeds up to 1 Gig in homes and businesses of the community.

COMPLETED

After receiving funding grants under the 2020 Cares Act administered by the Nebraska Department of Economic Development (DED), Great Plains Communications (GPC) began constructing Fiber-to-the Home and business networks in seven Nebraska rural communities in the Fall of 2020. GPC cut customers over to the fiber in phases as construction was completed. Projects were completed in summer 2021. The newly installed fiber plants receive bandwidth from the Great Plains Communications 16,500-mile owned and operated state and regional long-haul fiber network, which will provide multiple 100 Gbps circuits to meet existing and future bandwidth demand.

CALLAWAY, NEBRASKA

PROJECT SUMMARY

Great Plains Communications (GPC) deployed a total of 120,000 feet of fiber throughout the City of Callaway utilizing some of our existing conduit. The original project plan was a combination of aerial and buried conduit. However, GPC was unable to use locally owned poles. Therefore, the original design was revised to be all-buried fiber. As of April 15, 2021, the project is 100% complete and customers have been converted over to fiber.

CREIGHTON, NEBRASKA

PROJECT SUMMARY

The project is a combination of 65% aerial and 35% buried fiber. GPC was able to utilize some existing conduit from a previous Alternative Connect America Model (ACAM) project. There is a total of 113,000 feet of fiber installed throughout Creighton. The project is currently underway with only 50 drops remaining and is scheduled for completion by July 1, 2021. GPC will be required to remove COAX from the Nebraska Public Power District (NPPD) poles by December 31, 2021.
