

Attachment D – Non-Contiguous Statement

This project area is noncontiguous. The noncontiguous area will be connected by middle mile to the remaining area with middle mile fiber that is attributed to another CPF-2 project area for which Vistabeam is applying, Vistabeam_Cheyenne-NBBP-HWY30East_Application. If the other project area does not receive an award, this middle mile fiber will be built as part of this project.

We also note that portions of the project area polygon in Attachment A overlap with authorized Federal RDOF grants. These overlaps are tightly confined to roadways and do not contain any locations served by the RDOF grants. The overlaps are included in the polygon to depict portions of the middle mile fiber route that are required for the last-mile build.
