Re: Nebraska Broadband Bridge Program / Capital Projects Fund

I am writing in support of Vistabeam's (Inventive Wireless of Nebraska, LLC) proposed broadband deployment project in Oshkosh, Nebraska. The proposed project would result in the Oshkosh, Nebraska community having access to high-speed internet at 100/100 Mbps.

We are looking to get access to high-speed internet in Oshkosh for many reasons. We would want to help our local businesses grow, not only with what they will be able to do with the access but to get more tourism into our area. We feel with high-speed access more people will want to travel here if they know they can still get on and stay on the internet. We are also trying to encourage more people to work or run a business in our city remotely. We feel more people may chose this type of work or business, but only if it is accessible to them.

Thank you,

A handwritten signature in black ink, appearing to read "Al LeClair". The signature is fluid and cursive, with the first name "Al" being more prominent.
