To the Offices of the Nebraska Broadband Bridge Program (NBBP),

Saline County is submitting a letter of support for Nextlink Internet to expand into unserved rural areas within our county under the Nebraska Broadband Bridge Program (NBBP) Grant Application.

We certify to our knowledge that the proposed service areas are:

- 1.) not able to receive broadband service, or
- 2.) the only available service is cellular or satellite, and/or
- 3.) the only broadband service available from current providers is reliably less than 25/3 Mbps.

We would specifically like to support Nextlink Internet/AMG Technology's Western Fiber Project that will bring much needed FTTH fiber to the home for Western residents.

Nextlink's participation in the Affordable Connectivity Program helps ensure access to affordable internet connections our community desperately needs for work, school, and health care.

Furthermore, Nextlink's digital inclusion plan directly enables work, education, and healthcare monitoring and addresses the critical needs for our community that resulted from or was made apparent by the COVID-19 public health emergency. We are also aware of their active partnership with the Microsoft Airband Initiative which supports customer access to technical expertise, preferential pricing on innovative technological solutions, and digital skills training.

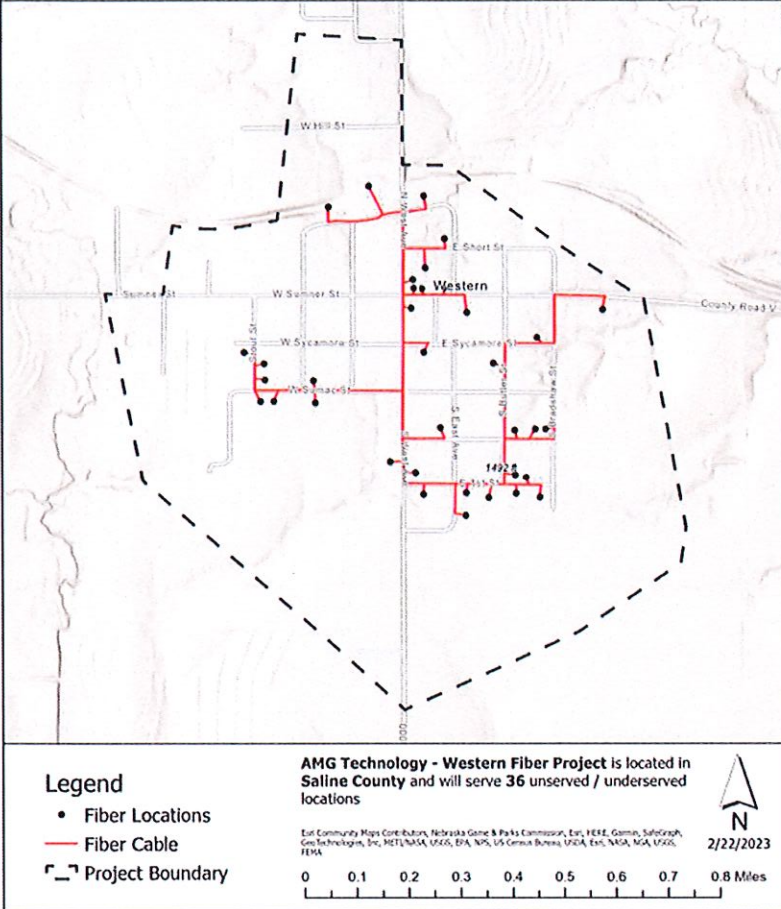

Ultimately, their plan will impact access to and use of information and communication technologies for the county of Saline, including individuals and communities like our Western that are the most disadvantaged.

If you have any questions regarding this letter of support, please contact 402-821-2374 as soon as possible.

Sincerely,

A handwritten signature in blue ink, reading "Phil S. Hardenburger", with a long horizontal flourish extending to the right.

Phil S. Hardenburger  
Chairperson, Board of Commissioners

Effective 2/1/2022

Not available in all areas. Restrictions may apply. © 2022 Nextlink Internet. All rights reserved.

We have knowledge of Nextlink being active in multiple Nebraska counties, including but not limited to Antelope, Gage, Madison, Pierce, Platte, Seward, Thurston, and Wayne, and find the company to be a potentially excellent partner to serve rural households and businesses that are woefully underserved by the lack of broadband services. Our condition has caused harm to our economic development efforts. Therefore, we welcome Nextlink to bring broadband to their proposed areas if funded under the Nebraska Broadband Bridge Program Grant Application.
