

Hartington Telecommunications Co., Inc._Project C_Attachment Letter F

NBBP Program Year 2023 (C-5484)

Rate Comparability

Applicant provides the following information demonstrating that the retail rates for the proposed service area will be comparable (the same) to those provided in its ILEC service area. The rates charged in its ILEC service area for the offered speeds tiers are shown on the Attachment Letter C_1. Pdf screen shot of what is on web site.

Applicant's plans do not have data caps, do not throttle speeds after usage limits are reached since they do not have usage limits, or have metered "pay-as-you-go" service. There are no long-term contracts and no early termination fees.

Through this Fiber-to-the-Premise project, Hartington will be able to deliver 100/100 Mbps speed to any location within the project area once the project is complete. Speed tiers lower than 100/100 Mbps will also be offered.

Speed Additive

In addition, Hartington will offer speeds in excess of the 100/100 Mbps minimum by offering speed tiers of 500/500 Mbps and 1000/1000 Mbps. These additional speed tiers will be made available to customers upon request.
