

## Plume Managed Wi-Fi

---

Plume Adaptive WiFi continually adjusts to your home internet usage and activity to deliver in-home performance beyond the capabilities of standard WiFi systems — all intelligently managed from the cloud. We put that information in your hands using an app so you can have faster, more efficient WiFi unique to your needs.

### AI Security

Plume filters out suspicious content as your device connects to the Internet, providing you with real-time threat protection against crypto-mining, ransomware, malware, viruses, botnets, phishing attacks and more. Plume identifies all your connected devices and continuously monitors them for suspicious activity.

### Parental Controls

Make the Internet a safer place by managing the type of content that each device or profile can access. Additionally, approve or block specific websites per device or profile to keep your family safe.

### Manage your network like a pro

As people and devices come and go in your house, Plume lets you see which devices are accessing the Internet and how much they're uploading or downloading. You can block and unblock specific devices from accessing the Internet.

Plume Adaptive Wifi can be added to any Three River internet plan for as little as \$6.95 per month. The price includes the equipment lease for one Plume SuperPod and access to the Plume app.
