RE: E-Rate Docket

Dear Cullen-

Windstream is pleased to have the opportunity to provide comments on the Nebraska Universal Service E-Rate docket. In January, as a follow up to LB 992 and reports at public hearings for the broadband task force, Windstream compiled a list of libraries within our exchanges and their qualified speeds. We have attached our compiled spreadsheet list to our comments.

All the libraries within our exchanges are qualified to receive 100 mbps service and many are qualified for a minimum of 200 mbps service.

Our opinion is libraries within the exchanges are simply not taking advantage of the E-rate funds available to provide enhanced speed and service.

As the commission moves to setting a new rule for the e-rate docket. Windstream would support measures that would provide funds to projects on short fiber runs to library facilities.

Windstream appreciates the work of this commission on this matter. Please feel free to contact me with questions.

Sincerely,

Trent Fellers
Vice President, Government Affairs

The Account number column indicates if they have been a customer or are a current customer. The far column is what they are qualified for and what they are receiving. Where it says no broadband, that means that the library hasn't signed up for the service.
