

Three River Communications_Ainsworth Rural Fiber Upgrade_ Attachment Letter F_1

Rate Comparability

Three River Communications provides the following information demonstrating that the retail rates for the proposed service area will be comparable (the same) to those provided in its CLEC service area. The rates charged in its CLEC service area for the offered speeds tiers are shown on the Attachment Letter F_2.

Three River Communications rates for residential service for 250/250 Mbps, 500/500 Mbps, and 1,000/1,000 Mbps are all below \$80.50 and thus qualify for an additional 10 points.

Three River Communications' plans do not have long-term contracts, early termination fees, data caps, do not throttle speeds after usage limits are reached since they do not have usage limits, or have metered "pay-as-you-go" service.
