Capital Funds Project with the Broadband Bridge Program of Nebraska
Inventive Wireless of Nebraska DBA VistaBeam Internet

I believe strongly that our town needs better higher speed internet and am in favor of Vistabeam's project to bring in higher internet speeds 100/100 mbps for the town of Bayard. It will help bring us up to speed with bigger towns in the area and help us to keep people in the area from moving to bigger cities. I work from home for one of my jobs and having reliable high speed internet makes it so I dont have to worry about going to the library to finish quotes for customers.
