

Public Service Commission

Nebraska Broadband Bridge Program
Capital Funds Project

I am writing this letter in support of Vistabeam's (Inventive Wireless of Nebraska) proposed deployment in McGrew. Having a good internet connection of 100/100 mbps is crucial for kids doing on-line classes and people working from home. McGrew is a small town but should have access to the same high speed internet as bigger cities or more densely populated areas. We own and operate a very well known establishment and we rely on high speed internet for credit card machines, bookkeeping, streaming and security. Vistabeam is also a local company that can handle customer service requests in a reasonable amount of time.

Thank you for considering this project.

A handwritten signature in black ink, appearing to read "Jody and Angie Buskirk". The signature is written in a cursive style with a large initial "J" and "A".

Jody and Angie Buskirk
