TARIFF FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the NPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the NPSC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff pages in effect. Consult the check sheet for sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - When a tariff filing is made with the NPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the NPSC.

- 2.14.1** The Company will make every effort to reserve "800/888" toll-free vanity numbers on behalf of Customers, but makes no guarantee or warrantee that the requested "800/888" number(s) will be available or assigned to the Customer requesting the number.
- 2.14.2** If a Customer accumulates undisputed past-due charges, the Company reserves the right not to honor the Customer's request for a change in 800/888 service to another carrier (e.g., "porting" of the toll-free number), including a request for a Responsible Organization (Resp Org) change, until such time as all charges are paid in full.
- 2.14.3** 800/888 numbers shared by more than one Customer, whereby individual Customers are identified by a unique Personal Identification Number, may not be assigned or transferred for use with service provided by another carrier. Subject to the limitations provided in Section 2.14.2, the Company will only honor Customer requests for change in Resp Org or 800/888 service provider for 800/888 numbers dedicated to the sole use of that single Customer.

SECTION 3.0 - SERVICE AND RATE DESCRIPTION

3.1 General

Calls are rated and billed according to one or more of the following variables: mileage between end points, time of day and day of week, type of access, term commitment, and/or volume.

If a Customer or Subscriber purchases more than one Legacy service, the cumulative monthly billing for all services will be used to determine the rate for each service. Customers with cumulative billing of less than \$50.00 will be charged a \$5.00 bill processing fee.

3.2 Timing of Calls

3.2.1 Long distance charges are based on the duration of each call.

3.2.2 The standard minimum call duration period for billing purposes and the incremental billing periods are specified in the descriptions for each service.

3.2.3 Unless otherwise specified in this tariff, usage after the initial period is measured and rounded to the next higher full minute for billing purposes.

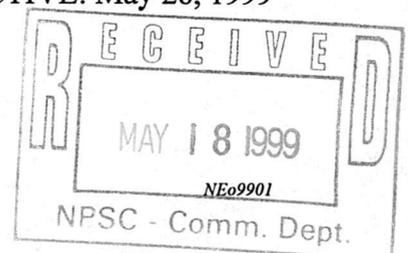

3.2.4 The Company will not bill for unanswered calls. When an End User indicates that he/she was billed for an incomplete call, Legacy will reasonably issue credit for the call.

3.2.5 When a call originates in one rate period and terminates in another rate period, the entire call will be billed at the rate in effect at the time of the call's origination.

SECTION 3.0 - SERVICE AND RATE DESCRIPTION, (CONT'D.)

3.3 Determination of Mileage

Usage charges for mileage sensitive services vary based on the type of service subscribed to by the Customer. For services utilizing switched access, mileage measurements for rate schedules are based on the distance in airline miles between rate centers associated with the originating and terminating stations. For services utilizing dedicated access, mileage measurements for rate schedules are based on the distance in airline miles between the Legacy network access point associated with the station utilizing Dedicated Access Origination/Termination and the rate center associated with the called/calling station.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1: Obtain the "V" and "H" coordinates for the serving wire center or network access point serving the Customer's location and the called/calling station.
- Step 2: Obtain the difference between the "V" coordinates. Obtain the difference between the "H" coordinates.
- Step 3: Square the differences obtained in Step 2.
- Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating locations of the call.

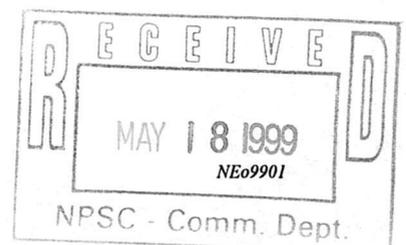

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

SECTION 6 - INSTITUTIONAL SERVICES

(N)

6.1 Institutional Operator Assisted Calling

6.1.1 General

Institutional operator assisted service allows Inmates to place Collect Calls through an automated call processing system. The call processing system prompts the Inmate and the called party such that the call is completed without live operator assistance. Calls are placed on a collect-only basis to the called party.

A number of special blocking and screening capabilities are available with institutional operator services provided by Legacy. These capabilities allow Institutions to control Inmate access to telecommunications services, reduce fraudulent use of the Company's services, and eliminate harassing calls to persons outside the Institution.

For services provided to Inmates of Institutions, the following special conditions apply:

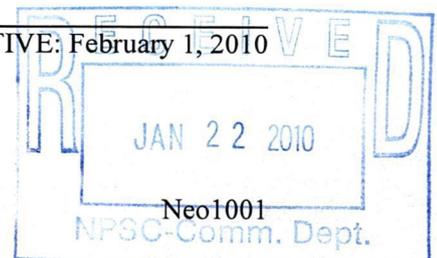

- (A) Calls to "900", "976" or other pay-per-call services are blocked by Legacy.
- (B) At the request of the Institution, Legacy may block inmate access to toll-free numbers (e.g., 800, 888) and dialing sequences used to access other carriers or operator service providers (e.g., 950-XXXX, 10XXXX).
- (C) At the request of the Institution, Legacy may block Inmate access to "911", "411", or local operators reached through "0-" dialing.
- (D) At the request of the Institution, Legacy may block Inmate access to specific telephone numbers.
- (E) Availability of Legacy's service may be restricted by the Institution to certain hours and/or days of the week.
