Re: Nebraska Bridge Program/Capital Projects Fund

I am writing in support of Vistabeam's (Incentive Wireless of Nebraska, LLC) proposed broadband deployment project in Oshkosh, Nebraska. The proposed project would result in the Oshkosh, Nebraska having access to high-speed internet at 100/100 Mbps. My wife and I also own a small business in Oshkosh and my wife as a Funeral Director she relies on internet to do much of her job such as death certificates, correspondence with families, posting obituaries etc. so reliable high speed internet is essential for her job. I James Bondegard also rely on the internet at the city office to do majority of my job. Also at home we use internet for several purposes and as of now it is not reliable or fast enough to do all that we need it to do. This is needed and important to the City of Oshkosh to the businesses, residents, visitors and potential new people that want to move to Oshkosh to have reliable high speed internet. Right now it is a problem to get younger people interested in moving to Oshkosh as several people have said they would but the internet is not fast enough to do their job remotely so they have to find somewhere else to go.

Thanks

James and Paula Bondegard
