Klint,

On 9/29/21 9:49pm, my house at 21890 William Bay Drive (Lake Oconee), Columbus, NE 68601 via a DSL connection through Frontier Communications was 5.24 Mbps download, and .39 Mbps upload. See below.  
I would appreciate it if the state would help with some assistance to run fiber to our housing development.

Subject: Roni L. Birkhofer, 27611 Woodside Drive, Columbus, NE 68601 Speedtest

Please find the attached link for results to our internet service provided by [REDACTED] We moved to this location in June of 2021 and since have experienced terrible internet coverage and consistency. We have days with spotty coverage and days where we have no coverage. Many times we just turn off the WIFI and join our hotspot coverage that we have available from our wireless phone carrier. This is not the greatest alternative but sometimes our only option. I have been contemplating returning to work but with the internet that we currently have, I unfortunately don't think it would be reliable enough to work from home at this point.

Any upgrade to our internet would be outstanding.

Thank you!  
Roni Birkhofer

Applicant asserts that areas within the project footprint where AMG Technology Investment Group, LLC d/b/a NextLink Internet (“NextLink”) won RDOF bids are eligible for grants under the Broadband Bridge program. Upon information and belief, NextLink will not be capable of providing broadband and voice services in those areas within two years, as required by the Commission’s Order entered in C-5272 on August 10, 2021, at p. 6. There is no evidence to indicate that NextLink is in a position to deploy fiber-based infrastructure in the project footprint within two years.
