

## **Attachment C: Documentation of providing 100/100 MBPS Speeds in Nebraska**

Wherever GPC has fiber we can provide at least 100/100 service. Such examples include towns such as Sutherland, Gordon, Deshler, Callaway, North Bend, Creighton and Red Cloud. In those seven towns alone, we have more than 6,500 customers who can receive up to 1 GIG service. We have just recently started rolling out our 2 GIG project.

Through a variety of methods, we market and publicize the availability of fiber and associated speeds. Our website has a new tool that contains many of our fiber areas so that customers can see what is available to them and sign up online. We expect by mid 2023 to have all fiber available locations available in this tool, and will begin working on incorporating other service technologies.

For documentation of delivered speeds, the next several pages show speed test data from Ookla.
