Subject: Stanton Telecom Pilger Area Expansion

Nick, it is great to hear Stanton Telecom is planning on expanding its services into the Pilger area.

I live at WillersCove along a small 100 acre lake, there are roughly 40 lots around the lake.

Our only internet and television service for our area is through a 900 MHz internet service and satellite television service.

Both services are highly weather sensitive. Fiber to the home would be a very welcome addition to our area.

Sincerely,

Bill Johnson
